

WYST vs C00lkidd VS blog!

WYST, the soul eating monster of Pillar Chase 2

And C00lkidd, the playful exploiter of Forsaken

Roblox, a platform full to the brim of creativity, full of games of every genre. And these two playful adversaries come from roblox's most popular asymmetrical horror games. And in this blog they will be analysed to decide who would win in a fight

Before We Start...

For this blog we will be giving WYST Pillar Chase 2 all statements from Pillar Chase 2, developer statements and any reasonable scaling. For C00lkidd we will be giving him the actual C00IGUI, the C00IGUI seen in forsaken, forsaken, any skins which do not change him into a different character and any reasonable scaling...

And MX did not Destroy the entire Flagpole

Credits

This blog was created in collaboration with saltpath999, C00lkidds background, the images used in the abilities section, the preview images, C00lkidds meme in his weakness section, the "combatants are set" GIF and more would not have been possible without them. They also get credit for adding all of the images to the powers and abilities section. A huge shout out to them

for their contributions, this blog as a whole most likely wouldn't have been made without their help

Shoutout to Metal Leading for creating many of the WYST renders used in this blog. Many of the visuals used would not have been possible without this

Shoutout to ChemistryTasty for calculating WYSTs durability, this would not have been possible without them

Credits to art used in the “before the verdict” section will be seen underneath the individual images

Sources used in this blog include

- [the pillar chase 2 wiki](#)
- [the FC/OC VS battles wiki](#) for WYST
 - [and the general PC2 section of this wiki](#)
- [The FC/OC VS battles wiki for C00lkidd](#)
 - [and this page of general forsaken calculations](#)
 - [and this page explaining the cosmology of forsaken](#)
- [the Forsaken wiki](#)
- [the roblox wiki](#)
- [this calculation](#)
- And of course a lot of first hand experience with both games

Although for some sources i suggest taking them with a grain of salt like i did, as some parts don't seem to add up at points

Finally, for your listening pleasure please enjoy the OST to either Forsaken or Pillar Chase 2. Which you will listen to? That's up to you! (i recommend putting these playlists on shuffle)

- [forsaken OST](#)
- [pillar chase 2 OST](#)

Background

C00lkidd

"You seem familiar... oh well!"

One day, a roblox hacker who went by the name 007n7 (strange name to give a kid) found a strange Red Flesh-like humanoid abandoned on his doorstep, who he named C00lkidd (guess weird names run in the family) who later joined a Vandalism group called... team C00lkidd... strange coincidental names aside after an unknown amount of time C00lkidd and his Father seemingly attracted the attention of a powerful entity known as the spectre. using C00lkidd's naive nature to make him believe those he murdered, including his own father, were simply sleeping and their screams were of joy, he tricked C00lkidd into becoming one of his Killers in Forsaken.

Weird Yellow Smiling Thing

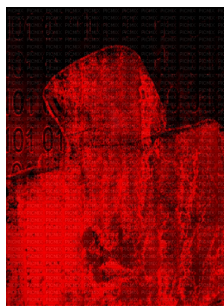

"Boom goes the morsel!"

Somewhere out in the vast multiverse, there was a reality created and ruled by a creature beyond the understanding of man, a cruel god who dictated an entire reality. The weird yellow smiling thing. However, one day. A being even more powerful than it bested WYST in a fight, slamming them into the earth so hard that it left them with severe brain damage, causing them to lose their memory, and a lot of their intelligence. From this they found a new home in a copy of pac-man, and eventually became a killer in pillar chase 2. But be warned, even without their full potential, if they want you dead all you can do is run.

Experience & Skill

C00lkidd

While C00lkidd is quite young (being around 10 years old) they have shown great skill in combat and with their abilities. C00lkidd can fight and kill guest 1337, a survivor with military combat training and who is frequently shown fighting back. Additionally, C00lkidd is skilled enough with the c00IGUI to be able to frequently deconstruct games

WYST

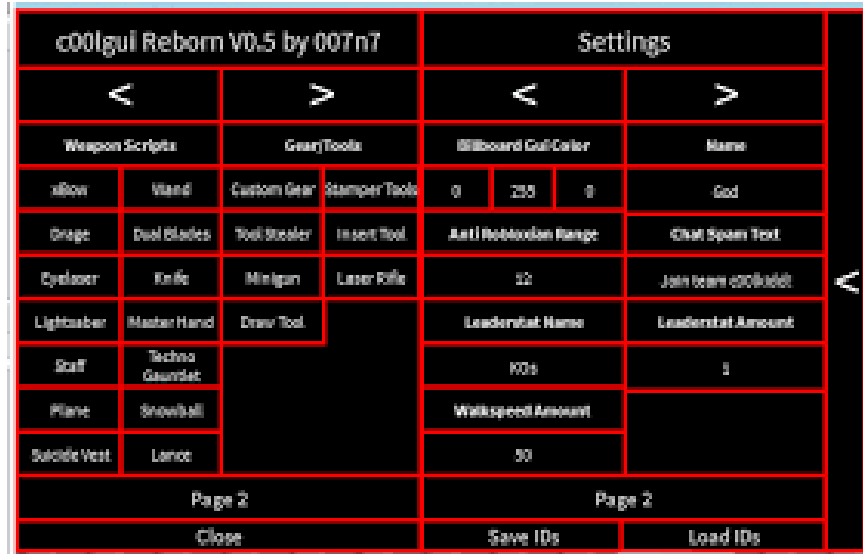

It's difficult to gauge how much combat experience and skill WYST retained after the injury. However, he still should have some level of skill with his abilities, and he's even capable of being clever with gobble bombs, as he's been shown to be able to hit them in a way that they'll bounce off the walls at the right angle to hit a survivor

Equipment

C00lkidd

The C00IGUI

The C00lGUI is the exploiting software used by 007n7 and C00lkidd. While there is little info on the full extent of the actual C00lGUI, I can say with certainty it provides C00lkidd with these abilities

- *Death manipulation*
- *Sound manipulation*
- *Reality Warping*
- *BFR (kicking people from the server)*
- *Weapons creation*
- *Deletion*
- *Possibly flight*
- *Possibly telekinesis*

Additionally, the C00lGUI is featured as a part of 007n7s kit in forsaken, meaning C00lkidd should also have access to

- *Cloning / decoy creation*
- *Invisibility*
- *Teleportation*

The Firebrand

C00lkidds main sword! Despite its name the sword does not have pyrokinetic properties, but rather prevents the wielder from being frozen.

Large lollipop

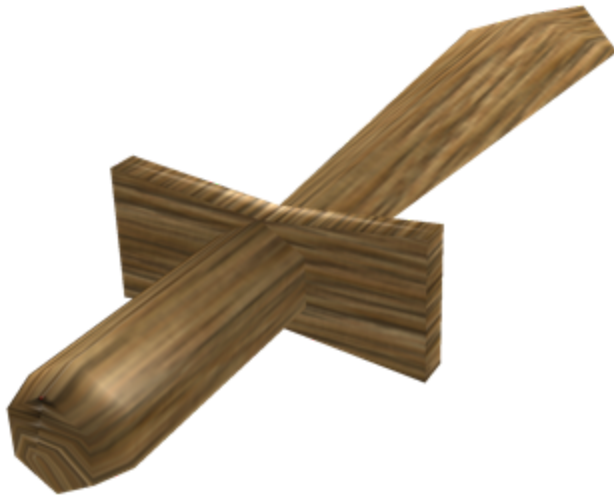

Functions the same as his sword. But it is more whimsical

Roblox Classic Brigands Sword

A true classic among the roblox catalog! However all things considered it's a fairly standard sword

Wooden Sword

It's like the firebrand, except worse.

Pool Stick

It's like the wooden sword... but worse

Cardboard weapons

This jokes getting old, you get the idea

Skateboard

Totally Rad!!!!!! It's just your average bog standard skateboard, can be used in all the ways you'd expect of a skateboard

Pizza

~~Pizza-pizza!~~ Pizza in forsaken has shown to have healing properties, so it's possible that this pizza is the same and could provide C00lkidd with a self heal. If not, it's just regular pizza

WYST

Claws and teeth

WYST has large black claws and large teeth. His claws have been shown to be strong enough to break bone and those teeth are strong enough to chomp someone in half

Abilities

C00lkidd

Pyrokinesis

If a survivor is hit with walkspeed override or by a pizza bot they will be lit on fire for a short period of time

Summoning

C00lkidd is able to summon his sword or lollipop to his hand at any time.

Duplication

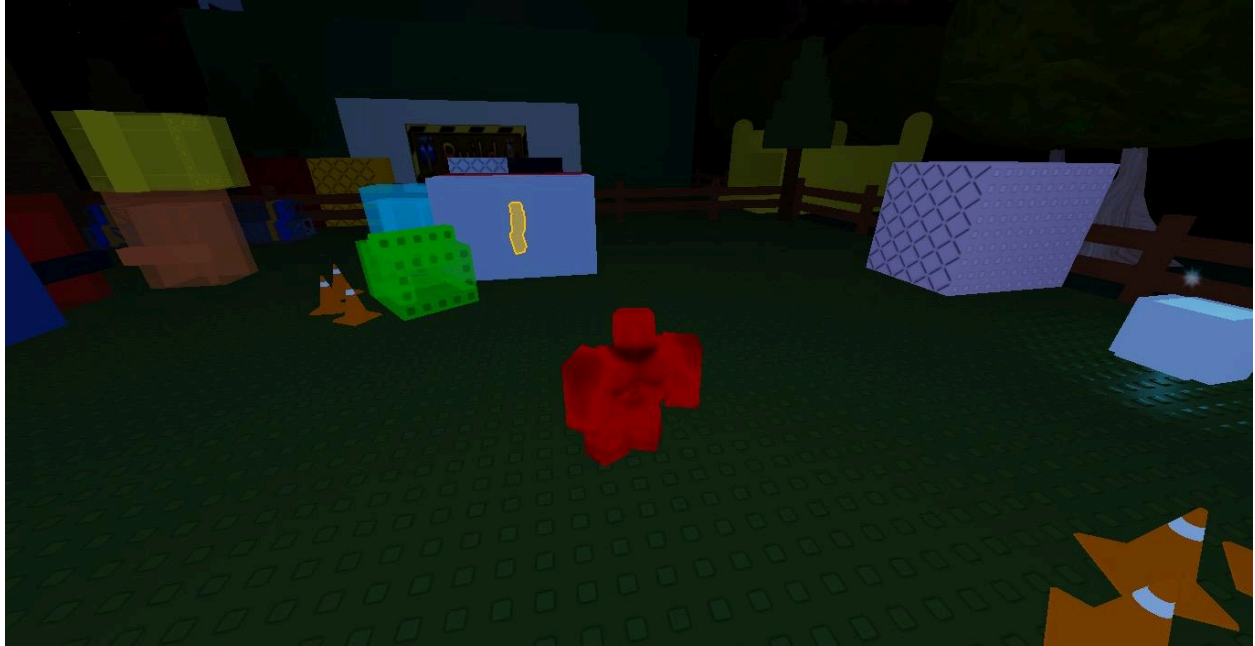

C00lkidd is able to create clones of himself from nothing to chase survivors. Unlike his c00lGUI clones, these are capable of attacking and lighting people on fire

Corrupt Nature

C00lkidd is able to create a gray brick to throw at survivors. This projectile can pass through walls and will highlight a survivor though walls and slow them down if it hits them

