

Easy Ways to Refresh the Looks of Bathroom Cost Effectively

You don't need to spend extravagantly if you want to transform the [looks of your bathroom](#). The changes required may be smaller, but the overall effect would be great. Since a typical bathroom is not a big space, it only requires small changes. So, painting the walls, changing the fixtures and doing small tweaks can give your bathroom a luxurious style without budget going out hand.

Having that said, a few tips to refresh the looks of your bathroom are as under.

Change the fixtures

In order to bring your bathroom in 21st century, it's not the overhauling you will need to do. You will just have to change the main fixtures which are not going to be more than just a few in number. And, you will also not have to spend huge costs to get those fixtures updated.

With that said, you will have to keep your [focus on the patterns](#). For instance, when you are changing the water sink faucet, you will also have to pay attention to the showerhead. Furthermore, there should be enough synchronization between cabinet pulls, hooks, towel racks and shelving brackets. Furthermore, you can add more fixtures to make sure that your bathroom gets highly functional right according to your requirements.

Do it according to a pattern

If you are planning to [use wallpaper](#) to cover the walls of your bathroom, keep in mind that it may become too expensive. The cost of paper along with the cost of wall preparation can give a sum you might not want to spend. Therefore, it's quite beneficial to pick the areas of walls. Typically, you can decide a pattern this way. But if you are not sure about the pattern and you still want to attach wallpaper because of its looks, you can use wallpaper on only one wall. That will not only save you the money but it will also change the looks of your bathroom.

Give surfaces a new shine

With the passage of time, the glow on the surfaces of faucets and other main fixtures might get deadened. What we are talking about are the deposits of calcium and rust on the metal and ceramic surfaces. Well, you don't need to replace these fixtures unless it's the functionality which is disturbed. All you need to do is to bring an over-the-counter product specifically made to clean the calcium deposits and rust. That's not going to cost you more than \$10 for a gallon. Use it according to instructions and give the metal and ceramic surfaces a new shine.

Frame the mirror

The mirror is usually focal point of every bathroom. But it's worth noticing that a plain and frameless mirror doesn't provide much of aesthetics. On the other hand, custom-made mirrors can contribute in the overall bathroom outlook in better way.
