

The **focus** of this doc is gathering:

How-To's, Workarounds for issues, Mods/Tweaks, Killer Apps, & maybe more main sections?

We need more readers to become editors, so the main sections can have sub-sections created.

And so that new and outdated content, can be added and removed more regularly.

Sister maemo.org links are here...

Test beta community apps before they're released as stable

http://wiki.meego.com/MeeGo_Apps/Community_QA

Improve SSH security once dev-mode enabled (much of this applied in subsequent updates)

<http://www.basshero.org/blog/113/nokia-n9-developer-mode-ssh-security>

Dismantling the N9 (LCD (AMOLED) + Touch Screen (Digitizer) + Proximity Sensor)

<http://www.youtube.com/watch?v=9dxsTGpGRhs&feature=relmfu>

Dismantling the N9 (Disassemble&Assemble - Battery & Case Replacement)

<http://www.youtube.com/watch?v=i9u7r4j0atU&feature=relmfu>

Change the terminal font size (pretty obvious, maybe not worth documenting)

<http://forum.meego.com/showthread.php?t=4966>

Force a restart = hold power/lock-screen button for 10-sec (in manual)

It's perfectly fine to use the N900's charger with the N9 & vice-versa

Package a *.DEB for N9 (Binary only)

<http://talk.maemo.org/showthread.php?t=80908>

Report Bugs! Pointers

<http://talk.maemo.org/showpost.php?p=1124887&postcount=1>

Improve scratched Gorilla Glass:

*<http://talk.maemo.org/showthread.php?p=1134372#post1134372>

*Rain-X (may not be suitable for smartphone screens w/hardend glass)

*<http://forum.ppcgeeks.com/moto-droid/114659-gorilla-glass-does-scratch-but-i-know-how-repair.html>

Email & MfE, getting help with issues by giving help

http://wiki.maemo.org/Email_and_Mail_for_Exchange_n9

Make your own wallpaper

<http://talk.maemo.org/showthread.php?p=1132540#post1132540>

How to restore system w/o doing a total rootfs rewrite (i.e. losing most data)

http://wiki.meego.com/N950/Fixing_MALF_state

Add Harmattan-dev Nokia repository

<http://talk.maemo.org/showthread.php?t=81154>

Be very careful adding packages from this repo, read this thread for why

<http://talk.maemo.org/showthread.php?t=81543&page=2>

RzR's 3rd-party (community) repository

<http://rZR.online.fr/q/harmattan>

<http://talk.maemo.org/showthread.php?t=75815>

Add system-wide Copy & Paste using Xclip (maybe belongs in KillerApps?)

<http://forum.meego.com/showthread.php?t=5200>

Transfer files to/from N9 via WiFi+SSH client (WinSCP)

<http://www.youtube.com/watch?v=wccMF2IDH5A>

Accessing N9 through SSH over 3G

<http://forum.meego.com/showthread.php?t=4866>

Text areas in harmattan browser, scroll with two fingers!

<http://talk.maemo.org/showthread.php?t=80482>

Import Calendars into N9

<http://forum.meego.com/showthread.php?t=5227>

<http://forum.meego.com/showthread.php?t=3729>

Sync Calendar, Contacts

https://betalabs.nokia.com/apps/nokia-link/more_info (irony)

SIP + Google Voice (works like a cellular call, quality sometimes not quite as good)

<http://talk.maemo.org/showthread.php?t=80505>

Setup a Bluetooth PAN

<http://forum.meego.com/showthread.php?t=4867>

How to enable SSH root access if you really must (not necessary as you can just use devel-su)

http://sintonen.fi/n9_pr1.1_remote_root_ssh_login.txt

Also apparently if you change user, dev, & root pwds from their default, you can proceed w/root via SSH.

Connect to the net via USB using USBnet

<http://talk.maemo.org/showthread.php?t=79929>

Google Reader in Feeds App (2 approaches, one's a workaround the other's a tip)

<http://talk.maemo.org/showthread.php?t=80843>

Create desktop icon w/root access to a script (2 answers on post #5)

<http://talk.maemo.org/showthread.php?p=1135282#post1135282>

Access touch friendly (mobile, not txt-only) version of some Google services

<http://talk.maemo.org/showthread.php?p=1129333#post1129333>

Remove app shortcuts from the app launcher home-screen

<http://everythingn9.com/remove-application-shortcuts-nokia-n9/>

Use a XMPP gateway for multiple messaging services at once, but w/only one connection!

<http://talk.maemo.org/showthread.php?p=1049366#post1049366>

Re-encode video to a format more suited to the N9

<http://talk.maemo.org/showthread.php?p=1110680#post1110680>

You can do it in the terminal on the phone like this, otherwise Handbrake's excellent.

I'm not aware of any transcoding software like Handbrake, but for Maemo.

Reduce N900 power consumption (much of it applicable to N9 owners)

http://wiki.maemo.org/N900_Hardware_Power_Consumption

POI's can be imported to maps.nokia.com, & then synced w/the N9's maps apps (wrong?)

<http://talk.maemo.org/showthread.php?p=1148518#post1148518>

Add new POI's to maps.nokia.com

<http://maps.nokia.com/mapcreator>

Enable services restricted by operators (Skype, WiFi Hotspot, Youtube, etc.)