Extrasensory perception

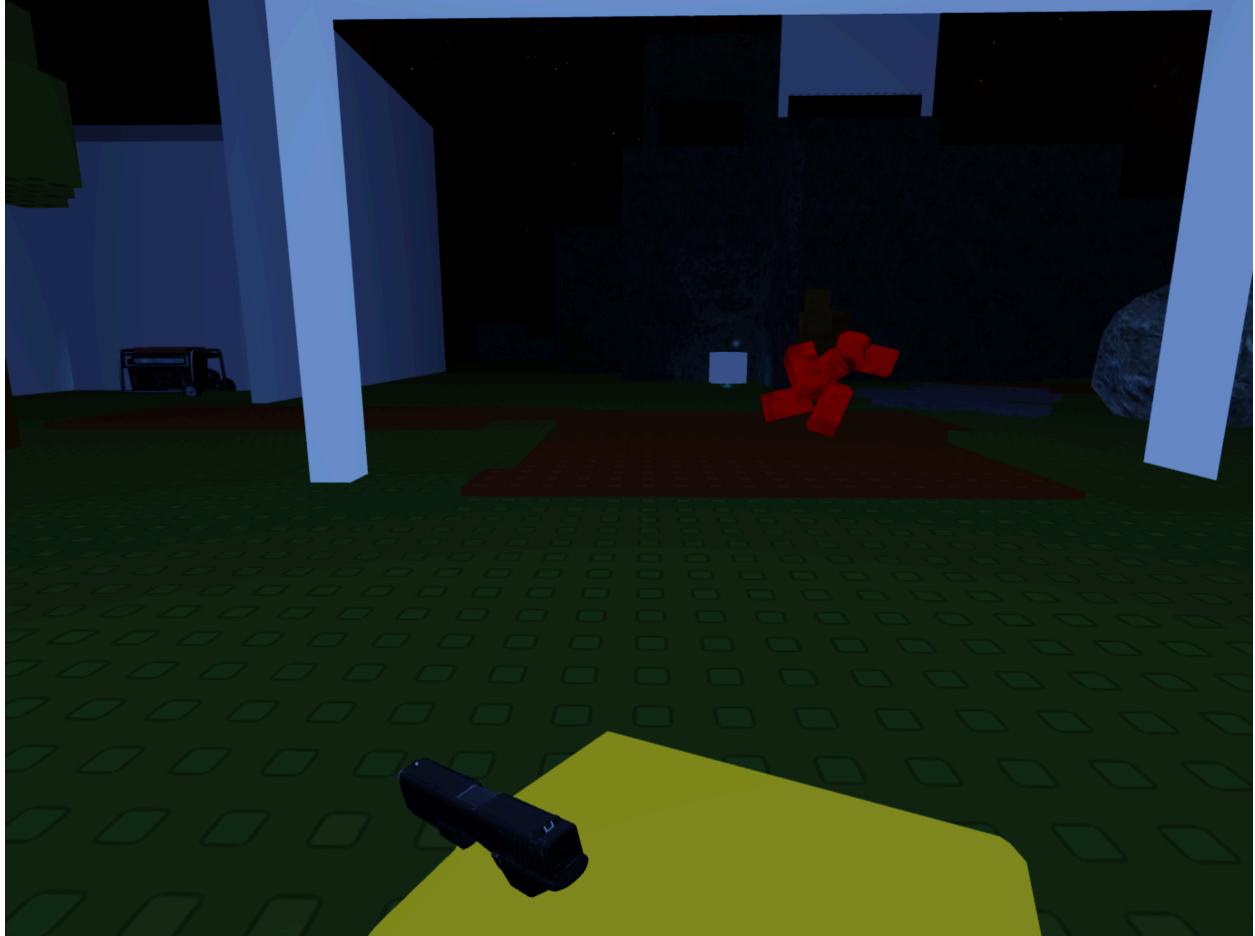

When there is only one survivor left alive C00lkidd will be able to see them through walls. This also happens if they are lit ablaze or hit by corrupt nature

Empowerment

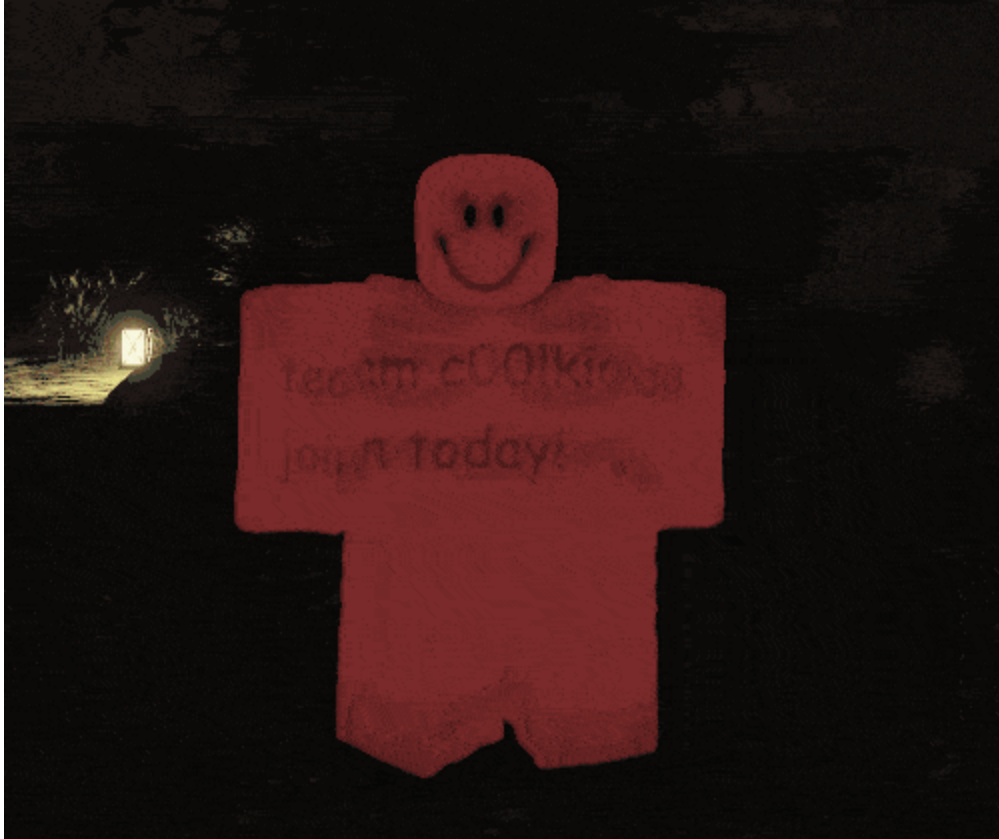

When no survivors are around, C00lkidd can run without losing stamina

Stat enhancement

Coolkidds "walkspeed override" is seemingly named this because he is manipulating the code to boost his walk speed

Levitation

While using walkspeed override, C00lkidd levitates above the ground

Necromancy

In the C00lkidd “cupcakes” skin, C00lkidd is able to bring back survivors as his minions to attack his foes

Immortality

It has been stated that The Spectre will revive both survivors and killers from the grave after a round of forsaken is over

Creation

It has been stated that C00lkidd created the C00l Carnival forsaken map, including a ferris wheel, a totally inconspicuous van and an exhibit containing a statue of a drakobloxxer

Resistances

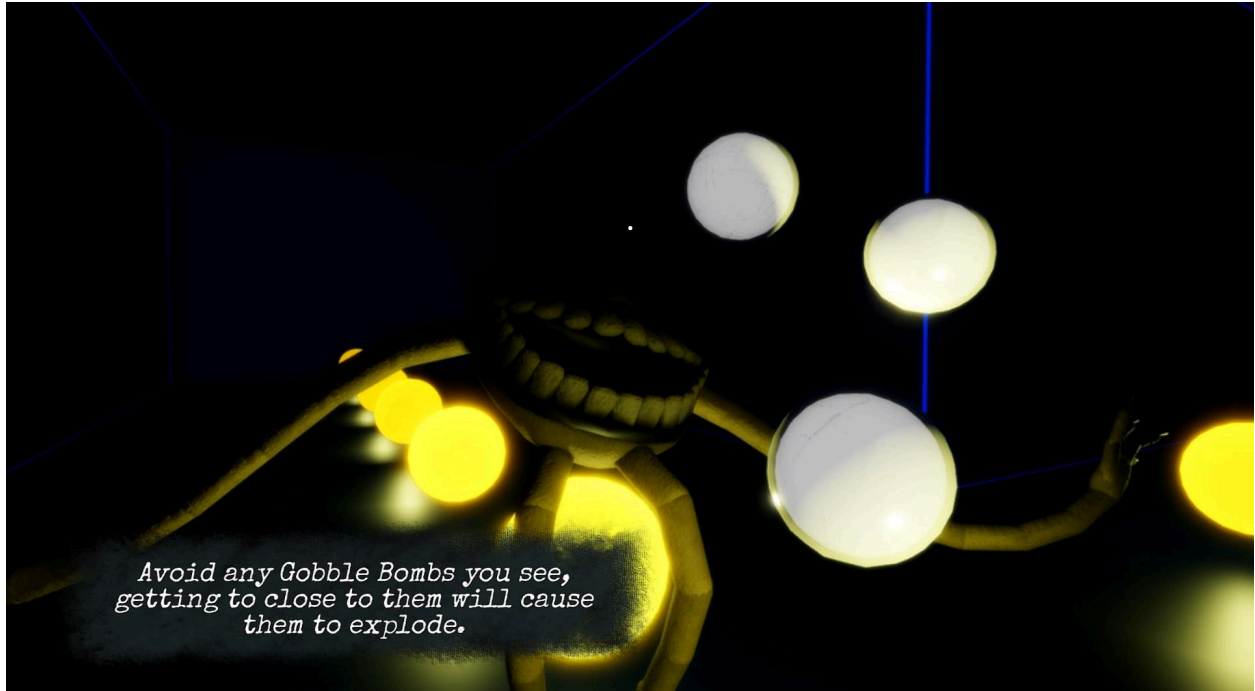

join team c00lkidd today!

C00lkidd has been shown to be able to resist effects such as

- Matter erasure (is unaffected by the “subspace tripmine”, which rips a tear in reality to spark it's explosion, functioning similarly to an antimatter bomb)
- Pain (it has been stated that under the specteres influence C00lkidd cannot feel pain, but rather feels frustration)

WYST

Gobble Bombs

WYST has the ability to create and fire round bouncy explosives from his mouth

Enhanced Senses + extrasensory perception

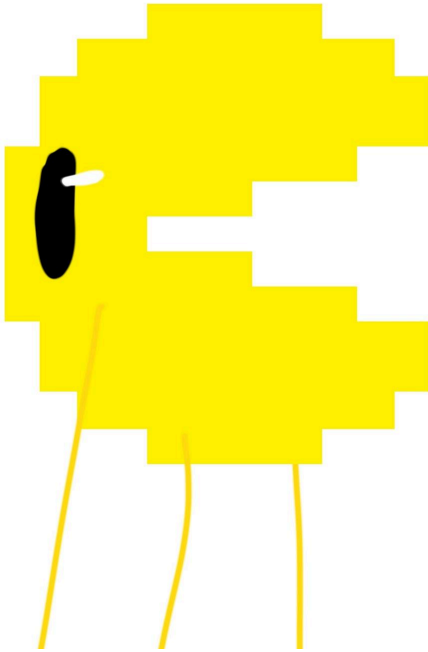

WYST is able to see clearly in the dark, can smell souls and can see survivors through walls and when they are the last one remaining or when he is in frenzy. Additionally, WYST has been stated to be capable of surviving in outer space

Empowerment

WYST is granted infinite stamina when there are no survivors nearby

Fear Inducement

When a survivor is near WYST, their heart will beat faster, even if they have no way of sensing WYST

4th wall breaks

A DELICIOUS SNACK INDEED!!

