### BYOD Workshop Summary:

Digital storytelling at its finest! Create simple newscaster style videos on iOS devices in three steps: choose media, tell your story, choose your music. Recommended by ISTE's SIGTAP

Participants will learn how to use the Videolicious iOS app to create video productions that rival network-news style productions. We will demonstrate the app and showcase student produced work from Amherst Middle School students in our Tech TV program. At the completion of the BYOD session all participants will have created a sample video production titled, "What I Love About ISTE!" that can instantly be shared online.

***"Everyone has a story, tell yours with Videolicious!"***

### Presentation Outline

1. [Presenter Introduction](#)
2. About the [Videolicious app](#):
  - a. Works on all iOS devices with a front facing camera
  - b. Uses your camera roll photos and/or videos
  - c. [Free](#) versus [Paid](#) options
2. View [RobZ video](#) sample (Edmodo Progress Bars)
3. View [Sample Videos](#) on Videolicious site
4. Sample Video Projects by Amherst Students
  - a. Digital Storytelling Project ([video](#)) ([lesson plan](#))
  - b. Life @ Amherst Middle ([videos](#)) ([lesson plan](#))
