SL: The top 3 tips to overcome procrastination

Hey {first_name},

Ever wondered what sets you apart from the crazy fitness enthusiasts you see on social media platforms?

Taking action!

But do you know why you struggle to take action and they don't?

Procrastination.

That's why in this email, I'm sharing the top 3 research-backed tips to overcome procrastination.

Now you might think, why not them? Don't they procrastinate?

They do!

But they also understand that taking action is what gets them ahead and helps them progress.

So, they don't fall prey to procrastination but rather face it and overcome it.

How do they do it?

It's simple—they follow what works to overcome procrastination.

Here are the top 3 research-backed tips to overcome procrastination:

1. USE THE TWO-MINUTE RULE

When you don't feel like working and struggle to start, use this rule to get things done.

Just fool your brain into thinking you'll work for only 2 minutes. After that, you can do whatever you want—play games, watch movies, anything.

This simple trick works because it helps you gain momentum.

Trust me, it works. Because I've used it countless times to overcome procrastination and actually achieve my goals.

2. CREATE A DEDICATED WORKSPACE

Hold on—can a dedicated workspace really help you overcome procrastination?

Yes it can.

Imagine two scenarios:

A) You're in a room with people gossiping, scrolling phones, and enjoying themselves.

B) You're in a room with peers who are hustling and working hard.

Where do you think you'll be more productive?

It's obvious—the second room. The first room has too many distractions, while the second room motivates you to work.

3. ADOPT THE "NO ZERO DAYS" POLICY

This is one of the best tips I've ever received.

Work every day, no matter how little. Some people think working every day means always putting in full effort.

But that's not true.

We're humans—we get tired and can't always work at full capacity. Some days you'll work hard, other days less so.

The key is to maintain momentum.

Procrastination keeps you from starting. But once you start, you can keep going.

That's how you overcome procrastination and take action to get ahead.

Now go and give procrastination a straight punch in the face by taking these small, actionable steps.

Remember, every small step counts towards your progress and success.

That's all for this email,

To your success,

Raunak

SL: 3 mindset shifts that resulted in my breakthrough

Hey {first_name},

When I first started, these 3 mindsets shifts really launched my fitness journey and helped me build discipline.

Once I followed them, I achieved rock-solid six-pack abs in just 6 months.

Mindset Shift #1: Getting ready to hit a wall.

Hitting a wall is normal on any growth journey.

This "valley of despair" throws doubt and confusion your way.

You might feel like your efforts are backfiring, or that you're completely lost.

But here's the secret: this dip is actually progress.

It means you're pushing yourself and that growth is coming.

It's a necessary step you can't skip to achieve success.

Mindset Shift #2: No one is coming to help you.

Success is all about input.

Your output will only be as good as the effort you put in.

Low and mediocre input means low and mediocre results.

You won't achieve success or a better physique without consistent reps.

You have to do the work – no one else can do it for you.

Mindset Shift #3: Seeking solitude & connection (They work together)

These might sound opposite, but they're not.

Seeking solitude doesn't mean locking yourself away.

It means acknowledging that as you transform, letting go of your old self and becoming your successful self, some people won't understand or support you.

From them, you need solitude.

On the other hand, surround yourself with others on the same journey.

Implement these mindset shifts, and you'll see drastic changes and achieve your breakthrough too.

That's it for this email.

To your success,

Raunak

SL: You SHOULDN'T be always positive and happy

Hey {first_name},

Did you know that always being positive and happy isn't always a good thing?

Wait, what?

Yes, it's true. While a positive attitude can be beneficial, it's also important to acknowledge that on your journey to success, you will encounter many challenges.

Some of these challenges will be extreme.

In those moments, maintaining a positive attitude might not be possible.

And here's the catch: if you've always been relentlessly positive, you might not know how to handle those extreme situations when you hit rock bottom.

At that point, you might start to feel depressed, sad, and question yourself.

But all of this could be avoided if you knew how to tackle those rock bottom situations.

So, here's what you should do instead:

Prepare for the worst while hoping for the best.

This way, you can maintain your positive attitude while also preparing yourself for extreme conditions.

AND you'll accelerate your speed to success because you'll know how to handle rock bottom situations, something you wouldn't have learned by just staying positive.