HEHEHE.. BOOM GOES THE MORSEL!!

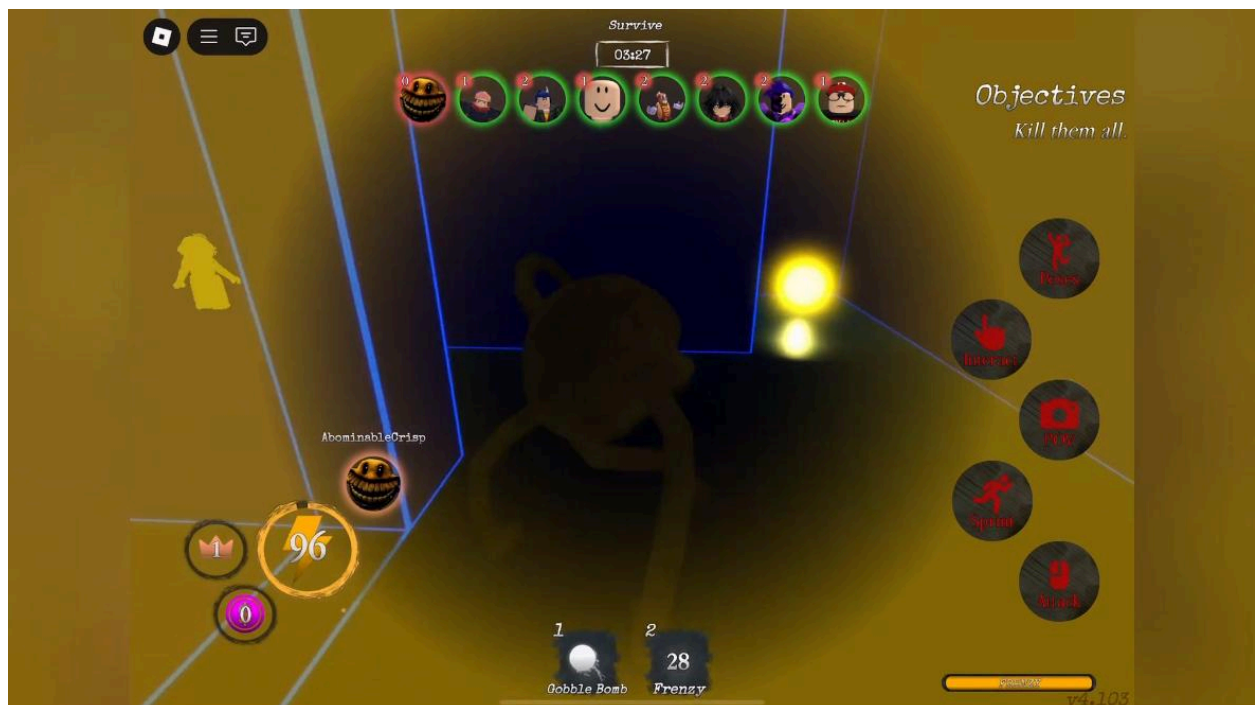

WYST will speak to you after killing you

Intangibility / phasing

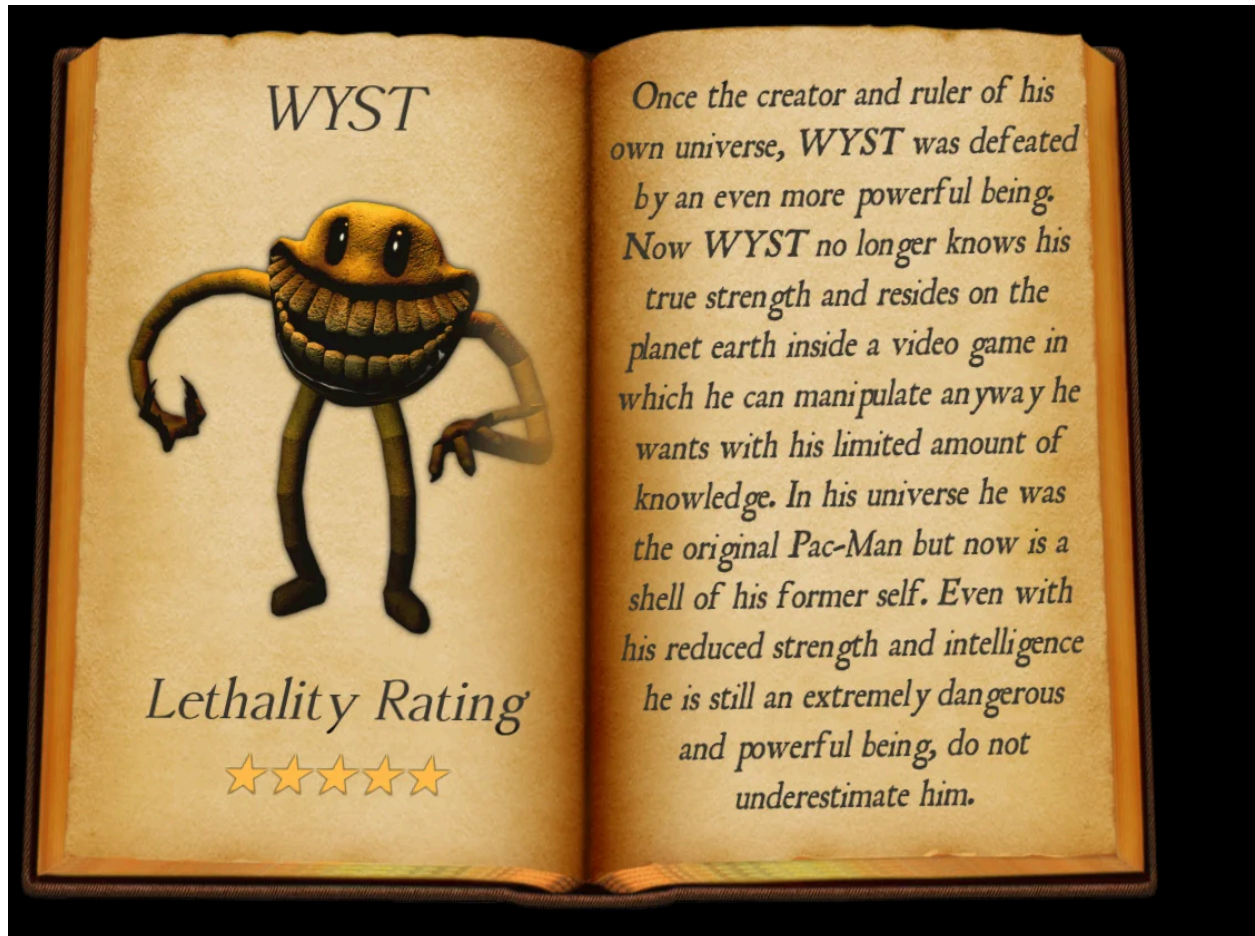

In his intro, WYST is seen phasing out of the ground

Berserker mode / statistics manipulation

WYST is able to enter a "frenzy" in which he will see survivors through walls, become faster in both run speed and attack speed and will fire more bombs. Additionally, he can extend this state by getting a kill

Creation + Reality manipulation

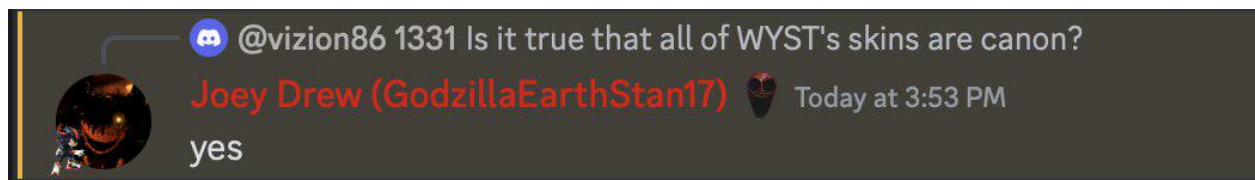

In his bestiary entry, it is stated that within his pac-man world he is able to shape and warp reality as he pleases within his copy of pac-man, however outside of his domain this power is far more limited due to his low IQ. it is also stated that he had previously created an entire universe, and while he most likely cannot create on this scale still, its safe to say he has some level of creation

Spatial manipulation

In his pac-man world, once you reach the end of the map you can enter gates that send you back to the other side of the map

Shapeshifting

WYST is able to warp his shape and appearance however he pleases, such as stretching his limbs, increasing his size, warping his features and even changing what he is made of such as turning his body into an arcade machine or pure diamond. He was also stated to be able to turn into a cow... for some reason

Creation / cloning

dreamuur recently gave us wyst lore
he can create life and take forms of
whatever he wants

WYST has been stated to be able to create life, and has been stated to be capable of making clones of himself, and can even make these clones look however he wants

Teleportation

 **Eggsterminter 1472** 🍷 7/18/24, 9:53 PM

W.Y.S.T Ability chart

Teleportation

- WYST can teleport others into his arcade game.
- Teleporting others away from him.
- And finally teleporting others to him.

WYST has been stated to be capable of teleporting himself or others to wherever he pleases

BFR

WYST is capable of transporting others and himself to his arcade game world

Portal Creation

WYST is able to open portals which he can use for transport (which is kinda redundant when he can teleport but i'm not gonna argue with the big hungry circle)

Immortality Bypass

WYST is able to easily kill survivors by biting them in half, despite survivors in Pillar chase having a victory screen where they fall apart, implying that simply being dismembered is something a survivor can usually shrug off

Immortality

Limb loss

- He's able to remove his limbs, and increase his head size. (Pac-man reference)
- He's also able to reattach his limbs and make himself big or small.

([image origin](#))

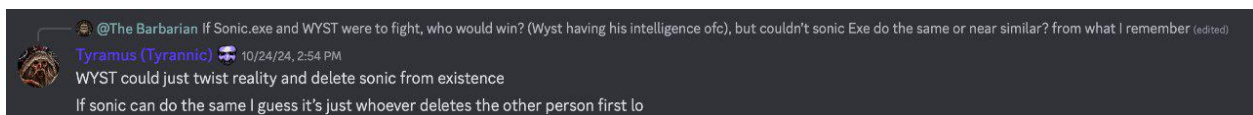

WYST is in many ways immortal. While it is unclear exactly how old he is, he has at least existed since the dawn of a universe, given that he himself created one. He's also survived having his face blown off, a spear stabbed into him, his limbs being removed and having his skull damaged

Light Manipulation

In his RGB skin, WYST has several parts of his body that are glowing in multicolour

Existence Erasure

When asked who would win between PCX and WYST, it was stated that WYST would simply “twist reality and delete sonic from existence”

Immersion and Technology Manipulation

WYST was able to enter the universe within a Pac-Man arcade cabinet upon his arrival on earth, and was then able to warp reality in this universe as he pleases

POSSIBLE spirit physiology

Whilst this is unclear, WYST has a skin where he turns into the Pac-Man ghost, and a skin that turns him into the Smile Ghost from Innume. While it's unclear as to if he is actually becoming a ghost in these skins, i felt it was worth mentioning as a possibility

Sound Manipulation

Voice Mimicking

- As the name suggests, he can mimic the voices of people.

