Professional Summary

I am an experienced front-end engineer with over 3 years of industry experience and a strong background in building robust, user-friendly, and visually appealing web applications. My expertise includes integrating Web APIs, crafting responsive designs, optimizing performance, and ensuring accessibility. With extensive experience in the fintech, real estate, immigration, and education industries, I take a strategic approach to delivering scalable, high-quality web applications that drive team success.

Employment History

Front-End Developer — Optimus AI (Contract)

Sep 2024 — Present

- Built and maintained responsive web applications for clients across various industries and top government agencies, ensuring high performance and cross-browser compatibility.
- Collaborated with designers to implement pixel-perfect UIs and integrated APIs for dynamic content delivery.
- Headed and managed the development of several web projects from start to completion, receiving positive feedback from contractors.
- Worked closely with designers to implement clean and modern UI components.

Front-End Engineer — Paydestal

11 Sep 2024 — Present

- Designing and implementing user-friendly interfaces for financial dashboards, optimizing performance and accessibility across devices.

- Owning and shipping fintech products end-to-end to simplify payments for users.
- Integrating secure APIs to enhance transactional workflows and analytics features.
- Collaborating with designers and backend engineers to deliver secure, cohesive web solutions aligned with user requirements and business objectives.
- Speed-up payment gateway integration by developing a payment SDK/NPM library to allow developers add payments to their application.

Front-End developer (Contract) — Agro Inc

Oct 2022 — Jan 2023

- Worked closely with the product manager and backend developers to rebrand and build the frontend infrastructure of Agro's Angular-based service web app that allows thousands of clients across the USA monitor their barn activity.
- Rebranded analytics visualization which provided a more intuitive user experience to barn owners

Education

Bachelor of Science in Computer Science — (In View)

Sep 2023 — May 2027

University of the People, Pasadena, California
