

MAY ANN CALATRAVA

No-Code Automation Developer | n8n | API Integrations | AI Workflows
calatravamayann@gmail.com • Philippines • Available for US & Australian Clients

ABOUT ME

I am a No-Code Automation Developer who builds intelligent workflow systems and API integrations for US small businesses. I don't just manage tasks. I architect, build, debug, and deploy end-to-end automation pipelines that save time and eliminate manual work.

Currently managing a full content automation stack for a US-based brand, handling everything from workflow architecture to live API integrations with Meta, YouTube, TikTok, and GoHighLevel.

TECHNICAL SKILLS

Automation	n8n (Cloud), Workflow Design, Trigger Config, Error Handling, Debugging
APIs	Meta Graph API, YouTube Data API, TikTok API, GoHighLevel API, AssemblyAI, Telegram Bot API, Google Cloud Storage
AI Tools	Claude AI (Anthropic API), ChatGPT, AssemblyAI, Prompt Engineering
Code	JavaScript (n8n Code Nodes), JSON, Webhooks, HTTP Requests, Binary Data Handling
Project Mgmt	Trello (Cards, Butler Rules), Google Drive, Google Sheets, Google Chat
Content	Canva, CapCut, Meta Business Suite, GoHighLevel Social Planner
Platforms	Instagram, YouTube, TikTok, Facebook

PORTFOLIO - LIVE PROJECTS

Workflow 0A - Auto Trello Card Creation [LIVE]

Google Drive trigger that automatically creates a Trello card every time a new video is uploaded by the content team. Eliminates 100% of manual card creation and ensures all videos are instantly tracked without any human input.

Tech Stack: n8n, Google Drive API, Trello API, Webhooks, Butler Automation Rules

Workflow 1A - AI-Powered Caption Generation Pipeline [LIVE]

End-to-end pipeline that transcribes video audio using AssemblyAI, then generates platform-specific captions for Instagram, Facebook, YouTube, and TikTok using Claude AI via direct Anthropic API. Custom CTAs, hooks, and formatting rules per platform. Outputs saved directly to Trello cards for team approval.

Tech Stack: n8n, AssemblyAI, Claude AI (Anthropic API), Trello API, Google Drive API, JavaScript

Workflow 2 - Multi-Platform Auto-Post Pipeline [FB/IG LIVE | YouTube LIVE | TikTok In Progress]

Multi-platform auto-posting system triggered when content is approved in Trello. Posts to Facebook and Instagram via GoHighLevel Social Planner API, to YouTube via resumable upload protocol (two-step HTTP with Location URL captured from response headers), and TikTok integration in progress. Telegram Bot API notifications alert the team on completion or errors. Google Cloud Storage used for public video URL hosting.

Tech Stack: n8n, GoHighLevel API, YouTube Data API, TikTok API, Telegram Bot API, Google Cloud Storage, JavaScript

WORK EXPERIENCE

Automation Developer & Social Media Manager

The Unexa Group | US-Based, Remote | 2022 – Present

- Designed and built 3 production n8n automation workflows from scratch
- Integrated GoHighLevel Social Planner API for automated FB and IG posting
- Built YouTube resumable upload pipeline solving two-step HTTP protocol
- Set up Telegram Bot API notifications throughout the pipeline
- Managed Google Cloud Storage bucket for public video URL hosting
- Built AI-powered caption generation using Claude AI via Anthropic API
- Managed social media accounts across Instagram, YouTube, TikTok, and Facebook
- Provided sales support and client communication for Surplus Funds brand
