SCSD Technology Board Report
February 28, 2022

<u>School Sites</u>
- Installing new backhaul for student wireless; adding students slowly while using our network
- Chromebook overhaul continuing in case we go to remote learning; Really hope not and lifting of mask mandate is a good thing however cases doubled so we will be ready
- Establishing wireless contact with building marquees; Parkview board having power problems to antenna. Waiting for power to Midway and San Antonio marquees.
- Continued installation of security cameras, especially in cafeteria and concession areas to curb theft
- Audio Enhancement in planning for Parkview, possibly for Midway and San Antonio as proof of concept
    - Will upgrade intercom system and will allow for better teacher voice volume in every classroom
- Google Workspace is pulling features from the Fundamental tier (i.e. free, the one we're on)
    - Continuing use of Canvas as LMS to offer screen recording and other tools

<u>Erate</u>
- New networking equipment ordered and arrived, to be installed over the next month.
- Fiber project contract signed with WNM and 471 filed; much closer to fiber being installed to midway and San Antonio

<u>Powerschool / Data</u>
- Currently working 120th day data reporting
- Working on Civil Rights Data Collection
- Powerschool Onsite server set up and ready to test
    - If successful we will move to onsite Powerschool at the end of the school year and begin implementation of Powerschool Enrollment Express or Ecollect or other online enrollment package.
    - Will allow parents to update demographic and connecting information directly without a paper form going to the office.
- ELL data is sporadic and incomplete; working with schools and DTC to get ELL up to date
