

Weekly TRB Attendance reports

Currently, the weekly report captures CA percentages for students who are the primary line of enrollment for your building and ranks CA% from highest to lowest. In the far-right columns, you will see historical information from the SARB tab and any recent entries from the attendance contact log. There have been many calls, HDTs, and emails regarding entries from the attendance contact not displaying in the weekly report. As of now, the report can only capture the most recent entry.

Summer plans involve revamping this report to include multiple entries from the attendance contact log (if possible). Historically, this report had many columns that made it difficult to view on one screen. We will work to make this report clear and concise for data-driven attendance intervention practices.

Thank you for your patience,
Lisa
