# Workflow

# Notes

- There is no need for Persona Login for FSA. It's optional. However if a non Mozillian signs in with Persona, he will only be able to create FSA Business cards.
- If you do not login with Persona, you can download the card locally on your PC instead (FSA).
- After successfully creating your card(s), they will appear on the Mozilla Cards database (optional), where every vouched Mozillian can browse through the business cards already created.

# Notes

- There will be also an option to update your existing business card by going to your profile.
- FSA Cards won't be stored on the Mozilla Cards database, but they are accessible only by the creator, by downloading it.
- There is no need for a Mozillians API in the beginning, we can launch the generator by inputting the info manually, and we can revisit it at a later point to integrate the API.

# Notes

- There might be also an additional business card for general local mozilla communities, without personal contact information of a specific mozillian. This might work the same as with FSA, however they shouldn't be part of the swag requests.
- There needs to be a valid reason of course to request business cards, but that's up to the classic swag request procedure and approval.

# Info

- We set up an IRC Channel for the project, you can join on #cards
- We need more members to get this going, if you are interested to contribute, let us know! You can contact me ( Elio Qoshi ) or William Reynolds for ways to get involved.
- We are also on Telegram! Just ask to join
