- Unit 1 Test on Friday, Feb 10

Treehugger Trivia: **Treehugger Trivia:** Celebrating Black History Month with Black Environmentalists

MayVynee Betsch — The Beach Lady

The Beach Lady's great-grandfather was the first African American millionaire of Florida. He founded the American Beach as a prestigious vacation spot for Blacks during the period of racial segregation. The Beach Lady therefore lived in luxury until she gave away her entire fortune to environmental causes which included the upkeep of the American Beach.

3. Work on Vocab & previous assignments

Work to Be Turned In::

1. Metric System Discussion Question (in Canvas): Post AND one reply due Feb 9
2. Comp Check #1 (due by end of class TODAY)
3. Latitude and Longitude Activities (in Canvas - Unit 1 Day 6)

Wednesday 2/8

Treehugger Trivia: Celebrating Black History Month with Black Environmentalists

Dr. Robert Bullard is often referred to as the “father of the environmental justice movement.” He has been one of the leading voices on the issue for decades. In 2008, he was named one of Newsweek’s 13 “Environmental Leaders of the Century”. In 2013, he was the first African American to be honored with the Sierra Club John Muir Award. Dr Bullard has authored numerous books on the prominence of waste facilities in predominately African-American areas all over the nation, as well as others that address urban land use, industrial facility siting, housing, transportation, climate justice, emergency response, smart growth, and equity.

Thursday 2/9

Treehugger Trivia:

(1864-1943)

George Washington Carver is regarded as one of America's greatest agricultural researchers and educators. His innovations in the field of crop rotation are considered breakthroughs in resource conservation, by preserving soil and making farms more productive. Carver may have been one of the first scientists to look at systems through the lens of biomimicry; he observed that nature produces no waste--what is consumed is returned to the whole in another usable form. As we are coming to understand 150 years later, Carver believed that in the natural world everything is a part of the whole. He understood that nothing exists in isolation, everything is inextricably connected, and ignoring that fact can have disastrous effects.

Important Information:

- Unit 1 Test on Friday, Feb 10 (40 multiple choice; you may use Cheat Sheet)

Latitude and Longitude Activities (in Canvas - Unit 1 Day 6)

Friday

John Francis is known to all as the Planet Walker. After witnessing a massive oil spill in San Francisco Bay in 1971, Francis gave up all motorized transportation. For 22 years, he walked everywhere he went - including treks across the entire United States and much of South America - hoping to inspire others to rethink the petroleum economy. As Francis traveled about on foot, he often found himself arguing with others about his decision, which led him to an even more radical decision - to stop speaking for one day and instead listen to what others had to say. This turned into a 17-year vow of silence. His charm and ingenious ability to communicate without talking earned him bachelor's, master's and doctorate degrees. The day after he ended his vow of silence on Earth Day 1990, he was struck by a car, but still managed to convince the ambulance crew to allow him to walk to the hospital.
