

All red text should be replaced or deleted before submitting the page. Leave headings for blank sections, someone else might fill them in. Only remove them if they don't fit - ie, "Waypoints" on a planet with no buildings at all, "Life" on a planet with no significant life.

Remember to replace "Rento. Expanse" with a different region if you're not in the Rento. Expanse.

Copy to a new Google Docs page, MS Word, or other word processing program to edit.

Once you become familiar with the format, you may want to save the template on your computer and remove all the red text, to edit a little quicker.