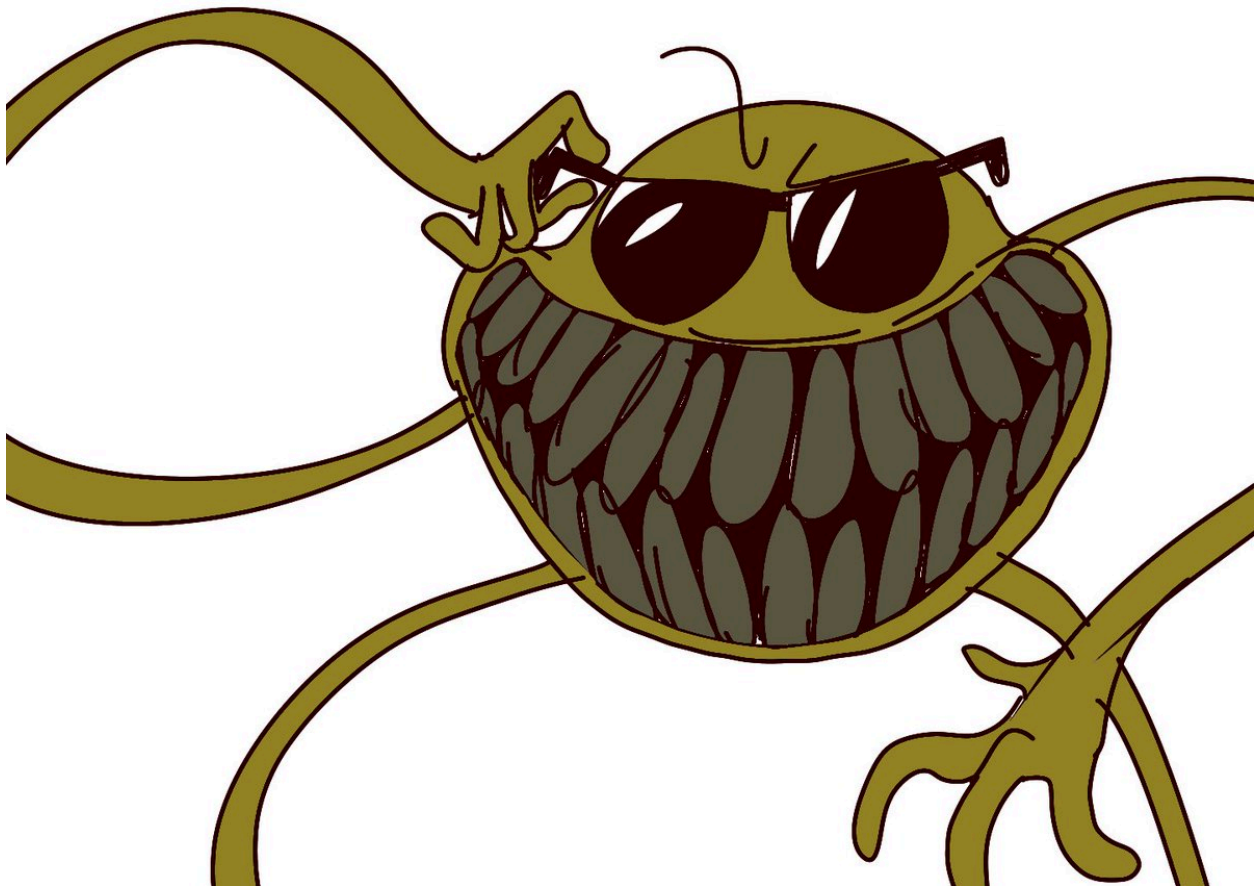

WYST has been stated to be capable of mimicking and replicating voices, additionally, in his weird gift skin WYST makes jingling sounds

Pro Gaming Skills

- WYST is a pro gamer. When he isn't gaming he is killing people.

According to the Pillar Chase 2 Wiki, WYST apparently has remarkable gaming skills when he's not gobbling up survivors... is this useful? Nah, but i needed to bring it up SOMEWHERE in this blog

Resistances

([image origin](#))

WYST in pillar chase has been shown to resist a vast variety of effects, these include

- Time manipulation (in the “ward” map, it is stated by the spirits that time itself has stopped, yet WYST is able to resume business as usual)
- Broadway force (WYST is completely immune to uncle samsonites dance mechanic, which usually makes a survivor drop what they’re doing and dance)
- Paralysis (is unaffected by the presence of the fogborn, who is stated to make anyone unable to run or fight merely by being near someone)
- Radiation Manipulation (can enter niloticus’ pools of radiation with no adverse effects)

- Perceptions manipulation (usually Nilos pools cause anyone who enters them to see static, however WYST does not suffer from this)
- Statistics Manipulation (is unaffected by Inkfells pools of ink, which typically slow those who enter down drastically)
- Extrasensory Perception (WYST is undetectable to abilities that should reveal him, such as Nilos pools, Inkfells pools or the strikens custard)
- Enhanced senses (cannot be detected by EXEs enhanced smell)
- Fear manipulation (cannot be affected by another monsters fear aura)
- Poison manipulation (is unaffected by the stricken sickness)
- Sound manipulation (is able to shrug off Rosemary's demonic Shriek with zero effect on him, which is usually loud enough to rupture eardrums and blind survivors)

Forms

C00lkidd

(since C00lkidd cannot shapeshift these forms are only alternate outfits, some may show him using different equipment or abilities)

Whimsical

Look upon his whimsy in despair! With this outfit he uses his large lollipop to attack instead of his sword

Original

How C00lkidd appeared before the specter took him and made him the strange fleshy monster he now is.

Cultist

C00lkidd is seen here to be wearing occult robes, for no real reason... I guess he felt like Two Time or something.

P00lkidd

Of all the games for C00lkidd to play I don't think anyone expected pool to be on that list, but here he is! He is shown with a pool stick in the art for this skin, and so it can be assumed he has one in his list of weapons

Sch00lkidd

~~what's your major hahaha~~ in this form C00lkidd is in a typical “nerd” outfit, and carries several books. His sword is also replaced by a wooden sword

Dapper

An outfit for when you want to put the c00l in C00lkidd, something about it tells me he misses the quiet

Cool3r

MLG 4 L1F3!!!! This skin shows C00lkidd in his c00lest state, he even has a skateboard and sunglasses to prove it! I wonder what music he's got playing in those headphones

Cosplayer

The little guy loves his new friends so much he's made costumes of them! They may only be cardboard but he tried his hardest! He even made cardboard versions of their weapons, like 1x's sword, jason's machete and john does... arm thing.

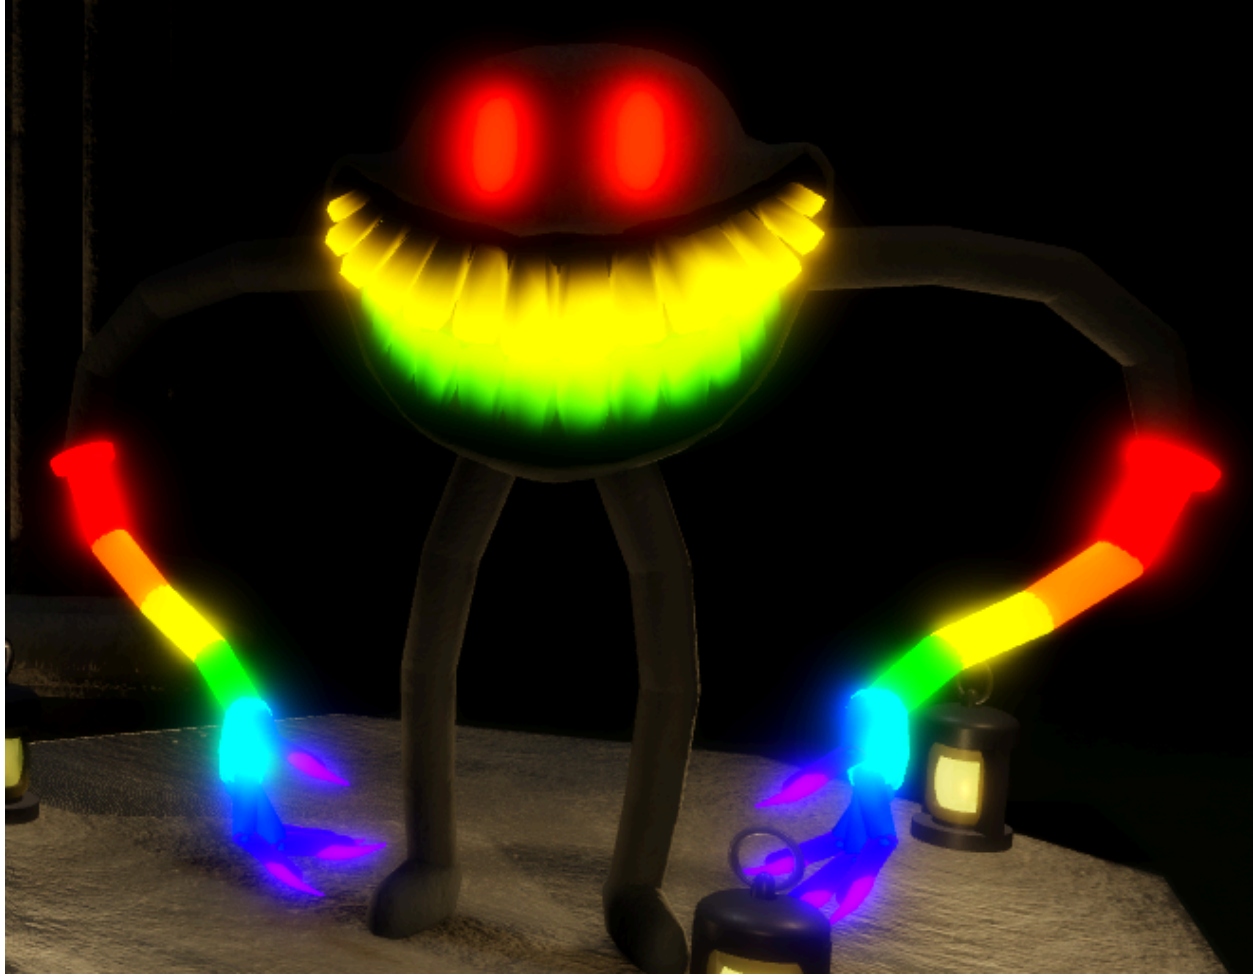

Cupcakes

In reference to the Cupcakes creepypasta, C00lkidd is adorned with parts of the survivors (clothing or flesh) and has an even wider grin. He demonstrates the ability to bring survivors back to life as zombies to fight for him, And swaps his usual gray bricks for cakes.

