

QUESTIONNAIRE

Project client:

Contact person:

Fax/tel:

E-mail:

An object:

To develop a POI for an object " _____ " we ask you to clean the source water of the borehole intake. The productivity of the borehole water intake at peak flow is ___ l/sec, ___ m3/hour; the daily peak is ___ m3/day.

Source (cross out the desired cell)	Borehole water intake	Surface body of water	Household drains	Water after the technologica l process	Other (specify)
	Borehole water intake				

CUSTOMER'S REQUIREMENT FOR PURIFIED WATER:

PLACEMENT OF A WATER TREATMENT PLANT:

THE QUALITY OF THE SOURCE WATER:

Energy supply		Volts	Hz
Source water pressure, atm.	Max.	Average	Minimum
The Customer has a source water tank, volume (cross out the desired cell)		<input type="checkbox"/>	No
The Customer has a tank of clean water, volume (cross out the desired cell)		<input type="checkbox"/>	Yes

Chemical analysis of the source water is attached

An indicative pipeline tracing plan is attached.

The required pressure at the outlet of the cleaning station is ___ m.

We ask you to take into account the reagent warehouse with a monthly supply to the water treatment plant, also indicate the consumption of clean water required for flushing filters, the amount of flushing water discharged per day.
