

1.

A company that sells sodas makes about 25-50k a month in Egypt with 30k followers
AI customer service Plus Actual video marketing (not very good content right now) AI-Generated Personalization: AI tools to create personalized video ads for different customer segments. For instance, we use data to tailor ads based on location, preferences, or past purchasing behavior.

2.

It is a pretty nice restaurant with 10-20k per month in revenue and 20k followers on Instagram. Just some nicer videos would do but maybe some AI could be integrated.

3.

Clothing brand 5-10k a month 25k followers
More AI automated stuff and also get some AI to determine which types of clothing do better and then help them sponsor those clothes and advertise those the most to push their sales AI automated customer service and marketing also use AI to determine analytics which will predict their demand to help with stock.

4.

Another clothing store 5-10k 25k followers
AI automated customer service plus a bunch of content upgrades

5.

Another clothing store 5-15k 62k
Customer Journey Analytics:

Implementation: Collect and analyze data from various touchpoints, map customer journeys, and develop predictive models.

Output: Insights into customer behavior, improved retention strategies, and more effective marketing campaigns.

6

AA perfect steak house across the branches 40k a month 257k followers
AI automatic services and start helping with their content, talk with the owner about expanding and franchising

10. An Islamic perfume shop based on the sunnah 77k followers makes about 4 million a year according to Apollo and 7 million according to Rocketreach

Going to offer a bunch of the AI stuff you saw before but mainly also video marketing, and building we will also start helping them connect with their owner by making them answer questions.