WYST

RGB

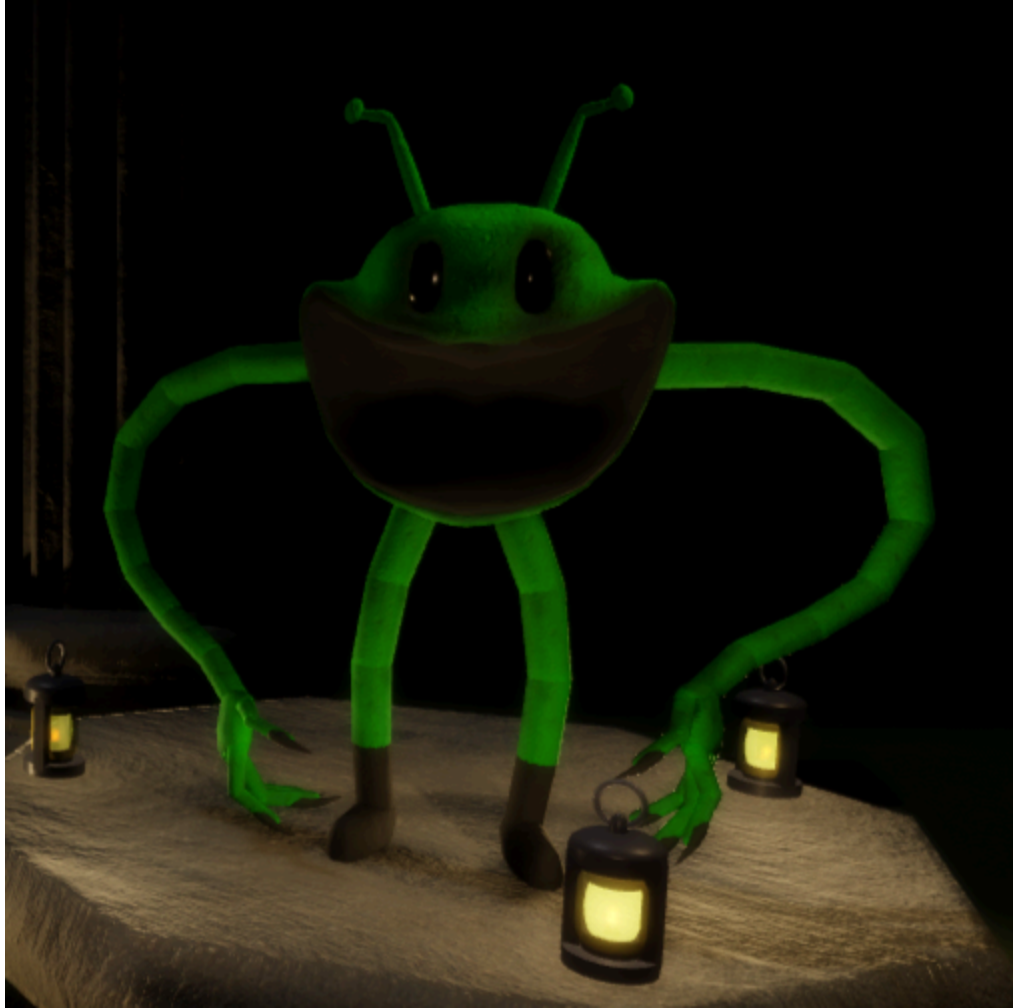

In this form WYST is able to emit multicoloured lights... he's also now addicted to G-Fuel

Offbrand

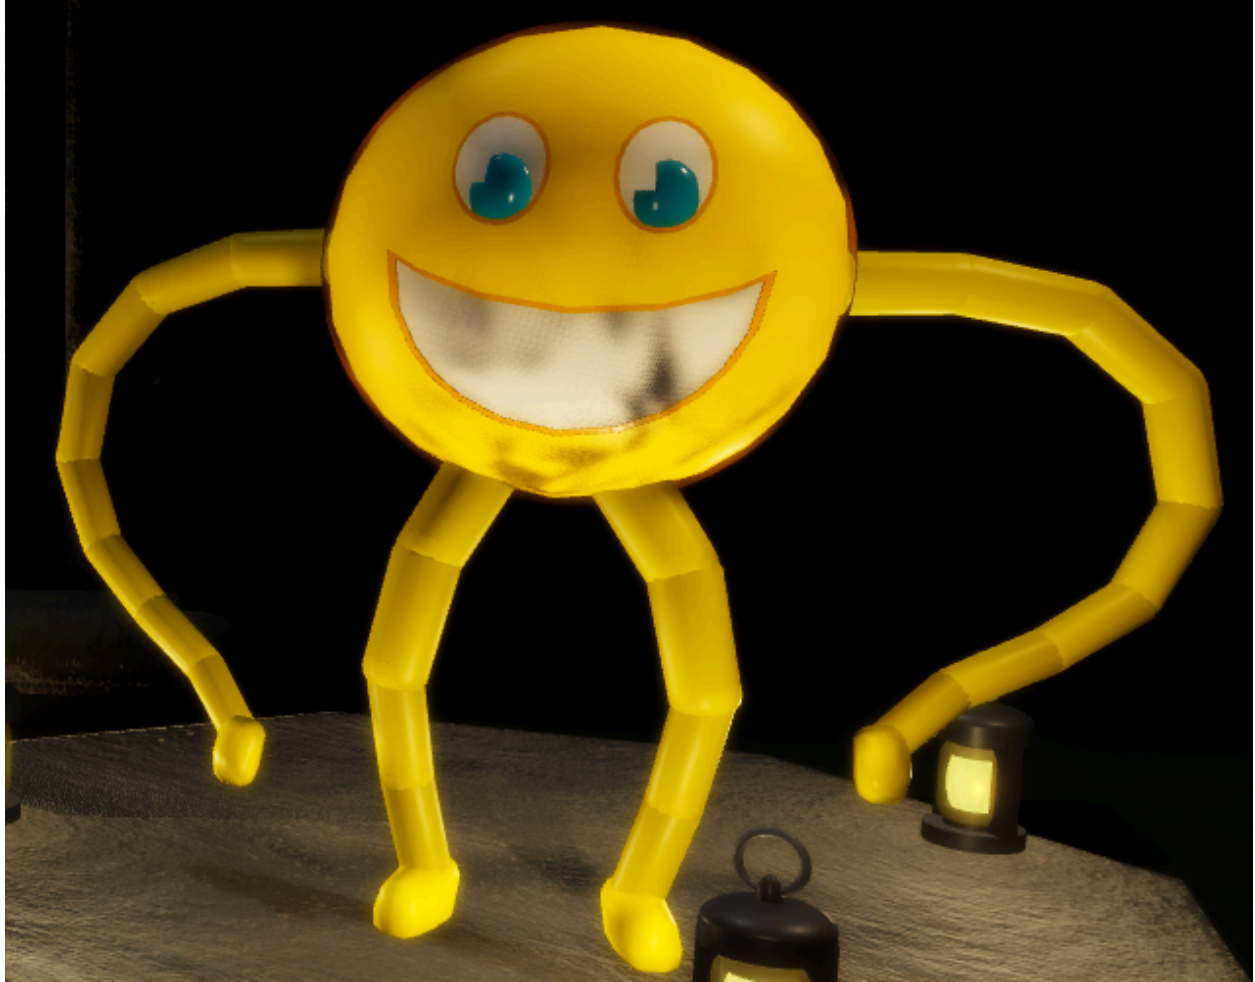

They say imitation is the best form of flattery, and it seems WYST was so flattered by his own imitation that he imitated his bootleg plush!

Gnorpy

△#}Φ I} △^ △//Ψ^ ^οΔ! Φ⊥△Φ} △≡οπΦ IΦ

Smile Ghost

WYST becomes the smile ghost from inyumme, who he is also canonically married to! Their feats will be discussed in the scaling section

False

Not enough S in your WYST? Well now he's smiling even wider!

Mr Teethy

Oh great look at what you did! Was false not enough for you? Now he's just a WST!

Cartoony

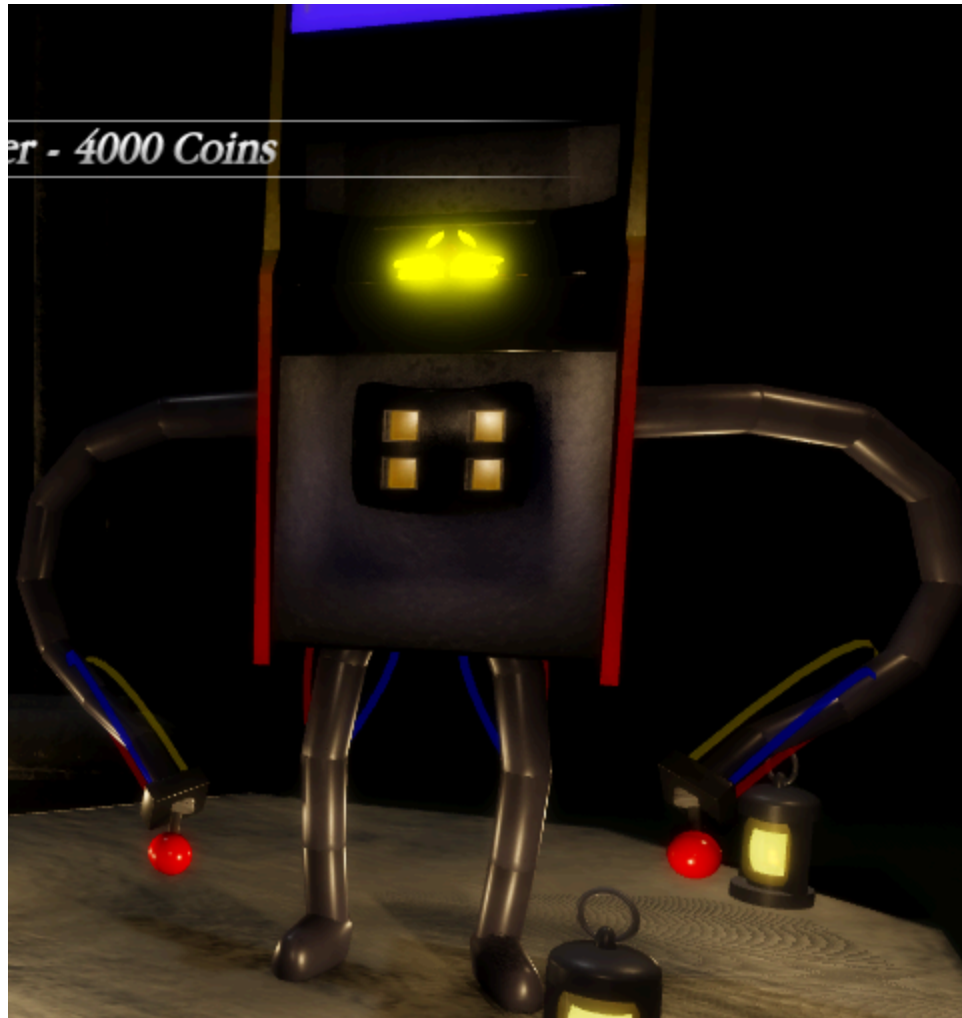

Inspired by rubber hose animation, WYST decides to put on some clothes (though they're probably just his skin). This is most likely in reference to another mascot themed reality warping entity who toys with his victims before eating them that you may know...

