

Screen Recording *with* Quicktime

QuickTime Player can record a movie from your camera, or record the screen of your iOS Device. It can also record audio from a microphone or record the screen of your Mac.

To Record Your Screen:

- 1 Open QuickTime Player from your Applications folder, then choose File > New Screen Recording from the menu bar. The Screen Recording window opens.
- 2 Before starting your recording, you can click the arrow next to the Record button to change the recording settings
- 3 To start recording, click the Record button and then:
 - ★ Click anywhere on the screen to begin recording the entire screen.
 - ★ Or drag to select an area to record, then click the Start Recording button within that Area.
- 4 To stop recording, click the Stop button in the menu bar, or press Command-Control-Esc
- 5 After you stop recording, QuickTime Player automatically opens the recording. You can now play, edit, or share the recording.
