Attendees

- ...

Agenda

- Switch to Poetry and pyproject.toml
 - <https://github.com/gdcc/pyDataverse/pull/180>
 - Which dev-dependencies should we keep?
 - Should we ditch the `src` style?
- PyPI and TestPyPI workflow
 - Included in <https://github.com/gdcc/pyDataverse/pull/180>
 - Adds an action that publishes to PyPI upon a new release
 - TestPyPI workflow in construction (just received access from Stefan)
- Local testing of pyDataverse
 - <https://github.com/gdcc/pyDataverse/pull/172>
 - Added instructions to Readme
 - ~~Ready for review!~~
 - *Reviewed!*
- Converting the current docs in favor of mkdocs-material
 - <https://github.com/gdcc/pyDataverse/pull/181>
 - <https://squidfunk.github.io/mkdocs-material/>
 - Cleaner look and deployable to gh-pages
 - Supports Jupyter notebooks → [Example](#)
- Remote ZIP files and the DataverseFS

- Based on pyFilesystem and python-remotezip
 - <https://github.com/gtsystem/python-remotezip>
 - <https://www.pyfilesystem.org/>
- Fix data file access and follow redirects PR → *Already merged!*
 - <https://github.com/gdcc/pyDataverse/pull/182>