Retro Ghost

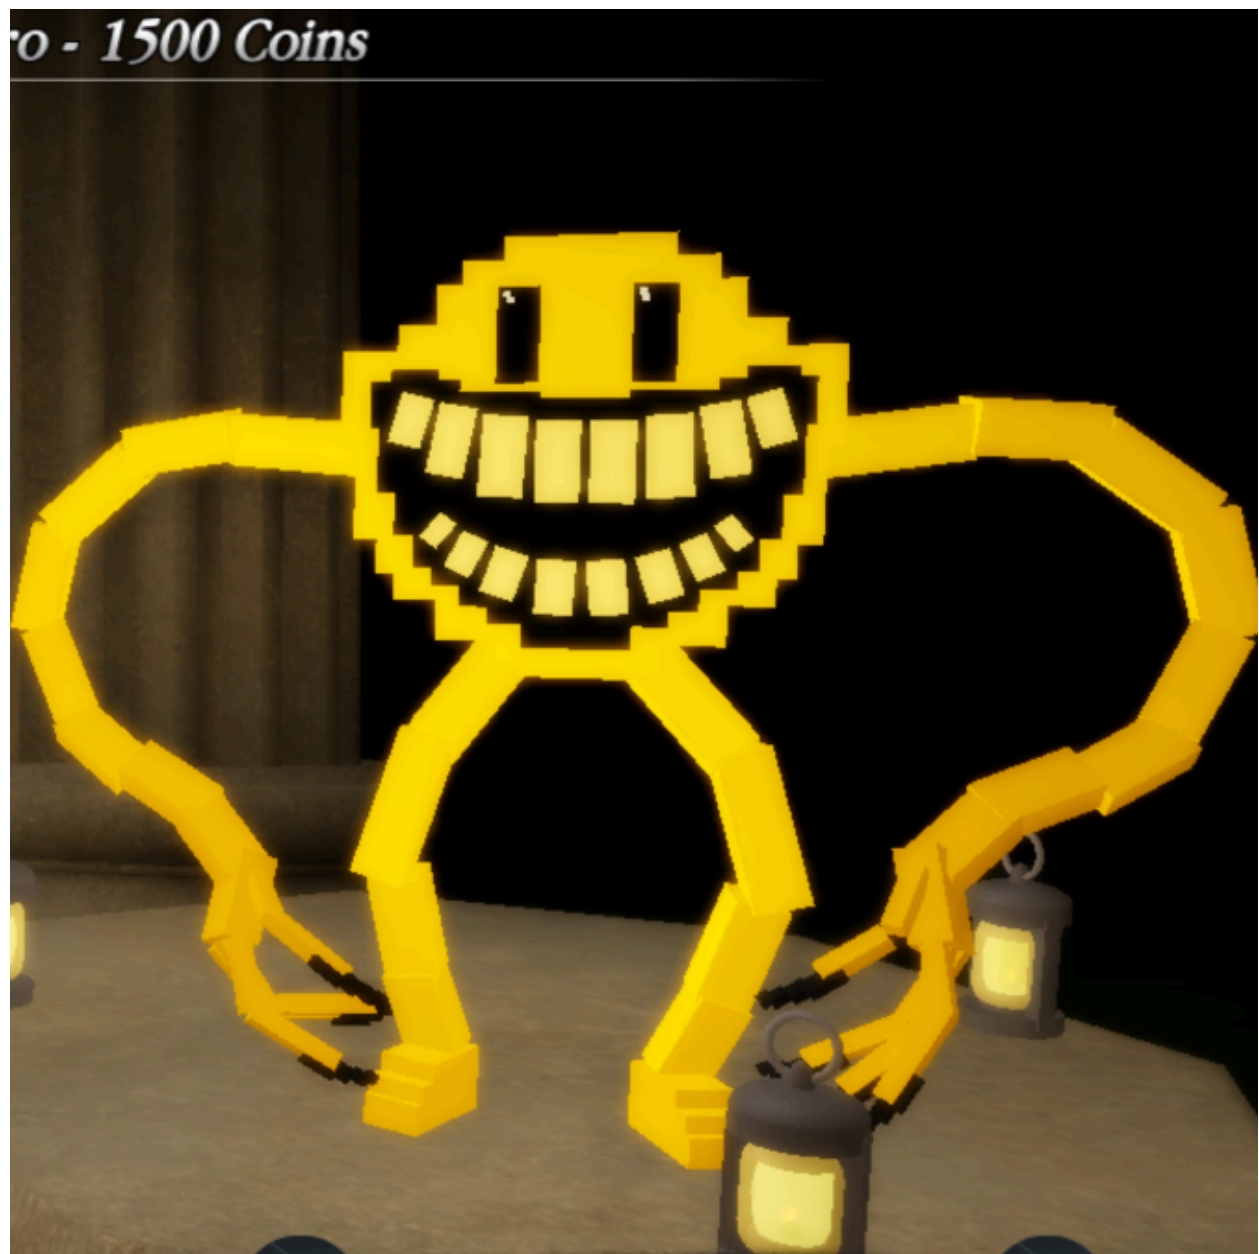

In this form WYST shapeshifts his head to look like the iconic Pac-Man character...
TURN-TO-BLUE. It's possible that they become a ghost by doing this but it's unclear

Pelleter

In this form WYST decides being Pac-Man wasn't enough, and so decides to become the entire fucking arcade cabinet. This form should transform his body into pure metal

Retro

So Retro!!!!

Idiot

From namesake alone you might assume he hasn't transformed at all. However this form is a reference to an iconic computer virus. Particle effects follow his every move in this form

Providence

!EYB dlog yub margoloh a si esrevinu eht ,noisulli na si ytilaer ,rebmemer .mrof txen eht ot og ot
emit yawyna !oot elttab htaed no neeb sohw enO .repraw ytilaer wolley suoiron ton rehtona fo
ecneraepa eht sekot TSYW mrof siht nI

Fowl

In this disturbing form WYST is seen with his face blown off, weapons stabbed into him and even having a blade replacing one of his arms. It's stated that this is the result of one of his victims fighting back.

Weird Gift

Not since the nightmare before christmas have we seen a christmas present more dedicated to killing you! In this form WYST becomes a present containing a skeletal hand, a plush of Fuwatti (or just the real deal) and your upcoming death. He also makes jingle bell sounds as he runs

Silver

As you can guess from its namesake, WYST becomes entirely made of silver. Truly a werewolves worst nightmare

Gold

WYST becomes entirely made of gold, though judging by the look in his eyes i'm not sure he's happy with that

Diamond

In this form WYST becomes entirely made of diamond and gains several horns. They say your pupils dilate when you see something you love, so i feel it's obvious that WYST loves diamonds

Stompocalypse

An upcoming form WYST can take in the future “Ultra M” update, WYST becomes a mutated Thwomp with spikes all over. It’s said that when infinite lays awake at night, this is what he sees.

Baldi

“God is dead. God remains dead. And we have killed him. How shall we comfort ourselves, the murderers of all murderers? What was holiest and mightiest of all that the world has yet owned has bled to death under our knives: who will wipe this blood off us? What water is there for us to clean ourselves? What festivals of atonement, what sacred games shall we have to invent? Is

not the greatness of this deed too great for us? Must we ourselves not become gods simply to appear worthy of it?"

-Nietzsche

TDHT

WYSTs true form, the one he took before losing that fight. Little is known other than its name (That Disgusting Happy Thing) though it's safe to say that if WYST was ever somehow restored to this form, he would once again be at his full potential.

Feats

C00lkidd

Overall

- Is shown to be able to fight on par with a military soldier
- Has successfully grieved many servers in his time as a hacker
- Is C00ler than you
- Has served as a killer in many rounds of forsaken

Power

- Is shown to be able to break bones and snap necks with his bare hands
- Is able to break one of buildermans turrets with his bare hands (88224.6 kilojoules / small building level)
- With the c00lGUI is shown to be able to delete celestial bodies like the sun and moon from the sky
- Can potentially distort reality on a universal scale

Speed

- Is fast enough to chase and outpace survivors who are running for their lives near constantly, assuming they get breaks in-between rounds of forsaken

Durability

- Is capable of tanking gunshots and sword attacks with minimal effect
- Is able to survive a subspace tripmine at point blank (Building level)

WYST

Overall

- Has served in many rounds as a killer in Pillar Chase 2
- Created and ruled over an entire universe
- Corrupted a pac-man arcade cabinet to turn it into his home
- Somehow eats lobbies of survivors and never gets full

Power

- Is able to break bones with claws
- Can bite a survivor in half
- Uses Gobble Bombs (3.188705640726577 Tons of TNT)
- Created an entire universe

Speed

- Is able to keep up with survivors who can outpace MX who was shown to jump out of a bottomless pit in seconds (though he hadn't been falling for long)

Durability

- Survived having his face blown off
- Survived being slammed into the earth's surface from outer space (city level. Anywhere from 1 megaton of TNT to 6.3 megatons of TNT)

Scaling

C00lkidd

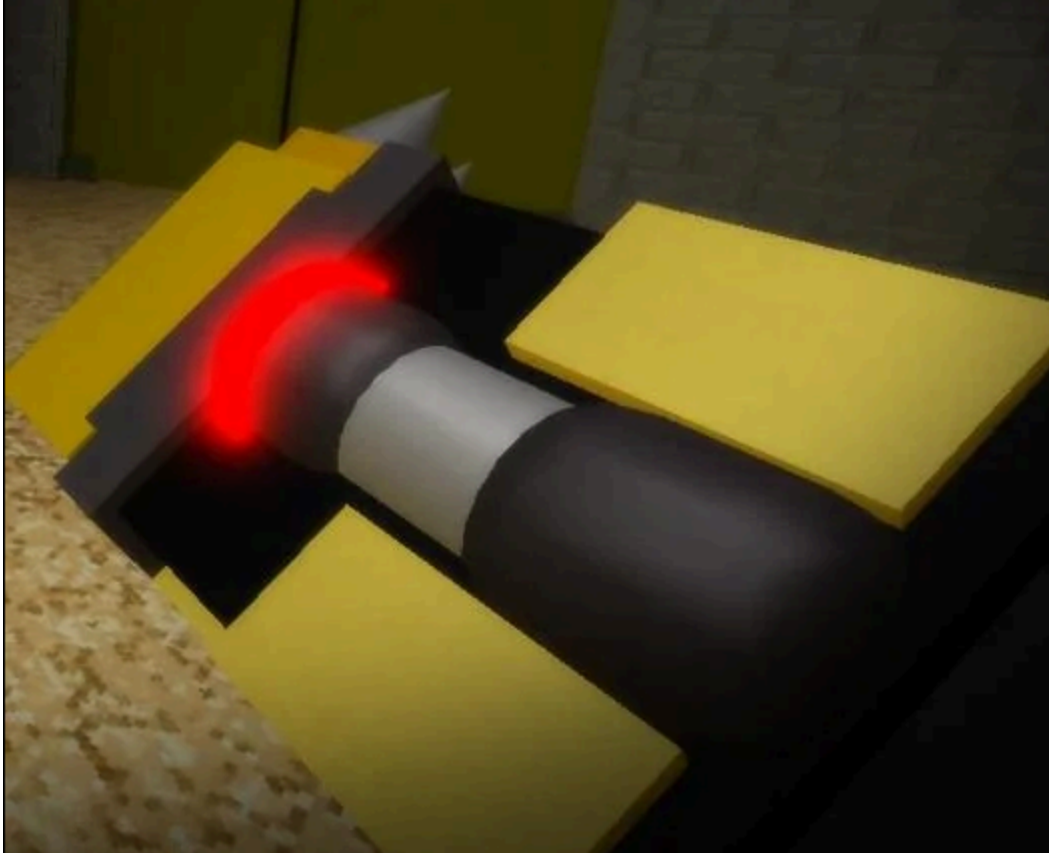

The Last Guest

C00lkidd is routinely able to match and kill Guest 1337 who [has routinely been shown to be fast enough to dodge bullets](#) and who is shown to not only have military combat training, but skill great enough to battle multiple foes at once

WYST

Overwatch

Survivors in pillar chase have access to doomfists gauntlet, and can use it to attack the killer. In overwatch doomfists gauntlet is capable of toppling buildings, meaning WYST can take hits from a building level weapon with no level of damage taken (6.623914592423518 Tons of TNT **Large Building level+**) and additionally is shown to have a high attack speed that WYST is capable of scaling above (1344.00000054 m/s **Supersonic+**)

Inyumme

While monsters rarely interact with one another in pillar chase, Valem often talks to the killers, usually to belittle them or make remarks about them. However for WYST he is interested in his power, seeing great potential in him despite him being in a weakened state. Meaning he likely exceeds every other monster in the game, as he is the only one valem is interested in due to their power (additionally, valem should be a reliable source as he is a high ranking demon in hell, and knows things that would require him to have existed since the universe's beginning and potentially before then, as well as having an account on every other monster). This means he can

- Scale above an elder vita mimic, which are considered the most deadly and efficient predators on earth
- Scale above the Fogborn who can traverse around the map as a bolt of lightning (hypersonic)
- Scale above MX who has been shown to be capable of crushing human bodies in a single stomp
- Scale above the stricken who in their tink tank form can rip chunks of rock out of the ground to throw at survivors (475.84 Megajoules **Small Building level**)
- Scale above Niloticus who has been stated to be unkillable by human weapons (Large Town Level)
- Scale above EXE who created and maintains a solar eclipse (star level)
- Scale to PCX who created a pocket reality that contains a sun (star level)
- Scale above Fuwatti who once ran so fast that they travelled back in time (FTL)
- Can potentially scale to Uncle Samsonite who created a pocket dimension that mirrors our reality (universal)
 - Additionally, can scale to uncle samsonite in speed who pulled someone across his pocket dimension in seconds, which is at minimum the size of earth (MFTL)
- Can potentially scale to 2011x (who is a PCX skin) who warps reality on a universal scale

Weaknesses

C00lkidd

C00lkidd has a very playful personality, and doesn't even register what he's doing as "fighting" or "killing", making it quite unlikely he'd intentionally go for a killing blow first. additionally , C00lkidd has never fought somebody on his level before, only survivors who, while strong, do not fight anywhere near his level due to their lack of abilities

WYST

WYST has an incredibly low IQ. this often times means that he's not able to use his toolkit to his fullest extent, such is the reason as to why he only warps reality within his own domain, while his abilities are innate, his memory on how to use them is foggy, imagine trying to pilot a tank without knowing what the buttons do. The buttons are all there, but you won't know which ones to press and what they do. Additionally, while WYST has challenged a stronger opponent before, he lost the fight and his memory, meaning its not likely he remembers how to fight someone on his level

~~also very sweepable legs... very DROPkickable legs~~

Before the verdict... (part 1)

Isn't WYST meant to be weak now?

