

Penguins

Did you know penguins don't have teeth ? So cool. There are 18 species of penguins. That's a lot. The smallest penguin is only 1 foot tall. They are called the little penguins. Did you know once penguins could fly? They could fly 60 million years ago .They became better developed for swimming so they don't fly any more. Penguins live in the southern hemisphere. The dad takes care of the eggs. The nest is built out of pebbles.

A cool book about penguins is "Penguins Don't Wear Sweaters!" It's a good book because it's funny and its genre is fiction .
