

Privacy Policy

Last updated: October 19, 2026

This Privacy Policy explains how **[Developer Legal Name]** (“we,” “us,” or “our”) handles information when you use PDF Reader (“App”), Android package name **com.jellyfish.pdfreader**.

The App provides document reading, scanning, conversion, annotation, signature and file management tools.

1. Information We Process

Documents and Local App Data

To provide document features, the App accesses files you select or files found through permissions you grant. These may include PDFs, Office documents, images, scanned pages and handwritten signatures.

The App may store the following on your device:

- Document names, locations, formats and sizes.
- Page counts and document thumbnails.
- Recently opened files and reading progress.
- Favorites and document modification dates.
- Saved signature templates.
- Language preferences, purchase status and other settings.

Core document reading, scanning, conversion and annotation take place on your device. The App does not provide a developer-operated cloud document storage service.

Files you choose to share, print or open through another app are handled by the selected service under its own privacy practices.

Device, Usage and Diagnostic Information

Integrated advertising and Firebase services may collect information such as:

- Device model, operating system and App version.
- App instance, installation and advertising identifiers.
- App launches, screen views, session activity and feature interactions.
- Advertisement impressions, clicks and related interactions.
- Crash reports, error information and performance diagnostics.
- Network information, including IP addresses, and approximate location derived from network information.

The information processed depends on the service, SDK configuration, device settings and applicable consent choices. The App does not request precise GPS location permission.

Purchase Information

If you purchase Pro, Google Play processes the transaction.

The App receives information needed to verify or restore your entitlement, such as the product identifier, purchase token and purchase status. We do not receive your full payment card details.

Information You Send Us

If you contact us by email, we receive your email address, message and any attachments you choose to send.

Please avoid sending passwords, payment details or sensitive documents. Remove confidential information from screenshots and attachments whenever possible.

2. How We Use Information

We use information to:

- Open, display, scan, convert, annotate and organize documents.
- Remember preferences, reading progress and Favorites.
- Verify purchases and restore eligible Pro access.
- Display advertisements and measure advertising performance.
- Understand App usage and improve functionality.
- Diagnose crashes and resolve technical problems.
- Configure App behavior and support messaging functionality.
- Respond to support requests.
- Detect abuse, prevent fraud and comply with legal obligations.

We do not use document contents or saved signatures for advertising or AI training.

3. Permissions and Device Access

Depending on your Android version and the features you use, the App may use:

File and storage access: To discover supported documents, display file lists, open files and save, rename or delete documents at your request. On supported Android versions, the App may request all-files access for document management.

Photo access or the system picker: To import images for image-to-PDF conversion.

Scanning services: To capture paper documents using Google Play services' document scanner. The scanning interface handles camera access through its service.

Notifications: To display document-related messages and reminders. You can disable notifications in Android settings.

Internet and network access: To support advertising, Firebase services, purchase verification and online links.

Google Play Billing: To purchase and restore Pro access.

You can manage permissions through Android settings. Withdrawing a permission may prevent the associated feature from working.

4. Advertising

The free version of the App uses Google AdMob to display advertisements.

Google's Mobile Ads SDK may collect and share IP addresses, device or account identifiers, advertising interactions and diagnostic information for advertising, measurement and fraud prevention. Details are described in [Google's Mobile Ads data disclosure](#).

Depending on your region, device settings and consent choices, advertisements may be personalized or non-personalized. Non-personalized advertising may still involve processing information for delivery, measurement, security and fraud prevention.

The App integrates Google's User Messaging Platform to present advertising consent messages where configured and required.

You can also manage available advertising privacy controls in Android or your Google account. Purchasing Pro removes App advertisements as described in the purchase screen; it does not necessarily disable separate diagnostic or analytics processing.

5. Firebase Services

The App integrates the following Google Firebase SDKs:

- **Google Analytics for Firebase:** App usage and engagement measurement.
- **Firebase Crashlytics:** Crash reporting and troubleshooting.
- **Firebase Remote Config:** Configuration of App behavior.
- **Firebase Cloud Messaging:** Messaging support.

