

News from Imperium for Imperium

Issue II, November 2020

Civil war!

In unison, the regions of Sinue, Montium and Tenues declared independence from Imperium proper.

In a post by TheRealEpic, he stated that “the federal government has killed many...they were willing to attack...a clearly innocent faction[Assassins], so they could keep everything to themselves.”

While no official statement has been made by the federal government, there are talks of an upcoming war.

Ascension of Synerology as Dictator

On 5 November, Synerology, the incumbent leader of the Unicrat party, took charge as Dictator XIX of Imperium. He will replace SunkenSole, Dictator XVIII of Imperium.

This transition of power marks the longest reign in Imperium’s history: a total of 18 days, representing SunkenSole’s alleged favorite number.

Preceding his ascension was a large anti-Synerology campaign by TheRealEpic, fellow Unicrat and from the region of Montium; however, this was countered by large amounts of support for Synerology.
