

Kajeet Hotspot

Using the Kajeet Hotspot

These little devices allow you to use a cellular signal (US Cellular or Verizon) to create a WiFi connection for your student's iPad or laptop.

1. Plug the hotspot into the USB power adapter with the provided power cable and charging brick. The charging port is on the bottom edge of the hotspot.

2. To turn the hotspot on, press and hold the power button  on the front of the hotspot until the screen reads "WELCOME".

5. Tap the "MENU" button to until you see this screen, then press the power button  (but do not hold it) to select it.

6. The wi-fi network name is the name scrolling across with the wi-fi icon next to it. The password is the word and/or numbers with the lock icon next to it.

If you encounter problems connecting to the internet or with the device itself, please call the Technology Helpline at **207-779-9888** for assistance.
