

Introducing MiStrategyBank

What is MiStrategyBank?

The MSB is an electronic clearinghouse of strategies designed to connect educational data systems, promote and support best practices, and provide information regarding the implementation of strategies in use to support Michigan's education system. This application is being used by MICIP to integrate the strategy selection process within the MICIP platform.

How was MiStrategyBank developed?

MiStrategyBank was developed by a group of Michigan educators in the spring of 2019 to support MiREAD. The use of MiStrategyBank expanded to include connections to MICIP and other support systems for educators. Michigan Association of Intermediate School Administrators (MAISA) and Michigan Collaboration Hub (MiCH) worked with a team of ISD software developers, using the Actionable Data Advisory for ongoing feedback on the system.

How do I select the right strategy?

MiStrategyBank can connect users to an electronic clearinghouse of strategies that can be filtered by:

- Outcome Domain
- ESSA
- Type
- Grade Level
- Clearing House
- Michigan Top 10 Strategic Education Plan
- Curator

A statewide catalog of strategies curated by What Works Clearinghouse, MDE, and Michigan educational partners will be available within the MICIP Platform.

In addition to links to research, many strategies include additional resources such as implementation guides or professional learning resources that will assist districts in identifying activities and completing a continuous improvement plan.