- According to Blade from some tierlists he made:
 - WYST is ugly as hell.
 - WYST would steal candy from a baby without understanding why its bad.
 - WYST kinda stinks.
 - WYST can easily wipe out dozens of gorillas.
 - WYST is very dumb.
 - WYST outfits in Dress to Impress kinda sucks.
 - WYST would burn down his house from video game rage.
 - WYST is an amazing cook.

WYST is described as being weaker than before his fight. However this does not mean he is without his powers. WYST still has his godly powers, he's just too stupid to use them to the fullest potential. The only abilities he seems to be outright not able to use are his existence erasure and reality warping when outside of gobble run. However anything else should be fair game as it isn't described in the same way those two are. So while he is "weaker" it only actually prevents him from doing one and a half things

Is C00lkidd universal or not?

You've probably been noticing my usage of “potentially” when talking about C00lkidds universal stuff, and that's because it's largely interpretational. C00lkidds universal scaling comes from him being able to hack entire game servers. Within the cosmology of forsaken, robloxia is a multiverse of different games with their own unique timelines. And the concept of a game server would be a copy of a game filled with different players, which (in my eyes) would make game servers akin to timelines. However this whole thing is messy and i'm not a great scaler so while i'll be placing c00lkidd at universal, you can come to your own conclusions

One (sorta) last thing...

Both of these games are in their infancy, so everything in this blog is subject to change. But it also means these games, like any growing thing, need support! And there's no better support for games than recognition. These games are a blast and (while similar) offer different and fresh experiences for survivors. Forsaken is a team based strategy where you have to band together and use the tools at your disposal to protect each other and throw a wrench in the killers plans, while Pillar Chase 2 is a Chaotic scramble where you have to complete a set of tasks while avoiding the killer and relying on your own skill to survive. They Are both unique and fun, and they got me (somebody who used to think roblox was full of nothing but slop games) into two great communities. So give them a try! They're both free, after all

Verdicts

To decide on a verdict for this match we will be splitting this into 4 different categories. Stats, which goes over (you guessed it) all of the stats for each character. Skill, which goes over their combat skill, skill with abilities and experience. Powerset, which goes over their hax weapons and resistances, and Misc, which goes over other factors like intelligence

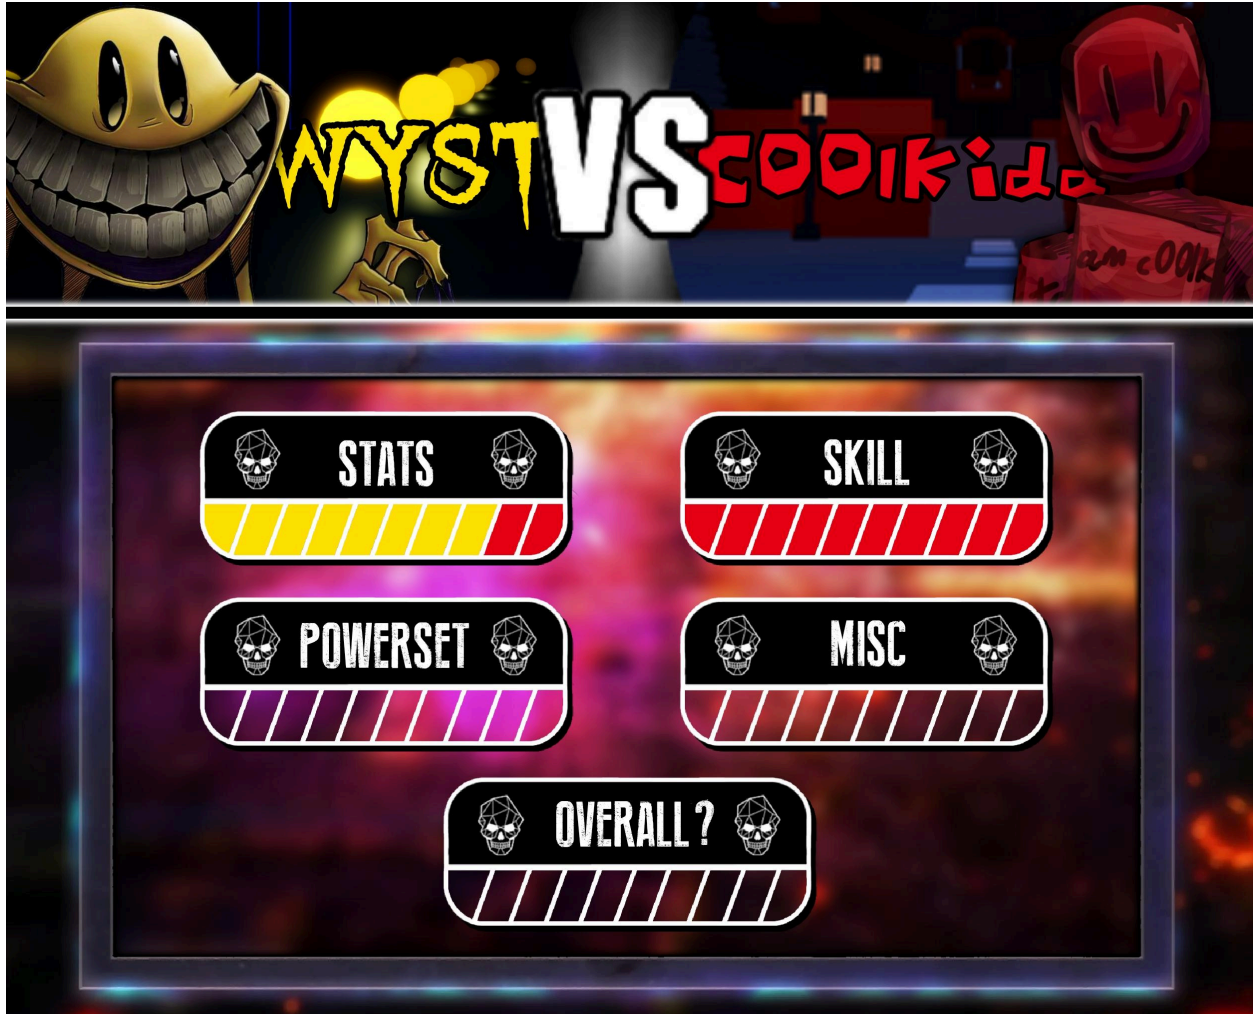

Stats

Going over their stats, both of them in terms of physical attack potency reach around building level, however COOLKID is only small building level, meanwhile WYST scales to MX, who left an entire castle in ruin which should overall be a greater feat. COOLKID scales to his attack potency in durability meanwhile WYST gets to around city level due to being slammed into the earth's surface, meaning he takes durability. With speed, COOLKID scales to Guest, who was capable of dodging bullets, however WYST scales above characters like Fuwatti and Uncle Samsonite, who have both displayed faster than light / massively faster than light speeds. Finally both characters have displayed universal strength using their powers. So overall WYST takes stats.

Skill

In regards to skill, C00lkidd takes this category. He's been able to keep up with characters like Guest who have military combat training, as well as killing overall more competent survivors, while WYST hasn't really fought anyone either experienced or close to his level before. As for skill with abilities, WYST is notoriously inexperienced with using his powers, meanwhile C00lkidd is a notorious exploiter who's grieved many servers in his time. And even though WYST has existed for longer, C00lkidd takes the edge in experience for the same reasons.

Powerset

Looking at their powerset both have incredibly versatile toolkits, starting with what abilities they share both

- Can duplicate themselves as much as they like
- Have instant kills
- Have methods of BFR
- Can teleport
- Can buff their stamina infinitely
- Can see each other through extrasensory perception
- Can warp reality to their whim

However looking at individual advantages we know that while both WYST and C00lkidd can warp reality, WYST can only do so inside of his own pocket reality, while C00lkidd doesn't have this restriction.

C00lkidd might be able to equalise the speed gap through statistics manipulation, however in game using walkspeed override prevents C00lkidd from turning and leads him into bumping into walls, meaning that it most likely only increases his movement speed and not his reaction time. And WYST resists statistics manipulation, meaning that he wouldn't be slowed by Corrupt nature

Comparing their ranged options, Gobble Bombs are a far more potent ranged attack than Corrupt Nature. Not only are they stronger in damage but they're also far more versatile, as them being able to bounce off walls makes them unpredictable