These services may process installation identifiers, device information, usage events, diagnostics and messaging-related identifiers as applicable to their functionality and configuration.

For information about their processing and retention practices, see [Privacy and Security in Firebase](#).

6. When Information Is Shared

Information may be disclosed to:

- **Service providers**, including Google services used for advertising, analytics, diagnostics, configuration, messaging and billing.
- **Services you select**, such as email apps, file-sharing apps, document providers or print services.
- **Authorities or other recipients**, where required by law or reasonably necessary to protect rights, security or investigate fraud.
- **A successor operator**, if the App is involved in a merger, acquisition or transfer, subject to applicable privacy obligations.

We do not sell your documents or saved signatures. Advertising-related disclosures of identifiers and interaction data may be considered “sharing” or “sale” under certain privacy laws, depending on the circumstances.

7. System Backup and Device Transfer

The App allows Android system backup and device transfer.

Depending on your Android version, device provider and backup settings, eligible App data may be included in cloud backups or transferred to another device. Such data may include settings, local document metadata, signature templates and eligible files stored in App-managed storage.

System backups are controlled by Android and your backup provider, rather than a document cloud service operated by us. Manage these options through your device and Google account settings.

8. Data Retention

Documents saved to shared device storage remain until you or another authorized application removes them.

Local settings, document indexes, reading history and signature templates generally remain until removed, App storage is cleared or the App is uninstalled. Files saved outside private App storage and existing system backups may remain afterward.

Support correspondence is retained as reasonably necessary to resolve requests, maintain appropriate records and meet legal obligations.

Advertising, analytics, diagnostic and purchase records are retained according to applicable service configurations, provider policies and legal requirements. Different data categories may have different retention periods.

9. Your Choices and Privacy Rights

You can:

- Manage file access and other permissions in Android settings.
- Disable notifications.
- Adjust available advertising privacy settings.
- Delete documents using the App or a file manager.
- Clear App storage or uninstall the App to remove local App data.
- Manage system backups separately.
- Contact us about information associated with support requests or other processing we control.

Depending on your location, you may have rights to access, correct, delete or obtain a copy of personal information, restrict or object to processing, withdraw consent, or opt out of certain advertising-related disclosures.

Where processing relies on consent, withdrawing consent does not affect processing lawfully performed before withdrawal.

Send requests to **numbersshelter@gmail.com**. We may request information reasonably necessary to verify your identity and locate relevant records. We cannot remotely delete files held only on your device or information independently controlled by another provider.

10. Legal Bases for Processing

Where applicable law requires a legal basis, we process information based on:

- Providing requested App features or fulfilling a purchase.
- Consent, where required.
- Legitimate interests in maintaining reliability, responding to requests, preventing fraud and improving the App, where those interests do not override your rights.
- Compliance with legal obligations.

Advertising or analytics processing that requires consent must rely on that consent.

11. International Processing

Our service providers may process information in countries other than your country of residence. Privacy protections may differ between countries.

Where required, international transfers must be covered by applicable legal safeguards, such as approved contractual protections.

12. Security

We use reasonable technical and organizational measures appropriate to the information processed.

No storage system or transmission method is completely secure. Protect your device, review files before sharing and keep backups of important documents.

13. Children's Privacy

The App is not designed specifically for children. We do not knowingly collect personal information from children below the age at which parental consent is required under applicable law without appropriate authorization.

If you believe a child has provided personal information to us improperly, contact us so we can investigate and take appropriate action.

14. Third-Party Links and Services

External websites, advertisements and apps have their own privacy practices. Please review their policies before providing information.

Google's general privacy practices are described in the [Google Privacy Policy](#).

15. Changes to This Policy

We may update this Privacy Policy as the App, its services or applicable requirements change.

We will update the date above and provide additional notice or obtain consent when required by law.
