

Not your average daily moisturizer

Selecting a daily moisturizer for your skincare routine can be overwhelming. With pharmacy shelves and beauty blogs inundated with options, making a good choice can seem impossible. When choosing the moisturizer you intend on using every day, there are a few things to consider.

For example, do you have drier skin or more oily skin? Do you have a combination of both? Likewise, what ingredients do you care about? Have you considered the ramifications of some commonly used chemicals? If you feel lost in the world of skincare, we're here to help. With Fièra Cosmetics, safe, all-natural products don't have to be elusive.

The Fièra Apple Stem Cell Cream

The Fièra [Apple Stem Cell Cream](#) is a unique moisturizer designed specifically to help with the regeneration of mature skin. This cream helps restore a youthful glow to your skin, helps with tightening and firming the skin, and helps with banishing fine lines and wrinkles.

This moisturizer is successful because of its active ingredients. Active ingredients in the Apple Stem Cell Cream include the following:

- Sea buckthorn oil
- Vitamin A
- Vitamin E
- Apple Stem Cells

Plus, all Fièra Cosmetic products are non-GMO, paraben-free, cruelty-free, and gluten-free.

What Are Apple Stem Cells?

Apple stem cells are regenerative cells found in a rare plant. Much like human embryo stem cells, they help restore damaged cells by replacing them with these adaptive stem cells. But unlike human embryo stem cells, harvesting apple stem cells is an ethical alternative and perfect for older individuals. In other words, apple stem cells help delay signs of aging while also helping restore any signs of aging that have already begun to emerge.

How to Use It

Apply the cream twice a day to your face and neck after you use your daily cleanser. The Apple Stem Cell Cream can also double as an eye cream and skin treatment option.
