

**Twice as durable, thrice the flame, half the price and no broken flint!**

I almost remember when I used normal lighters.

I remember every time the flint broke, every time it ran out of fuel, every time I had to tear my finger off just to light it up, and everytime I bought 50 of them and only 40 arrived.

Why do you choose low-quality, overpriced lighters when you could have one that lasts twice as much and has a flame three times bigger than all those “broken-after-one-use” lighters?

Click below and buy a lighter that will last you for months and with a flame so big it can light up 5 cigars at a time!