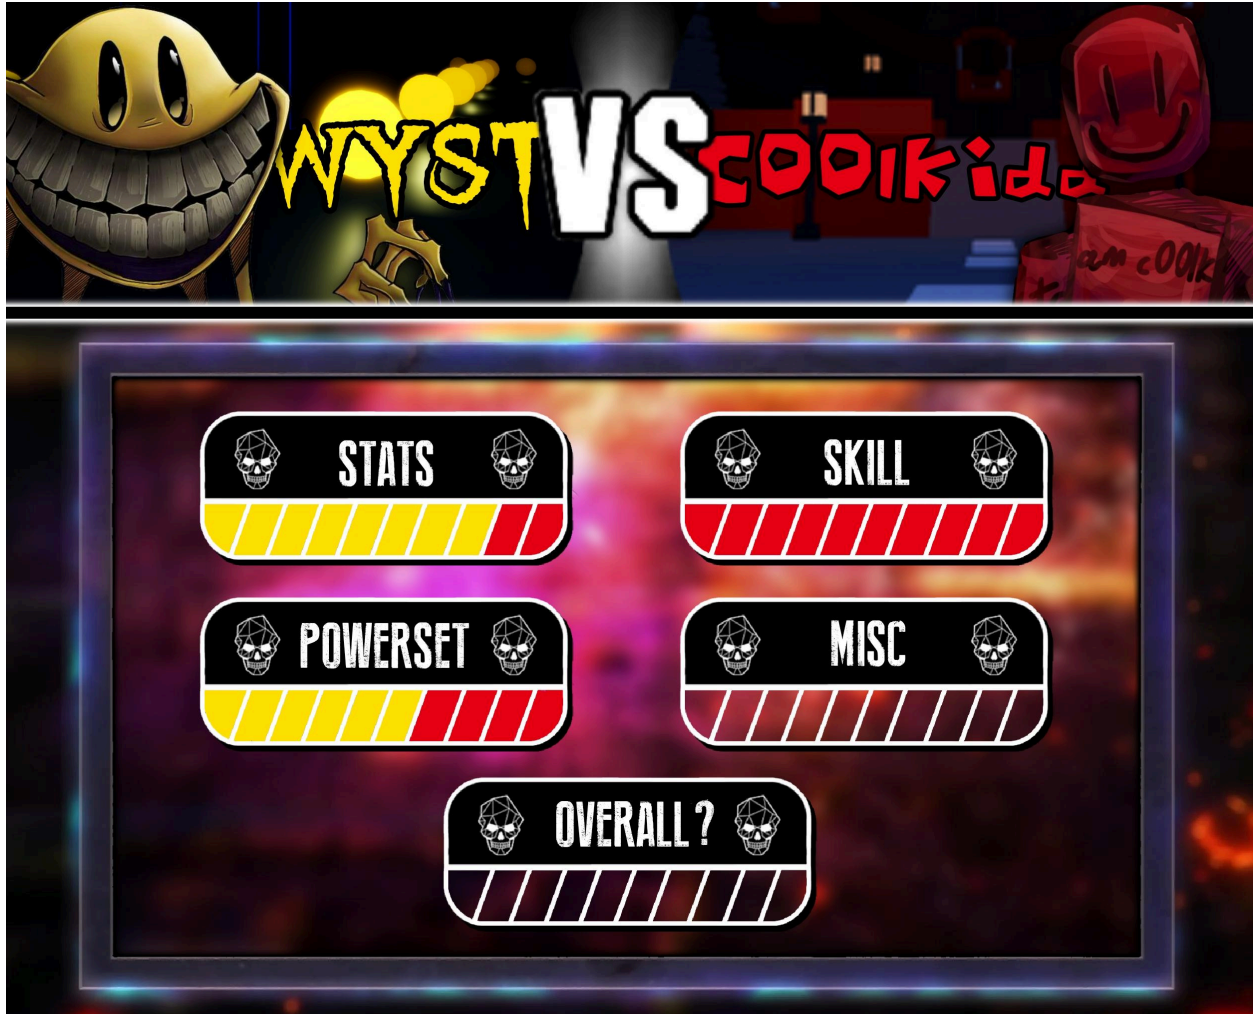

C00lkidd takes an edge against WYST with invisibility and the utilisation of clones, as this form of trickery should be able to easily throw WYST off, as while WYST can smell souls, we have no idea how precise this sense is, meaning hed most likely get confused.

While C00lkidd takes the advantage in weapons, none of his weapons give him a significant advantage beyond increasing his combat range to (somewhat) equalise the advantage WYST holds with his long arms

While C00lkidd has canonical respawns with the Spectre, these only apply once a "match" is finished, as if a killer dies the match is finished and everything is reset, meaning C00lkidd likely wouldn't be able to continue the fight

Finally, WYSTs ability to become intangible (and furthermore, possibly become a spirit) allows him to potentially avoid damage from C00lkidd

Putting this all together while they are largely evenly matched in powerset WYST overall takes the edge with high difficulty

Misc

Finally is the Misc section. This is largely here to cover stuff that i felt deserved its own little section

Both characters while having experience in their own regards are equally inexperienced with fighting opponents on their own level of power

Both have incredibly playful personalities, and even though neither would “hesitate” to kill their opponent per-say, neither is in any way likely to go for one of their instant kill options like death manipulation or existence erasure, however overall C00lkidd is mildly more likely to use his instant kills due to the fact he still knows **how** to use them, it's been stated that existence erasure is one of the few things WYST has completely forgotten how to do. So while it's not a likely option for either, C00lkidd does take the edge in that regard

Additionally, while C00lkidds necromancy does bring survivors back, masked zombie survivors in pillar chase do not drain WYSTs stamina when he's near them, meaning reanimated survivors likely wouldn't cause his stamina to drain

C00lkidd takes this category due to retaining a wincon, though they're mostly even in misc factors

Overall?

This match is fiendishly debatable, and comes down to the wire in multiple ways, however the winner can be decided based on two main factors, intelligence and skill. While it's true that WYST has better stats and abilities WYST simply isn't smart enough to properly capitalise on it. For example, C00lkidds clones would allow him to divert WYSTs attention if he tried to attack first. And would be capable of whittling down his durability or just killing him with death manipulation. And for abilities like his intangibility, that would require him to be skilled enough to know the timing on how to dodge attacks with it. And because of WYSTs signature lack of skill

with his abilities he'd be unable to strategize in the same way. So ultimately it's unlikely WYST would be capable of outmatching C00lkidd when he's using brute force and C00lkidd is using strategy. so summed up...

WYST

Advantages:

- Far superior stats physically
- Could resist C00lkidds stat manipulation against him
- Slightly better toolkit...

Ties:

- Equally inexperienced with fighting foes on their level
- Both share a large amount of abilities
- Both are extremely playful and likely wouldn't go for a killing blow first / go all out at first
- Neither could be outlasted due to their infinite stamina against one another
- Largely equal ability stats

Disadvantages:

- ... but isn't able to take full advantage of it due to his lack of knowledge surrounding his powers
- Is... not the brightest tool in the shed, and would likely fall for a lot of C00lkidds tricks
- Far less experienced in combat

"Do you Understand?" - Valem talking to WYST

C00lkidd

Advantages:

- Is leagues more experienced than WYST both in combat and use of powers
- Could easily trick WYST by using clones and invisibility
- Has abilities that could one shot WYST outright such as deletion and death manipulation
- Far more intelligent than WYST in general

Ties:

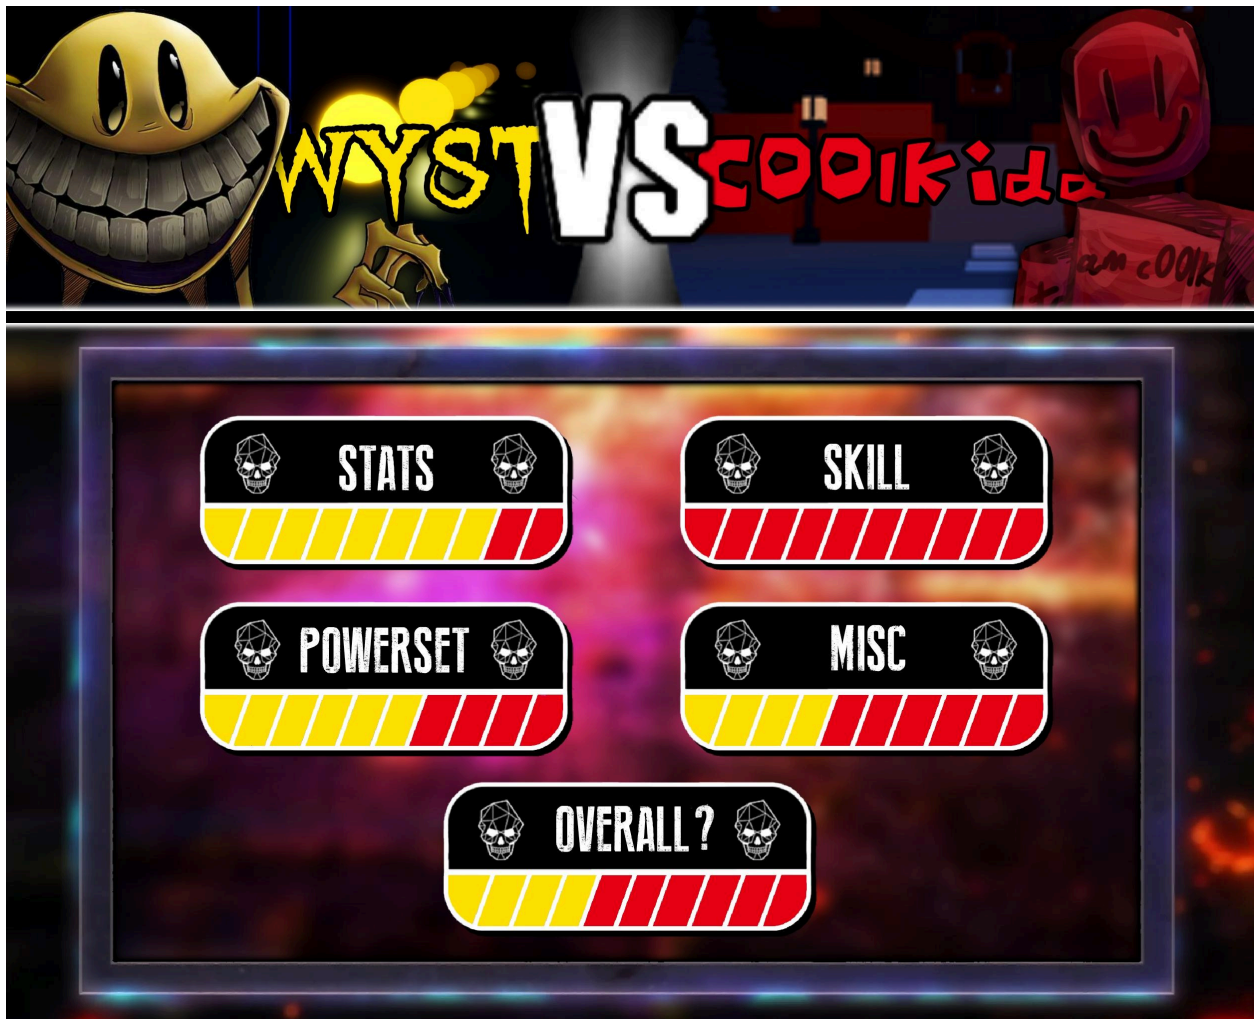

- Equally inexperienced with fighting foes on their level
- Both share a large amount of abilities
- Both are extremely playful and likely wouldn't go for a killing blow first / go all out at first
- Neither could be outlasted due to their infinite stamina against one another
- Largely equal ability stats

Disadvantages:

- Slightly worse toolkit
- Far worse stats physically

"You were strong, but not strong enough!" - C00lkidd

C00lkidd wins (HIGH DIFFICULTY)

Final Tally

C00lkidd (4) - salt path, ok university, metal leading, chemistry tasty

WYST (1) - me

And now... a word from our sponsors!
(aka messages from people who helped with the blog)

Salt Path

“This Death Battle Blog is Sponsored By RainWorld go play it, it’s Peak As fuck. Howdy Everybody Resident Mimikyu who lives in your walls Salty Here! I’ve been with this blog since the Start, helping with some images, some writing and Giving my two cents on the verdict. This MU is tbh one of my favourite, might even be in my top ten, so it being made by my Good pal Aldis and Getting to help him on this blog has been a Blast! And uhh yeah that’s about all my dumbass has to say, Goodnight Glass Houses”

Metal Leading

“Hey all, Metal here! I really enjoyed assisting with this blog and I think Salt and Aldis did a fantastic job with it!!! I originally thought this MU was just neat but after finding out everything these two characters can do, I was convinced that this could be a fun and creative fight! I don’t really have much else to say, but I hope you enjoyed this blog!!!”

Chemistry Tasty

"I'm Chem, I did a calc at this point in the blog that put the yellow ball at city level, I don't remember doing the calc and uh.... I say kill the grinch"

OK University

"Heyo it's Ok_University_6641 here. When I was originally introduced to the matchup WYST vs. C00lkidd, I liked it quite a bit, gave it an upvote, then moved on. But then, after having a pleasant discussion with Aldis_bin_raider296, I decided that I'd make some sprite art to show appreciation. From there, I was brought on the blog to give feedback and help with voting on the verdict since I was familiar with the characters. I really liked being a part of something like this,

even in small part. I hope to help out with something similar or equivalent again, and I must give credit to Aldis for even letting me help on this “evil silly goobers fight” blog.”

And finally, from me. Thanks for reading. It means a lot that you took the time to read this silly little blog!
