

You can get drinking water from water refilling stations (with their own deep well) or from water dispensers (without their own deep well). The latter is present in many villages but is [not recommended](#).

The [next water refilling station](#) with its own deep well is in Ban Yang Thong, opposite the temple, Wat Yang Thong. There you can fill by yourself your own bottles or your own 20-liter tanks. Their drinking water is cheap.

20-liter tanks and a dispenser stand for these tanks can be bought at [Makro](#) and [Chiang Mai Plastic](#). Currently, empty 20-liter tanks are available for tenants free of charge (Oct. 2022).
