ABSTRAK

The abstract has to be written both in Bahasa Indonesia and English within 200 words maximum and followed by with three to five keywords and arranged alphabetically. Abstract must contain background, research objectives, methods, result, and conclusion. Abstract in this section need to be written in Bahasa Indonesia, 1 space line and 10 font size Times New Roman.

Kata Kunci: geofisika; geologi; lingkungan; perminyakan; pertambangan. (alphabetically arranged and lowercase)

ABSTRACT

The abstract has to be written within 200 words maximum and followed by with three to five keywords and arranged alphabetically. Abstract must contain background, research objectives, methods, result, and conclusion. Abstract in this section is written in English language, 1 space line and 10 font size Times New Roman.

Keywords: environment; geology; geophysics; mining; petroleum (alphabetically arranged and lowercase)

I. Introductions

The introduction must contain (sortly and consecutively) a general background and a literature review (state of the art) as the basic of the brand new research question, statements of the brand new scientific article, main research problems, and the hypothesis (optional).

In the final part of the introduction, the purpose of the research should be stated. They should be represented in the literature review to show the brand new of the scientific article

II. METHODS

The method explains how the research is conducted, including research design, data collection, research instrument and analytic methods. This part should be narrated.

III. RESULTS AND DISCUSSION

This part consists of the research results and how they are discussed. The results obtained from the research have to be supported by sufficient data.

3.1. Equation

The research results and the discovery must be the answers of the research hypothesis or research question stated previously in the introduction part that the formulation can be seen in the **Equation 1**.

$$v = s/t \quad (1)$$

3.2. Table

The tables and pictures are placed in the text group after the referenced tables or pictures. Each picture must be given a caption and source (Figure Caption) below the picture and be numbered in Arabic numbering format followed by the picture title. Each table must be given a table title (Table Caption) and numbered in Arabic numbering format above the table followed by the table title and source placed below the table with left align.

The pictures attachment should be guaranteed that they can be printed well in black and white ink (font size, resolution and line space are clearly seen). The picture, the table, and the chart should be placed in the centre between text groups. If it has a bigger size, it can be placed in the centre of a page. The table should not contain vertical lines, while horizontal lines are allowed only for the important point. Please use terms “can be seen in **Table 1/Figure 1**” to refer the tables/figures.

Figure 1. Dicharge of Tirtasari Spring, Magelang
(Survey, 2025)

Table 1. JMEL Report (JMEL, 2025)

No	Variable	Respondents	Percentage
1	Journal access	650	30%
2	Citation rate	500	23%
3	Viewers	1000	47%
		2150	100%

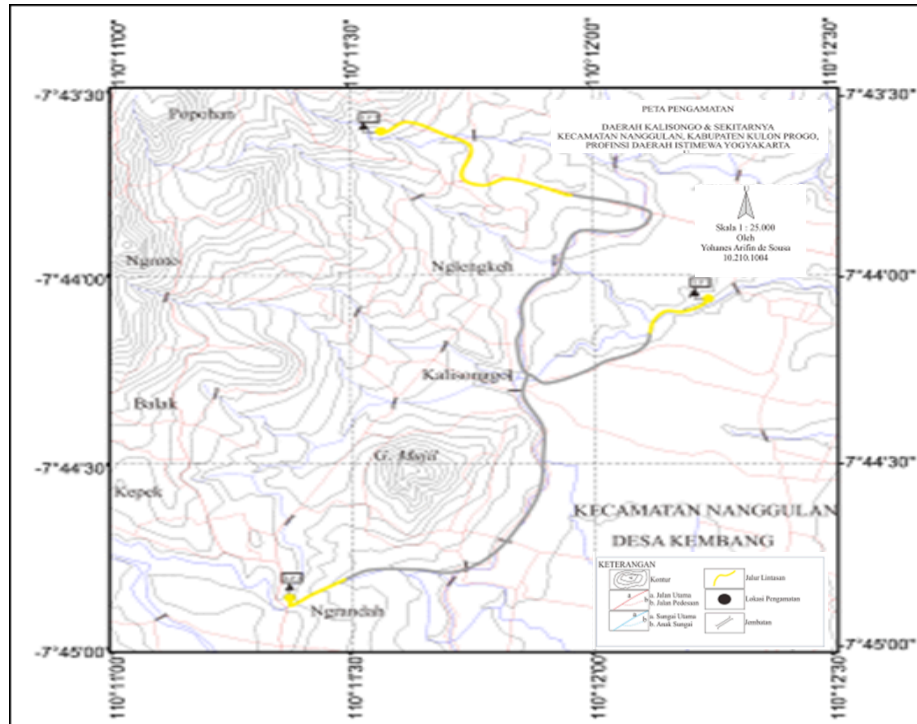

Figure 2. Observation Map in Kalisongo Area, Nanggulan Sub District, Kulonprogo District

IV. CONCLUSION

This is the final part containing conclusions, limitations and recommendations. The conclusions will be the answers of the hypothesis or research question, the research purposes and the research discoveries. The conclusions should not contain only the repetition of the results and discussions. It should be the summary of the research results as the author expects in the research purposes or the hypothesis. Research limitations and recommendations contain deficiency in the research and suggestions associated with further ideas from the research.

ACKNOWLEDGEMENTS

Acknowledgements to those who support the research (sponsors and respondents). Families and supervisors are not allowed in this section.

REFERENCES

All the references that used in the article must be listed in this part. In this part, all the used references must be taken from primary sources (scientific journals and the least number is 70% from all the references) that published in the last ten years. Each article should have at least ten references.

All the served data or quotes in the article taken from the other author articles should attach the reference sources. The references should use a reference application management such as Mendeley. The writing format that used in JMEL (Jurnal Mineral, Energi dan Lingkungan) follows the format applied by **APA 7th Edition (American Psychological Association)**.
