ABSTRACT

Write an informative abstract (150–250 words recommended). State the purpose, methods, key results, and implications. Avoid citations if possible.

Keywords: keyword1; keyword2; keyword3; keyword4; keyword5 (3–6 keywords)

JEL Classification (optional): E00; G10; M20

1. INTRODUCTION

Explain the research problem and its importance. Provide background, relevant literature, and the research gap. Clearly state objectives, research questions, and contributions.

2. LITERATURE REVIEW

Summarize and synthesize relevant theoretical and empirical studies. Identify gaps and build a conceptual foundation. End with hypotheses/propositions if applicable.

3. METHODS

Describe the research design, data sources, sampling, variables/measurement, and analytical approach. For empirical studies, include model specification and robustness checks. For qualitative studies, include data collection, coding, trustworthiness, and ethics.

3.1 Model Specification (example)

$$Y_i = \alpha + \beta_1 X_i + \beta_2 Z_i + \varepsilon_i \quad (1)$$

Where Y is the dependent variable, X and Z are explanatory variables, α is the intercept, β are parameters to be estimated, and ε is the error term.

4. RESULTS

Present findings clearly using tables and figures where necessary. Report statistical significance, effect sizes, and confidence intervals when appropriate. Avoid repeating all numbers in the text.

Table 1. Descriptive Statistics (example)

Variable	Mean	Std. Dev.	Min	Max
Variable name	0.00	0.00	0.00	0.00
Variable name	0.00	0.00	0.00	0.00
Variable name	0.00	0.00	0.00	0.00
Variable name	0.00	0.00	0.00	0.00

Note: Provide clear notes below tables as needed (e.g., definitions, sample size, data sources).

Figure 1. Research Framework (example)

[Insert Figure Here]

Note: Figures should be high resolution and readable in grayscale.

5. DISCUSSION

Interpret the results and relate them to theory and prior research. Explain mechanisms, practical implications for firms/policy, and unexpected findings.

6. CONCLUSION

Summarize main findings, contributions, and implications. State limitations and provide directions for future research.
