## ENGINEERING MANAGEMENT PRODUCT PORTFOLIO

Managed engineering projects are listed below. More information can be found on [personal resume](#).

### 2016 - Red Hat Partner Link Mobile Application

Red Hat Partner Link is a mobile application that enables corporate Red Hat Partners to connect with pre-vetted strategic contacts and to close deals on the go.

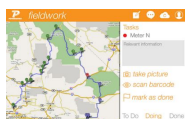

### 2015 - ArcadeMe Learning Management System

The ArcadeMe LMS platform fosters community and collaboration on a gamified learning experience, where courses level up and match students according to complementary skills. It currently serves content for Unreal Engine 4 training and strategic insights for event marketing decisions. Awarded \$40K Startup Chile grant for LATAM's best startup technological projects.

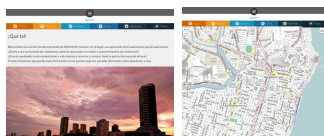

### 2014 - PowerMetrix Field Worker Management

PowerMetrix leapfrogged competitors shifting their fieldwork based services to cloud based infrastructure, where field workers could plan logistics and remotely diagnose equipment using an iPad application.

### 2014 - Dromos App and Navigation

Dromos is a smart city app that used open data in order to supply navigation routes through cities and towns. This platform used graph databases and crowdsourced open datasets to enable navigation in areas where alternative services (e.g. Google Maps) were not reliable or available. Winner of Developing Latin America 2013 LATAM wide hackathon and \$10K grant.

### 2011-13 - Inventio Interactive and Computer Vision Experiences

Inventio's technology IP Portfolio includes a Tier III ready data center, interactive computer vision surfaces, 3D experiences (VR, AR, MR), accessibility (eye tracking, sign language), LMS systems, and IaaS/SaaS government solutions.
