

# Full Item Randomizer 2023 Tournament

Hello everyone! This is the moment you all have been waiting all year for: The Full Item Randomizer tournament is back again this year! This is in celebration of the brand new public release of the new Speedchoice and randomizer.

This tournament is showcasing both Extreme Full Item and Crazy Full Item Randomizer. We will be using Speedchoice Crystal 8.0.0 alongside the randomizer version 8.0.0. With this tournament we are going to do a dual format. The first stage will be similar to last year with the Swiss format using the Extreme ruleset. The bracket stage will then change to the Crazy ruleset.

Extreme shuffles the locations of most items and badges in the game interchangeably between themselves. This means that badges could be in an itemball lying on the ground or similar. This does NOT include hidden items outside of the normal machine part location in Misty's gym.

Crazy builds from Extreme and includes even more items. Hidden items (including leftovers) are added to the item pool. Berry trees and items locked by day (and friendship) are also included, no need to clock reset. These items will always be available regardless of the day and time set. Shop items are NOT included. Bug Catching Contest items are NOT included. Phone call trainer and Pokemon-related checks are also NOT included.

## Important gameplay notes for the tournament:

- a. The SS Aqua has been modified to operate every day of the week. You can also ride it without needing to beat the E4, as long as you have the SS Ticket.
- b. All four of the item rooms in Ruins of Alph are included in the randomizer. These are the Kabuto (escape rope), Aerodactyl (use flash, requires surf to reach) and Omanyte (Requires a water stone, which can be purchased in Goldenrod City, also requires surf and strength to reach), and the Ho-Oh chamber (this room unlocks when you have encountered the Ho-Oh on top of tin tower, requires surf to reach). For the tournament Ho-oh is available as soon as you can get access to the tower and the level has been reduced to level 40.
- c. The gate guard at the gate to victory road disappears when you wake up Snorlax. Note that this means that cut or the hive badge can be on the western side of Kanto if you enter viridian this way.
- d. Note that any item check locked behind rock smash is considered in logic once the player has used to squirtbottle on Sudowoodo. This is because rock smash is

a TM, so the player must be able to purchase it in order to prevent soft locks. Note that you MUST talk to the guy who gives the vanilla rock smash TM in order to have it appear in the Goldenrod TM shop.

- e. You can enter Kanto by using the Pass at the train station in Goldenrod. If you have the pass and the SS Ticket, you can skip the Squirtbottle by taking the boat from vermillion to the upper half of Johto
- f. The director is always in the basement of Goldenrod. Additionally, the rockets are only present there when the radio tower is taken over (they are not present before or after the takeover). However, Rival 4 is always there, waiting.
- g. You are NOT required to go into dark places WITHOUT having both Zephyr Badge AND HM05 (Flash) available beforehand.
- h. When dealing with the Kenya turn in, be warned it is possible to softlock if you delete the mail attachments. There is no current way to fix this in the unlikely possibility the mail contents are deleted. You must take caution when removing the mail from Kenya to not delete the contents to prevent locking yourself out of the Kenya quest items.
- i. The move tutor in Goldenrod is now always present. All Pokemon have full compatibility for all three moves. The % of Good moves is 30% for the move tutor.
- j. The % of Good Moves on Pokemon and TMs are both set at 25%. All Pokemon have full TM and HM compatibility.
- k. Enemy Trainers have fully evolved Pokemon at level 50 and above.
- l. New ZX Randomizer changes Espeon and Umbreon to Sun/Moon stone evolution respectively instead of friendship evolutions
- m. On the new release itemrand preset enables bike indoors which is a change to previous tournaments
- n. For any additional changes since the last tournament, see the patch note document [here](#)

# The tournament is playing with the following modifiers:

- DefinitelyNoEarlySabrina
  - Sabrina is considered only in logic until you have at least 7 badges
- NoEarlyBasement
  - Prevents the basement in goldenrod from having the squirtbottle or the pass when the player does not have one of these two items, to prevent fighting rival 4 early.
- SkipReturningToNewBark
  - You do not have to go back to Elm's laboratory immediately after receiving the items after talking to Mr. Pokemon. You are able to proceed without needing to do any checks
- SkipE4AndFightRed
  - Elite 4 does not have to be defeated for Red to spawn
- ProgressiveRods
  - Fishing rods are progressive. Which means your first rod will always be an Old rod, etc.
- RemoveCutTreeInIlex
  - The cut tree in Ilex Forest has been removed to allow for passage without needing Hive Badge + HM01 (Cut)
- VanillaClair
  - Clair behaves as in the normal game. This means you must enter Dragon's Den and do the quiz to receive her badge and TM. The bug for receiving Clair's item immediately after defeating her has been patched properly.
- EnableTinTower
  - Tin Tower is included in the list of places that have items randomized. To access Tin Tower you must have the clear bell and rainbow wing and either a) defeated Morty or b) defeated the Radio Tower Rockets
- CardRandomization
  - The pokegear, pokedex, radio card, and expansion card are all included in the item pool. To wake the snorlax you must have the pokegear, radio card, and expansion card.
- ForceEarlyFlyTournament2023
  - This is a slight modification on the normal Force Early Fly locations. See the picture at the end of the document for a more visual clarification.
    - It ensures that the fly HM is obtainable and usable before the player is required to do any of the following things:
      - 1. Take the SS Aqua
      - 2. Enter route 44
      - 3. Enter Diglett's Cave after waking up Snorlax

