

What is an Airdrop

An Airdrop is Basically free Money that comes from the sky. Some coins Tokens and chains. Are giving away free Cryptocurrency for doing different Tasks you do. Mostly the Team gives Airdrops to early users of their token. Some may wonder why they are doing this, the whole idea behind this is, they wanna distribute their token so more People will use it. The team are holding a share of their coin and when the Price goes up they gonna dump it on the market that's how they make profit out of it. It doesn't need much Time per day to farm the Airdrops if you Farm chain Airdrops you might even do the Task once a Week or every two Weeks. To farm an Airdrop you don't need much more than 50\$ per Address

Tasks you might have to do:

1. Social Media: there you have to connect your wallet to an Social Media Acc of yours like Twitter or Discord.
2. Swapping Coins: You might have to swap the Tokens you have on their chain
3. Be Active: You might have to reach a certain amount of Transaction over time
4. Bridging if it's a new chain
5. Volume
6. Protocols used

Go the extra mile and be consistent you might not know when the Airdrop comes maybe next week but maybe in a Year you never know but get profit out of it you have to be consistent.