That's all for now,

To your success,

Raunak

SL: How I Achieved Rock Solid Abs in 6 Months

SL: The Secret Weapon Most Fitness Plans Lack (Not What You Think)

The debate is over, {first_name}...

 It's not will power OR consistency

 It's will power AND consistency

[Here's why you need to use both \(and how\)](#)

The smartest athletes, fitness enthusiasts and professionals know that willpower's just the start.

Not because the will power gets you started, but because consistency keeps you going.

We all are humans, so we have limited willpower which diminishes over time.

The main challenge is being consistent.

That's why I have made a video explaining how you leverage your will power to be consistent.

[If you want to know how, click here now to see how you can leverage your will power to be consistent.](#)

In January 2023, weighing in at over 100kg, I started working towards achieving rock solid six-pack abs.

But it did not happen in a week or two.

I dedicated myself to it. I leveraged my will power to be consistent for 6 MONTHS straight.

I did not magically become fit, but I changed my mindset.

You can do the same too.

And it's easier than you think 😊

SL: How I turned crisis into opportunity

Hey {first_name},

Back in 2020, I thought I was killing it.

At the time, I had 3 profitable businesses.

I thought I had it made.

I was wrong.

When the 2021 COVID crisis occurred, I got hammered.

My businesses got slaughtered...

Even the bank started calling my loans.

Not because I had ever missed a payment...

It was because they were the ones in financial trouble.

It was a hellish and stressful time...

And it took months of hard knocks learning...

But I came out of it smarter, richer, and better prepared to survive and thrive.

This happened because I focused on what people truly needed during the COVID crisis.

People were struggling and wanted to improve their immunity and mindset.

So, I started offering fitness and mindset ONLINE coaching at a nominal price.

It wasn't about creating a high-ticket business.

It was about helping as many people as possible. And as it turned out, that made all the difference.

Today, I have a thriving business in mindset and fitness online coaching.

So, what did I do differently?

A lot.

For starters, I didn't shrink my goals. I didn't start playing defense.

Instead, I doubled down on helping people improve their health and mindset.

The real game-changer was recognizing the power of mindset and fitness.

Maintaining physical health and a resilient mindset not only helped me weather the storm but also allowed me to help others do the same.

I realized that no matter how tough things get, your mindset can be your greatest asset.

Coupled with physical fitness, it can help you overcome almost any challenge.

If you're ever facing tough times or just want to build a stronger, more resilient you, remember this:

Focusing on your health and mindset can lead to incredible outcomes.

To help you understand this better, I created a video explaining how mindset can profoundly impact your life.

[Click here to watch the video and learn more about the power of mindset.](#)

SL: How to get out of the valley of despair

Hey {first_name},

Have you ever felt drained, overwhelmed, and lacking motivation?

It's as if you see no progress and start to question yourself and doubt your abilities.

Reflecting on missed opportunities can leave you feeling burdened with regret, even ashamed to face those around you.

So, you think of isolating yourself and disconnecting from everybody.

But in this email,

I want to offer you a roadmap for navigating through this valley of despair.

Because, let's be honest,

You're not the only one who's been here. Most of the successful people have passed through here on their paths.

It's a vital part of the process, one that can't be bypassed.

So, when you feel like you've hit rock bottom, remember, this could be the starting point of something great.

Now, overcoming the valley of despair might seem extremely difficult, but it's simpler than you think.

You just have to NOT feel defeated, depressed, sad and question yourself.

By rejecting these mental roadblocks, you pave the way for your own breakthrough.

To rescue you on this journey,

I've put together a complimentary video that offers guidance on overcoming any roadblocks and mental barriers you may encounter on your path to success.

SL: Tired of Failed Diet Attempts?

Hey %FIRSTNAME%,

Do you feel frustrated by failed diet attempts?

No matter how much you starve and follow starvation diets to reduce your weight,

The results are not visible.

And you might experience stares and whispers from others in public settings due to weight.

This causes you to become self-conscious,

And even avoid social interactions sometimes.

But the thing is:

These starvation diets might be the reason you are not able to lose weight.

You might see short term changes,

But after you stop following the diet,

The results disappear.

Research shows that starvation diets can actually slow down your metabolism,

Making it harder to lose weight in the long run.

And

It makes you think that you can never enjoy your favorite foods to lose weight.

And with every bite of food you have,

It makes you hesitate and feel guilty or shameful.

But ... things can be different.