<http://talk.maemo.org/showthread.php?t=81479>

Add new search engines on top of the 4 default ones

<http://talk.maemo.org/showthread.php?p=1149289#post1149289>

Install Nemo on your N9 (not recommended for n00bs)

<http://mynokiablog.com/2012/01/15/howto-nemo-on-the-nokia-n9/>

Connect to WLAN using WPA2 Enterprise

<http://talk.maemo.org/showthread.php?p=1156586#post1156586>

<http://kb.mit.edu/confluence/display/istcontrib/Connect+your+MeeGo+Nokia+N9+to+MIT+SECURE+wireless>

Harmattan (Maemo6x/Meego1.2) version numbering explained

<http://www.developer.nokia.com/Community/Blogs/blog/n9-developer/2012/01/23/harmattan-version-numbering-explained>

Virtual Keyboard

[Back to Contents](#)

Advanced keyboard functions, including arrows, copy paste, etc

<http://everythingn9.com/advanced-keyboard-functions-nokia-n9/>

<http://forum.meego.com/showthread.php?t=5288>

Toggle between shell keys & arrows keys for terminal in VKB (already doco'd?)

<http://talk.maemo.org/showthread.php?p=1123712#post1123712>

Swype specific

<http://www.swype.com/category/tips/>

Swype: How to delete words you don't want in dictionary

<http://talk.maemo.org/showthread.php?p=1135357#post1135357>

Enable more Swype settings in the GUI

<http://talk.maemo.org/showthread.php?t=80573>

Limit Swype to the languages you use (no longer needed w/1.2?)

<http://talk.maemo.org/showthread.php?t=80582>

Disable Swype tips (PR1.2 only?)

<http://talk.maemo.org/showthread.php?p=1173793#post1173793>

<http://www.youtube.com/watch?v=70c1zqTn1aE&feature=related>

Change N9 product code (this isn't actually needed for any reason I'm aware of)

<http://talk.maemo.org/showthread.php?p=1140016#post1140016>

Handy *nix Cmds

[Back to Contents](#)

In most cases need to authenticate with: devel-su + **rootme**

Various system info output:

cat /proc/cpuinfo

To determine if a package is installed:

dpkg -l <package name> OR

dpkg -l | grep <package name> (the "-l" is a small L)

Installed indicates with a "ii" and un-installed with "un" in-front of the package.

If output is empty then it doesn't exist in the repo, & needs to be installed via browser.

To see packages a package depends on (dependencies):

apt-cache showpkg <package name>

Installing a package...

pkgmgr install -V -p <package name>

free -m

Overcome pkgmgr lock file issue that's stopping a uninstall:

killall -q pkgmgrd

rm -f /var/lib/dpkg/lock

apt-get remove <package name>

Workarounds

[For bugs & design limitations; subject to change w/major release]

[Back to Contents](#)

*Issue with dloading voices for drive app

Widgets for N9/50 (alternative to the above)

<http://forum.meego.com/showthread.php?t=5630>

Sigma Player (music player, supports gapless audio (could be wrong there) among other things)

<http://talk.maemo.org/showthread.php?p=1116247#post1116247>

QuaserMX (music player, looks even better than Sigma, not free though)

<http://talk.maemo.org/showthread.php?t=81318>

Default Browser Setting: control panel applet for changing default browser

http://my-meego.com/software/applications.php?name=Default_Browser_Setting&fldAuto=683&faq=9

Netview: VNC client from Nokia for accessing your N9 from your PC/Laptop

<http://store.ovi.com/content/214366>

Theme Changer

<http://leimu.drupalgardens.com/content/themechanger>

Prey: F/OSS anti-theft app (possibly an easy port to the N9)

<http://preyproject.com/>

<http://talk.maemo.org/showthread.php?t=81209>

Live Clock (variation on some of the widget-like manual hacks/mods)

<http://store.ovi.com/content/238928>

Ringling Restorer (restore ringing profile after a timeout)

<http://forum.meego.com/showthread.php?t=5448>

MeePaper (Read It Later client)

<http://store.ovi.com/content/179437>

Molome (photo-sharing app, similar to really popular one on android)

<http://store.ovi.com/content/113885>

Battery Usage (use with caution, some reports that it causes drain)

<http://store.ovi.com/content/138659>

ClipMan (clipboard manager)

<https://sites.google.com/site/helexmeegoprojects/clipman>

Rotate Lock-screen (manual mod/twk's easy, but for those who are unsure)

<http://store.ovi.com/content/237392>

BackLighter (stop standby/screensaver from kicking-in)

<http://store.ovi.com/content/224077>

TranslateAll: language translator based on Google Translate API

<http://store.ovi.com/content/213078>

TwimGo: alternative twitter client

<http://store.ovi.com/content/178406>

EasyList: to do list app (sync multiple ones etc)

<http://talk.maemo.org/showthread.php?t=75894>

MeeDav: WebDav client

<http://forum.meego.com/showthread.php?t=5651>

Internet Radio Player: listen to streaming stations

<http://forum.meego.com/showthread.php?t=4383>

VCard Importer (CLI only app)

<http://talk.maemo.org/showthread.php?t=82485>

QAD Signal (signal strength app for WLAN)

<http://talk.maemo.org/showthread.php?t=82487>

2G3G: app to switch quickly between 2G, 3G or dual mode

<http://talk.maemo.org/showthread.php?t=82531>

<https://projects.developer.nokia.com/2g3g>

FlightMode: app to switch between flight & normal mode

<https://projects.developer.nokia.com/flightmode>

Airxxxxx-ng suite of networking apps (CLI only?)

<http://talk.maemo.org/showthread.php?t=82348&page=4>

MeeCast: weather app

<http://talk.maemo.org/showthread.php?t=76291&page=28>

BTInputTerminal: use with BTInput to get rid of the VKB in the terminal

<http://store.ovi.com/content/258644>

WiFi Scanner
