

# MOSHE BREVDA

mbrevda@gmail.com

## Summary

---

### **Proficiencies & Expertise**

- Server: PHP, JS, node.js, Bash; Server administration and management
- Client: React.js, Redux, webpack, gulp, babel; CSS, PWA's
- Cloud infrastructure (AWS/Google/Digital Ocean), DNS, CDN, CI/CD, etc
- Network infrastructure management
- Project Management, tooling

### **Libraries & Projects:**

- [React Image](#) - an `<img>` tag replacement for react.js (~400k downloads)
- [Other code](#) - on github

## Experience

---

### **Technical Team Lead**

**Tarcha Group, Sports/Gaming** (November 2013 - November 2017)

- Devised a fast-to-market strategy to quickly get software projects into the hands of users (MVP) and iterate based on real user feedback, leading to greater insight and hard data for deciding stakeholders
- Designed a cloud strategy that mixed the best in class solutions across providers to offer the development team the best breed of offerings resulting in an extremely impressive user experience
- Managed tasks and workflow, collaborating with the dev team and external resources
- Mentored engineering team for simple and efficient code development, leading to a better development experience, higher employee morale and greater customer satisfaction
- Mitigated system bottlenecks and improved update rollout efficiency by enforcing CI/CD for all software products & apps, leading to greater rollout confidence, proactive issue monitoring, and happier customers

### **Senior Software Developer (Dev Lead)**

**Schmooze Com./FreePBX, Telecommunications** (June 2008 - July 2013)

- Re-architected [FreePBX](#) (an open source PBX) to allow for a more pragmatic design; oversaw codebase updates to be more stable, modern, pluggable, and debug-able via modern programming patterns and a reduced code complexity
- Headed a project to optimize the user experience by designing an optimized build pipeline and reducing overall system latency by ~75%
- Instituted a lean and lightweight RESTful framework; used as the kernel for all internal projects and as a starting point for mobile apps, SPA's, etc
