

Logistics:

- Pre-Register here:
- <https://eventreg.orienteingusa.org/eventregister/a40/register/start/dvoa-core-creek-sprints---july-1-2023>
 - Registration closes at the end of the day Thursday June 29th.
- Parking is off of Woodbourne Road N 40.20409, W 74.90668
 - Note that this is a different lot than we have previously used at Core Creek, and is accessed using a different entrance than the main part of the park.
- Registration, start, and finish will all be a few steps from the parking lot.
- A bathroom will be available a few steps from start.

Courses:

- **White:** Course is all on trails with control markers at most trail intersections.
- **Yellow:** Course has many controls near but not on trails, with some options to go off-trail in open woods. Good for adult beginners who are comfortable reading a map.
- **Sprint 1:** More of a short course than a true sprint. This course is mostly off-trail through some of the most open woods of the park. There will be a lot of short legs with route choices, but much more off-trail travel and control locations than in a traditional sprint. Difficulty level of control locations will be up to intermediate (Orange).
- **Sprint 2:** Faster terrain than sprint 1, with most of the time spent on trails. The course uses a part of the map with a dense trail network and fairly thick vegetation, so route choices will be important.

Sprint 1:	2.2 km	40 m climb	12 controls
Sprint 2:	2.3 km	35 m climb	14 controls
White:	1.4 km	25 m climb	12 controls
Yellow:	2.5 km	50 m climb	17 controls

Map Notes:

Scale: 1:4000 Contours: 5m

Professionally remapped in 2019-2021 by Vladimir Zherdev and Bob Burg.

Minor updates in spring 2023, mainly to capture changes to trails since 2021.

The map was recently redone, so the vegetation mapping is pretty accurate. Moderate and dark green areas tend to be pretty thorny so are best avoided in the summer - the optimal route choice for a leg is never designed to be through dark green.

Mountain bikers are adding new trails in this area. The moretab established trails have been captured in the map updates, but you may also run across a couple of faint trails that are still in the process of becoming established.

Out of Bounds:

Out of bound on the maps is shown using purple hatched lines covering an area. You may not enter these areas or you will be disqualified. There are two out-of bound areas on the map:

1. A planted field. There is a trail around the perimeter of the field that you are allowed to use (this trail is not covered with purple hatching).
2. Soccer and baseball fields. Even if there is not an active game going on you are not allowed to cross the fields marked as out-of-bounds.
