

What happens if students do not initially meet proficiency in a course?

If students do not initially meet proficiency during a course, they will have additional learning opportunities that will be planned out between the individual student and the teacher. Students may be given different learning opportunities, review past learning opportunities, and/or access help and instruction during **Academic Advisory**, **Math Tutorial**, and/or **Proficiency Support Group**.

Math Tutorial is available at the following times:

1. Before School (7:05 AM – 7:35 AM) on Tuesday, Wednesday, Thursday, & Friday (Room 106)
2. After School (3:05 PM – 3:35 PM) on Monday, Wednesday, Thursday, & Friday (Room 104)

Proficiency Support is available at the following times:

1. After School (3:10 PM – 3:40 PM) on Monday, Wednesday, & Thursday (Room 210)

Students have many supports they can access, but they are responsible for their own learning, and need to take responsibility for seeking out appropriate supports and following through with plans.
