

Problem, not sending personal outreach effective outreach messages to clients

Brainstorm

I could go through all of the courses on outreach from copywriting

Finish BIAB course from BM campus

I need to figure out the problem of the client I'm reaching out to

Need to offer myself as a solution to his problem

Dreamer

I have multiple clients who find my outreach very engaging and all want to work with me. The messages connect with them and they don't see any problems in working with me. I have great communication with my clients and make them lots of money

Realist

In order to do this I will need to be very diligent with my copy and try to improve my outreach everyday.

A lot of people may say no but it's possible if I keep trying every single day.

This will require lots of extra time and I need to cut out other sources of time in order to do this.

Critic

People Won't be overjoyed to trust a 17 year old high schooler

Lower amounts of proof and credibility will make you even less appealing

I can't come off to salesy or they won't be interested at all

Currently I'm not making it seem like I'm interested in their business\

Solutions at the end to implement

Improve one small thing in outreach everyday

Finish watching outreach courses

Do more research on my client and niche.
