

Summer

Write an essay using the SEXY paragraph structure on the following topic. Study the attached resource about Energy first.

Should New Zealand continue to use non-renewable sources of energy such as coal, oil and gas to produce energy?

- What do you think?
- Do you agree or disagree?
- Are there ideas to support both sides of the topic?
- Write to persuade the reader of your ideas

HINT: Do not use statements that say 'I think'. Avoid using the word 'I' in your writing.

PLANNING:

Study the resources below. Watch the video as a class. Do your planning in the space provided below. This will be assessed as part of your mark to show how you organise ideas

Non renewable

- Greenhouse gas
- Killing the world
- Climate change
-

ESSAY

NO New Zealand shouldnt continue to use non-renewable sources of energy such as coal, oil and gas to produce energy?Non renewable energy is a bad type of energy which is killing the world. By using wind , waves, tides and solar we could save the world.

Non renewable energy is not helping the world and it is putting dangerous gas into the air which is making people sick and is also changing the climate of the world. Things are melting and things are dying but we can change things and make this world better.

New zealand could change to renewable energy. It had the best windswept landscapes. Which then we could use the wind energy instead of oil or coal. Wind energy would need to be put in a place there's always winded though. We also have a really good waves so we can also make waves energy. Wave energy is energy from vertica wave movement . This would be a good way to start saving the world.

New zealand should make the change it is going to take a bit but we can do it by taking the bad energy and changing it with good energy. Will u make the change to better the world and your family?