You can lose weight without following starvation diets while still enjoying your favorite foods.

If you want to find out how, I have already explained it in detail in this video:

https://www.youtube.com/watch?v=0Ni00XDSd6E&ab_channel=FantasiaEchoes

Spoiler Alert:

In this video, I've talked about how starvation diets are responsible for your weight gain

And how you can lose your weight without going through those starvation diets.

So if you want to lose weight,

Enjoy moments of your life without worrying about your weight,

And discover the new way to lose weight without giving up your favorite foods.

SL: The True Reason Why Your Diets Aren't Working

Hey %FIRSTNAME%,

Do you often compare yourself to your friends and others on social media?

In group photos you stand out,

And you experience stares and whispers from others in public settings due to your weight.

This causes you to hesitate to participate in physical activities or outings with friends.

So you follow the old conventional methods to lose your weight,

And start following the keto diets, no carb diets and other starvation diets.

You might see short term results,

But as you stop following the diet,

The results disappear.

In the long run, it makes it even more difficult for you to lose weight.

You wanted to become a Weightless Wonder but you ended up becoming a Heavy Load.

And you start to think that you are not putting much effort into losing weight.

But the truth is:

This isn't your fault.

These starvation diets might not be suitable for your body,

These starvation diets play with your hunger hormone so you start to become more hungry,

And end up eating your favorite foods to satisfy your hunger.

And all the efforts you put into losing weight, all goes into vain.

“What causes that?” You may ask ...

I have recorded an entire video breaking down:

How these starvation diets are actually responsible for your weight gain.

And how you can actually lose weight while still munching on your favorite foods.

If you want to understand how,

SL: Is Your Diet Not Working?

Hey %FIRSTNAME%,

Are you tired of the endless cycle of failed diet attempts,

And feel guilty about it?

You're not alone.

Here's the not-so-sweet truth:

Those starvation diets might actually be hindering your weight loss efforts.

Research shows that they can slow down your metabolism,

Making it even harder to lose weight in the long run.

Imagine feeling self-conscious every time you step out in public,

Constantly worrying about what others might think of your weight.

It's exhausting, isn't it?

And it's not just about appearances – it's about how you feel about yourself, deep down.

However, it doesn't have to be that way.

“How is it so?” You may ask ...

I've already made a video in which I have explained:

How starvation diets are actually responsible for your weight gain,

And how you could lose weight without starvation diets,

While still munching on your favorite foods.

SL: (FREE Masterclass) Make \$10k/Month in 90 Days

Hey %FIRSTNAME%,

The picture below showcases the win of one of our students:

[Picture of Results Your Students Have Gotten]

And that's not it.

We have dozens of similar examples of students

Who are literally printing money with our proven online business model,

Without having to do any of the work themselves.

In this email, I will tell you exactly how you can do the same.

Note: This email might be a long one but it is packed with insane value so keep reading if you are willing to take real actions towards your success.

If you're are also looking to earn \$10k/month online within the next 90 days,

Just like our students.

Then here are the top 4 pieces of advice I will give you:

- 1. Do not start an online business which requires capital investment.**

%FIRSTNAME%, have you ever wondered why some people never even start an online business?

It's because of the investment.

They either don't have the money or they're scared to spend money on a risky online business.

And they do not even take the first step towards their financial freedom.

Now you might be wondering, 'Does any online business model even exist that does not require capital investment?'

Yes ... There is.

But I'll get back to it in a few moments.

For now, here's another piece of advice for you.

2. Stick to a single online business model.

Do you know why most people who start an online business never really succeed?

It's because they keep hopping from one business model to another, thinking that:

This new business model would make them rich due to the shiny object syndrome.

But it's not their fault.

It's the internet that is changing at a rapid speed.

And the entry of AI has made it even quicker.

So do not fall for the 'Get-Rich-Quick' schemes,

And stick to a single online business model until you succeed.

Because if you grind, you will succeed.

That's the law.

And now, onto another nugget of wisdom.

3. Join communities where people are better than you at using this business model.

%FIRSTNAME%, ever heard the saying,

"You are the average of the five people you spend the most time with"?

Well, it holds true in the online business world too.

Joining a community is like having your own group of advisors.

Being around people who've mastered the business model you're into can speed up your learning.

These communities offer helpful support, tips, and ideas that you might miss on your own.

