Creating Seesaw Activities

Activities

Teachers can create and share activities for students to complete in Seesaw. Activities can be shared across classes and across the school (Seesaw for Schools only).

+ → 💡 Browse Activity Library → My Library → ⊕ Create New Activity → **or** → **Choose from library**

By creating activities family members are only notified when the student completes the activity. No more need for 'copy & edit' or fake students.

Using activities also makes it easier to track who has completed each activity.

Create Activity

Activity Name (required)

e.g., Writer's Workshop

Student Instructions

Type instructions for your students...

Add Instructions - type in the text shortcuts and it will transform into the icon!

🖊 Add Voice Instructions

⊕ Add Example

Student Template (optional)

⊕ Add template for students to edit

👥 Share with: **All Students in Year Three**   Edit

More Options   >

Save as Draft   Preview

Share with whole class or specific students