- 4. Climb the waterfall in Tohjo falls
  - 5. Enter route 9 or visit Power Plant
  - **Please note that anything you obtain in the “No Fly Zone” cannot lead to Fly parts**
- NoVanillaBasement
  - Basement is considered to be locked by the card key as well as the basement key from the perspective of the logic. However, the player does not need the card key to enter the basement. That means it is not considered in logic until you have at least 7 badges.
- NerfHoOhChamber
  - Ho-Oh chamber room unlocks when you have encountered the Ho-Oh on top of Tin Tower. For the tournament Ho-oh is available as soon as you can get access to the tower and the level has been reduced to level 40. This means it is no longer locked behind defeating the Elite 4. However, the vanilla rainbow wing item still requires defeating the Elite 4.
- DerandomizeLeftovers
  - Leftovers was changed for other modes to allow for it to be a randomized location. For this tournament it is always going to have the vanilla item.
- StartWithBike
  - You start with bicycle in your inventory, bicycle in the item pool is replaced with a Rare Candy instead
- StartWithRepel
  - You start with a repel in your bag

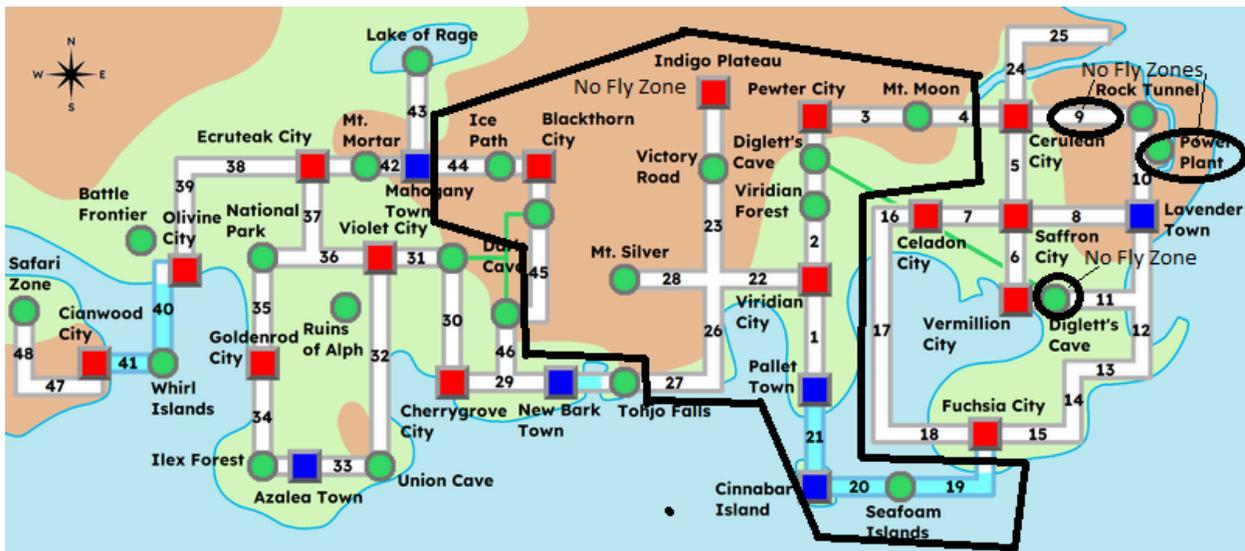

Crazy mode that will be used in the bracket stage will also include the following modifiers:

- HiddenItems
  - Adds hidden items to the pool please refer to ([https://www.smogon.com/ingame/guides/gsc\\_items](https://www.smogon.com/ingame/guides/gsc_items))
- TimeEvents
  - Adds Day siblings (Monica on Route 40, Tuscany on Route 29, Wesley at Lake of Rage, Arthur on Route 36, Frieda on Route 32, Santos in Blackthorn City, and Sunny on Route 37)
    - The Hidden Items under the Day Siblings get moved to in front of siblings (Frieda and Wesley)
    - Tuscany requires the Zephyr Badge to appear on the map
  - Snore TM inside Moomoo Farm on Route 39
  - Curse TM in Celadon City Mansion
  - Return/Frustration lady in Goldenrod Mart 5F
  - Mt. Moon Moonstone (requires Rock Smash)

- Sandstorm TM check in the house on Route 27
- **THIS DOES NOT INCLUDE BUG CATCHING CONTEST REWARDS**
- BerryTrees
  - Includes all the berry and apicorn trees to the pool
- ShuffleLeftovers
  - Adds Leftovers to the pool, **this replaces the DerandomizeLeftovers modifier** from the 1st stage
- UpgradeApricorns
  - There will be no apricorns, they will instead be turned to their corresponding ball types

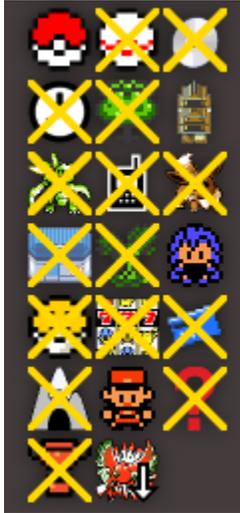

We will use the ITEMRAND preset. There are no changes as everything has already been set. That means that animations are skipped.

## Visual Representation of Fly logic

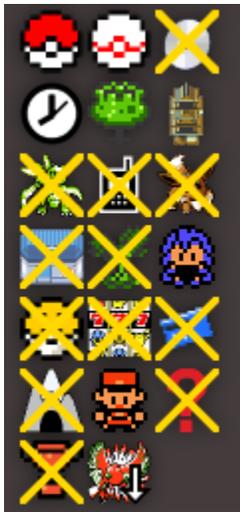

The blacked out areas cannot have Fly or Storm Badge. Do note that Rock Tunnel and Route 27 before climbing the waterfall in Tojiko Falls are still in Fly logic. **Please note that anything you obtain in the “No Fly Zone” cannot lead to Fly parts**