Plus, it can help you to connect to new people and even potential clients.

So, be sure to find and actively participate in communities.

It could be forums, social media groups, or specific online communities.

4. And at last, GRIND!!!

Let me ask you a question.

If you want to succeed,

Should you either:

1. Keep procrastinating and never take any actions. Or ...
2. Keep working until you succeed.

The answer is obvious.

Yet most of the people never take any actions.

Why? You may ask.

It's because they are not willing to work hard,

And they want to gain without any pain.

But this NEVER works.

Because we all know that:

No pain, No gain.

So %FIRSTNAME%, do yourself a huge favor.

Keep grinding.

If you are not willing to put in the hard work,

Then, I'm afraid achieving success would be difficult for you.

As building real wealth takes time and effort.

But there's still one problem.

Without the right guidance and a roadmap specifically for you,

It's like grinding away in the dark.

Working hard alone isn't enough.

Just throwing effort at something might not get you the results you want,

And that would be a waste of precious time and money.

It's like planting a seed without knowing what kind of plant it will grow.

You can work super hard planting a seed, but if it's a mango, you won't get bananas.

The same goes for building a successful online business.

You can't expect to make six figures without a proper business model

And the knowledge to execute it effectively.

But I get it,

Starting an online business can turn into a rocket-science real quick.

[That's why I want to give you FREE access to a masterclass showing exactly:](#)

How to start an online business from scratch

With NO prior experience

Or having to invest a single penny

And scale it to \$10k/month in just 90 days (or even quicker)!.

The proven business model, which I refer to as “drop-servicing,” allows you to offer services without doing any of the work yourself.

The secret lies in leveraging a smart system.

So, If you want to access the FREE masterclass then,

SL: This Sets You Apart from Top Copywriters...

Hey %FIRSTNAME%,

Ever wondered what makes top email writers stand out?

It's simple: Email Marketing.

Just by mastering this skill (we'll dive into "how" later),

I doubled rates from \$1k to \$2k with existing clients, without adding more work.

It's the secret that turns 'hesitant' into 'take my card!'

That's the difference this skill can make.

Think about it.

Copywriting might get you some sales,

But email marketing does something stronger.

It guides potential customers through your sales process, turning maybes into a sure thing!

Your email list isn't just a list; it's a community.

Here, people get to know and trust you, making them more likely to buy from you.

For example,

Think about your own behavior.

Would you easily buy something from a stranger?

Probably not.

But if it's from someone you've been following for a long time, someone you trust, you'd be more likely to make a purchase.

Similarly,

Most of your email subscribers become your loyal customers by using email marketing to build trust.

This adds value to your service and boosts income for both you and your client.

Here's how it works...

Picture this:

You have a client who pays you \$1000 every month.

With email marketing skills, you suggest taking care of their email list, setting up automatic messages, and creating effective campaigns using their CRM.

Emphasis: Add slight pauses in narration at pivotal moments to let the message sink in.

Script:

Online Business owners, you can earn more with less clients.

Let me share a quick story to explain that.

Dan Lok tried 13 different businesses and failed all of them.

Then he met his mentor, Alan Jacques, who taught him copywriting.

Soon, Dan made his first \$10k/month.

And then... (Small Pause) Alan told him to, 'Double his prices.'

DOUBLE MY PRICES?

Yes, double them.

But Alan... I will lose all my clients!!!

Just DOUBLE THEM.

Fine!

Dan was scared. 'He'll lose clients!' he thought. But he trusted Alan and did it anyway.

Yes, some clients left, but guess what?

Dan was still making \$10k/month with fewer clients, and less work!

So, business owners, don't fear high-ticket pricing.

QUALITY OVER QUANTITY

Don't undervalue yourself and charge what your service is actually worth.

Script #2:

Style: Inspirational and direct, with a mix of personal engagement and client success stories. Use quick cuts to maintain energy and focus.

Type: Motivational and instructional, aimed at coaches and professionals in the service industry.

Sound Type: Upbeat and motivational background music, with key moments emphasized by sound effects like a lightbulb moment or success chime.

Visuals: Use a combination of close-ups and medium shots. Incorporate footage of real interactions with clients and highlight transformations.

I had planned to study a week in advance. But, well... things don't always go as planned.

Before I knew it, it was the night before the exam. And guess what? I hadn't started studying.

