	<h2>myPortfolio on Android Tablet: Ten Point Check</h2> 
---	---

Tested on a Samsung Galaxy Tab 10

	Default Browser	Dolphin
Log in - remembers username/password	Yes	Yes
Edit Profile	Yes (Profile Introduction)	Yes (Profile Introduction)
Create/Edit Journal Entry	Yes	Yes
Manage Files	Yes (Inc. Create Folder)	Yes (Inc. Create Folder)
Upload Files*	External upload possible from Camera,	External upload possible from Gallery app only

	Video, Sound Recorder and Gallery apps	
Place Feedback	Yes	Yes
Create/Edit Pages (JavaScript disabled)**	To use new Blocks, place radio button on chosen block and tap on "Add new block here"	To use new Blocks, place radio button on c chosen block and tap on "Add new block here"
Edit Existing Blocks	Yes	Yes
Manage Pages	Yes inc. Copy a Page	Yes
Copy/Paste URL in a block	Yes	Yes
Find Friends/ Join Groups	Yes	Yes
Send/Reply to Messages	Yes	Yes

**from Browser settings.

In Edit page mode, you can edit existing blocks, but you can not drag and drop to add others

NB: Disabling JavaScript prevents loading many websites (eg: Youtube) - A work around, even if clumsy, would be to have myPortfolio opened on two different browsers, one with JavaScript disabled to allow for some page edits.

Or you can switch JavaScript on/off and refresh in between actions.

See thread in the [Mobile-Mahara Integration](#) Forum (General Discussion) on myPortfolio

FYI:

Wysiwyg action a bit slow.

When action is "processing", the page auto rotates to the opposite direction on the default browser.-----

All testing done with 3G network (in NZ!), so WiFi can only be better still.
