

Better Worlds ReFi-Mangrove Collaboration Challenge

Reviewer's Guide

The following point system has been established to assist judges in ranking presentations. Each of the sections are worth 5 points for a total of 25 points available. You can award 0 for the least possible points for a section up to 5 points for a maximum score.

The theme of the challenge is to create innovative ReFi solutions to help preserve & restore mangrove forests, whether through direct funding mechanisms or to address underlying challenges. In this facilitated virtual event participating groups have learned about the significant challenges faced by mangrove initiatives reviewing interviews with domain experts and project developers and they were then invited to study a number of ReFi case studies.

After each presentation, reviewers will have an opportunity to meet 1:1 in breakout rooms with project teams to clarify any scoring.

Team Name:

Project Name:

Total Points:

Section	Description	Points
1. Theme	- how closely is the theme addressed	/5
	- How well did they tackle the problem
