Probability (SP4)

Page 273 #1

1. A paper bag contains 2 green tiles, 4 yellow tiles, and 1 blue tile. Liz draws a tile without looking.
- List the possible outcomes.
 - What is the theoretical probability that the tile is:
 - green?
 - yellow?
 - blue?

2. Dave tossed a coin 20 times. Heads showed 12 times.
- How many times did tails show?
 - What fraction of the tosses showed heads? Tails?
 - Are these results what you would expect? Explain.
 - Dave tosses the coin 100 times.
What would you expect the results to be? Explain.

Page 279 #6

6. Zeroun and Ammon are playing a game. They spin the pointer on this spinner. If the pointer lands on an even number, Zeroun wins. If the pointer lands on an odd number, Ammon wins.
- Is this a fair game? How do you know?
 - What is the theoretical probability of the pointer landing on an even number?
 - Use a spinner like this one. Play the game at least 30 times. Record your results. Were the results what you expected? Explain.
 - What results would you expect if you played the game 100 times? Explain how you made your prediction.
