ABOUT KHAN ACADEMY

Khan Academy is a fast-paced nonprofit on a mission to provide free, world-class education for anyone, anywhere. We reach millions of students every month and are growing rapidly. We're building a library of world-class instructional and practice resources that empowers learners. Whether they're studying matrices, mitosis, or multivariable calculus, we want to offer students the resources to realize that they can learn anything.

ABOUT KHAN ACADEMY INDIA

Khan Academy India aims to deliver a world-class user experience to learners in India that is locally relevant and are enabled by a strong on-the-ground team and operations. Our learning system is mastery-based, which allows students to master key concepts at a pace that's right for them before moving on to more challenging content. From serving under 500,000 learners in 2016, we are now serving almost 4 million learners a month across our websites, apps, and youtube channels. These learners include both independent learners accessing us at home, and teacher-directed learners in schools. Our focus is to reach the underserved by making our content accessible in local languages and by working with **large public school systems**. Khan Academy is already available in Assamese, Hindi, Hinglish, Kannada, Gujarati, Tamil, Marathi, and Punjabi.

ABOUT THE INDIA CONTENT TEAM

Our content team in India includes content creators who make thousands of awesome videos, articles, and practice questions aligned with the Indian curriculum to help both teachers and students. We are actively working on content localization in other regional languages as well, which means the content we co-create reaches a wider number (both nationally and globally), thereby quintupling the impact.
