

Architecture Chat - 23rd Feb 2012, Garrisons, Sylvia Park (or somewhere else, if people feel like a change of venue...?)

Possible topics:

- Report from those people who attended #webstock, you lucky buggers :)
- Emotions Engineering - <http://www.infoq.com/news/2012/02/emotions-engineering>
- MongoDB Aggregation Framework - <http://blog.mongodb.org/post/16015854270/operations-in-the-new-aggregation-framework>
- Java Sucks - Revisited - <http://www.javacodegeeks.com/2012/01/java-sucks-revisited.html>
- 70x higher join performance in MySQL? <http://www.mysql.com/why-mysql/white-papers/mysql-cluster-7.2-ga.html>
- OSX Mountain Lion - anyone care? <http://www.apple.com/macosx/mountain-lion/> (PH: yes - Gatekeeper is an important move)
- Log4net strong name change - http://haacked.com/archive/2012/02/16/changing-a-strong-name-is-a-major-breaking-change.aspx?utm_source=feedburner&utm_medium=feed&utm_campaign=Feed%3A+haacked+%28you%27ve+been+HAACKED%29&utm_content=Google+Reader
- I'm talking tomorrow, don't come ;) - <http://www.meetup.com/Akl-AUG/events/47434772/>
- I've been really enjoying Ayende's series: Limit your Abstractions (starts [here](#)) he's basically railing against the DDD standard patterns (repository, service etc) and claiming you only need:
 - Controllers
 - Views
 - Entities
 - Commands
 - Tasks
 - Events
 - Queries
 - NW: me too. I've seen DDD/CQRS done, and TBH, it made my eyes water and want to run. fast. away.
- ASP.NET 4 MVC hits beta - ApiController, Single Page Apps - <http://www.asp.net/mvc/mvc4>
- Amazon Simple Workflow - <http://aws.amazon.com/swf/>
 - <http://www.allthingsdistributed.com/2012/02/Amazon-Simple-Workflow-Service.html>