[Cut to: You glancing nervously at a clock, time ticking away, then cramming with notes and textbooks]

The pressure was on. I needed to pass this.

Each attempt cost \$116. And the moment you press Enter, you find out if you passed or failed.

The clock was ticking. My agency work didn't stop, and now, neither could I.

The next day, I'm staring at my screen. Heart pounding. \$116 on the line.

This is it. One click. Instant results. No turning back.

[Cut to: You sitting at a computer, fingers hovering over the keyboard, suspense music playing]

Seconds felt like hours... and then... it appeared.

FAILED. By just ONE mark.

\$116, GONE! Just like that.

But here's what I learned for that \$116...

Time management is everything. Stay focused and plan ahead.

You see, there's a hidden strategy behind all that wealth.

And today, I'm going to reveal the exact 5 methods Andrew Tate uses to make millions that no one talks about...

And how YOU can do the same.

(Visual of a cave with a caveman pops up)

Unless you live in a cave, you must already know about leads.

(Bang and funny sound effect with a cropped screenshot of lead definition on the screen. Narrator speaks the definition in a very fast, weird, and funny voice)

You see, it all starts with something as simple and important as posting free content on social media.

Now, you might be thinking,

“Ads can get me more sales than organic reels, right?”

And yeah, you’re not wrong but only if you’ve got a ton of cash to burn through.

But let me be honest with you, creating reels isn’t just cheaper and easier, it can actually be a game-changer.

Picture this: just one viral reel with a simple call-to-action and you could bring in more sales than all your ads combined.

(Visual of a romantic date with funny background music)

It's like asking someone out on a date before proposing marriage.

You build a relationship first, right?

And what if you knew how to make those reels go viral?

(‘Method 2: Start a Controversy’ written on the screen)

Now this is the triumph card of Andrew Tate when it comes to making his reels go viral.

Andrew doesn't just post any content...

He drops controversial and provocative statements that grab people's attention and stir up controversy.

This not only makes his reels viral but also makes him more famous.

And he adds a cherry on top by participating in public debates to amplify the buzz.

And what do you think happens by that?

Even more fame, even more followers and even more people talking about him.

And what do you think he does by gaining all this popularity?

You see it coming right? **(Funny and excited music)**

He strategically uses his fame to attract more people to his business, 'The Real World.'

It's not just about being popular for Andrew Tate;

It's about getting more people interested in what he offers so he can make more money through his lead generation strategy.

After making a ton of money from people signing up for 'The Real World',

Guess what he does?

(‘Method 3: Leveraging Results’ written on screen)

He leverages the success stories of his students to get even more people interested in his subscription. 🤖

Imagine seeing a bunch of people showing off their results and thinking, "If they can do it, so can I!"

And do you want to know another weapon in his inventory?

('Method 4: Podcasts' written on screen)

The podcasts.

People just love Andrew's podcasts.

He gets them all fired up about getting rich and shows them how it's possible.

During the podcast, he starts highlighting 'The Real World,' getting everyone interested.

And then, at the end, BOOM!

More people sign up. Even More money.

('Method 5: Affiliate Marketing' written on screen)

Next up, he gets even more people signing up through affiliate marketing.

He creates this huge network where other people promote his courses and get paid a commission for every sale they make.

It's like having an army of people out there, all working for your business to make you more money.

And of course, he doesn't stop there.

('Method 6: Running Ads' written on screen)

Tate also runs eye-catching ads on Google and all the major social media platforms to promote 'The Real World,'

Specifically designed to grab the viewer's attention and make them want to buy.

Now here's the thing: Andrew has been making millions by using these 5 methods to generate leads and turn them into money.

And while it might sound simple, there's a catch.

I've noticed that most people fail in one of these two steps: generating leads or creating a good sales funnel.

But you, my friend, can change that!

By using these methods, you can fix one of the toughest problems—generating leads and can almost guarantee to never run out of leads and money.

And now, it's your turn to take actions and put these methods into practice ASAP if you truly want to succeed and become rich.

And remember, there's no thing such as 'Get Rich Quick', but by taking actions, you can get rich quicker.

So focus on increasing the velocity in which money comes to you,

As well as the velocity in which you invest money in order to multiply it.

But also understand because this is a process.

This is a journey, so just take the first step.

And on that note I'm gonna be waiting for you at the top,

And I'll see in the next video.
