List price configuration & customization for Shopware 6 Cloud/OnPrem.

Revision: 26. July 2021

Setup (Shopware 6.4.x)

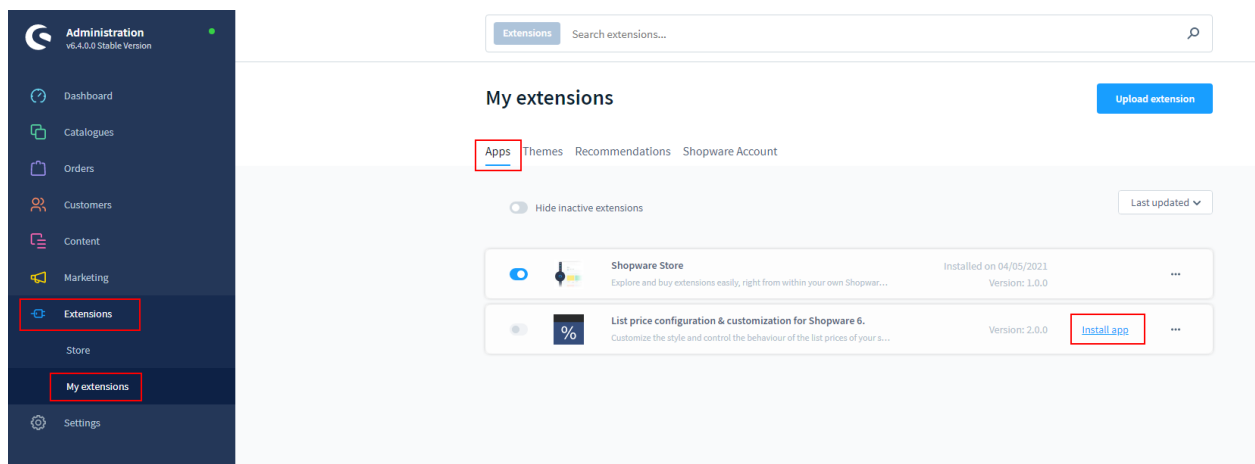

Install the extension via the App-Store at **Extensions-> Store**.

Search for “LexoListPrice” and you will find this extension.

You can then add the extension to your shop.

*Alternatively you can upload the extension as a ZIP file at **Extensions-> My Extension -> Apps**, clicking the **Upload extension** button.*

Finally, you can install the extension by clicking **Install app** and **activate** it by toggling the switch.

Configure

In order to configure the extension, please click **Config** in the context menu.

☒ Show list prices

Percentage threshold

20

Percentage format

Comma (,)

Icon Layout

Rocket 🚀

Icon color

Primary (Default)

Badge color

#1d8de2

New-Price color

#e4860c

Show list prices

By default, in Shopware 6 list prices are shown when the percentage of the new and old price exceeds 0%.

Use this option to hide list prices altogether.

Percentage threshold

Use this option to show list prices based on a threshold that corresponds to their percentage, as for example in case you just want to display list prices when their percentage is equal/greater than 20%.

Percentage format

Use this option to display a comma rather than a dot for the percentage.

135,41 \$*  ~~351,26 \$*~~ (61,45% saved)
Prices incl. VAT plus shipping costs

Icon layout

Use this option to display a different icon instead of the default percentage sign.

135,41 \$*   ~~351,26 \$*~~ (61,45% saved)
Prices incl. VAT plus shipping costs

Icon color

Use this option to display a dark version of the selected icon.

Badge color

Use this option to display a different color for the badge background instead of red.

New-Price color

Use this option to display a different color for the original price instead of red.

You should clear the cache of your shop after configuration.

Notice

We wrote this extension in a way in that it respects all Shopware 6 default templates for the list prices. If you activate the extension for the first time, all currently valid templates for the list prices will stay intact.

This is also the case, if you deactivate the extension.

This ensures that there are no redundant template customizations and it helps to provide better compatibility for Themes.

Support / Contact

If you have any questions, suggestions or disputes, feel free to reach out.
We are glad to help.
