

Eko 15.9

Enhancement

- Discover notification

Remove Discover's notification from Recent tab. All of notifications from Discover will be moved to be inside Discover tab. This enhancement will help you to distinguish notifications from chat and notifications from Discover.

Eko 15.9

Bug fixes

- Admin Panel - Forms: fixed issue when 'sender/receiver filter' causes the Forms Log export to fail
- iOS - Workflows: fixed issue when the cursor skips to the end of the text field when delete character in the middle of text field
- All platforms - Commendations: fixed issue when all of users in the group didn't display when select user to send thumbs up
- Mobile - Library: fixed issue when 'Assessments' and 'Attachments' in Library search displayed off-screen
