OBJECT DESIGN 210 A
COMMUNITY NOTES: WEEK THREE

Keyboard Shortcuts:
Ctrl + Left click = deselect a curve while having a group of curves selected

Commands:
Picture = allows to drop an image into the rhino file as a surface
Array = create a 1, 2 or 3D array (list) of objects
ArrayPolar = 1 Dimensional, around circle with choice angle (similar to rotate copy)
ArrayCrv = 1 dimensional along a curve
Change Layer = Moves an object from one layer to another
Lock = Will protect an object from any changes
Hide = Will remove an object from view if selected
Hatch = Fills in a curve with the current layer colour
SelDup = select duplicate objects (make sure nothing is selected before running this command)
SelCrv = selects all curves

Vocabulary:
ARRAY = list
Moire (pattern) = an interference pattern between two or more "regular" patterns
Diagrid = diagonal grid
HSV: Hue saturation value
HSL: Hue saturation luminance
Paletton: a website to explore colors

Homework: at least 10 photos, some sketches on either paper or Rhino

Applying Materials (basics)

Q+A
Different ways to tessellate hexagons?
