Dec 9, 2025 | 🗓 SDKs Working Group

Agenda:

1. that multi-package
   a. Go and php
   b. Typescript
2. aligned approach to documentation
   a. Options
      i. Githubio pages
      ii. Readme :(
   b. Contribution guidelines
3. Align on PR labels [Paul]
   a.
4. [SDKs tiering review and dates](#)
5. SDKs working group maintainers

Action:

- Add proposal for documentation - Christopher Hertel
- Felix Weinberger to have a go at writing contribution guide that other SDKs can also adopt

Nov 11, 2025 | 🗓 SDKs Working Group

Agenda:

- Conformance testing
  - [Repo](#)
  - `npx @modelcontextprotocol/conformance` ← [paulc] this does work now, not sure how i broke my shell 🤷
- convenience abstractions in SDKs
  - Go, python client session
  - List of semantics from SDKs - do do
- Issues prioritization
  -
- [if time] SDK version table / SDK tiering combining
  - https://github.com/modelcontextprotocol/modelcontextprotocol/issues/1309
  -
- Labeling
  - Clean up label - Felix Weinberger
    - Bug , feature request, quesion
    - Ready for work (provide more info)
    - Priority (cleanly define)

Oct 14, 2025 | 🗓 SDKs Working Group

Attendees:

Agenda
- SDK Tiering
  - Tier1:
    - Stability
      - Actively addressed issues
      - Community manager
      - Response time to issues
        - Triaged and prioritized
          - Even if the response is "we will try to fix it within 2"
      - Security issues need to be addressed asap
    - Level of support
    - Compliance tests
    - Release within two weeks
    - Discord?
  - Tier 2
    - Longer to triage
    - Longer to implement new features - six months
    - Dependencies update ? (clear policy around dependencies updates)
    - Stable releases schedule
  - Tier 3
    - Experimental
    - Stable releases schedule
    -
- General notes:
  - Concrete criteria
  - Non-functional
    - Test coverage
    - Fully documented
      - Examples (Like elicitation requires statefullness)
- SDK compliance suit
  - https://github.com/modelcontextprotocol/modelcontextprotocol/issues/1627
    - We need to have an estimate for SDKs to use compliance tests
    - Example server per test
    - Example client
    - No auth as we should be able to re-use
  - Some features like structured output would be good to have in compliance

- Cadence for
  - Monthly
- [if time] automatic log level
  - https://discord.com/channels/1358869848138059966/1415735469689409576/1415738051333849193
  - This is heads up for SDK maintainers - may

Action items
- ☐ Add to the agenda "Discuss issues prioritization"
- ☐ Discuss convenience abstractions in SDKs (session groups)
- ☑ ~~Schedule monthly meetings~~
- ☑ ~~Organize working group for conformance testing~~
- ☐ Should be part of compliance test for ""
