How well travelled is your food?

Home Food Miles? Egg Miles Fuel Project Veggie Tramps

Food Miles Calculator Results

Your Results!

Assuming your food has come from the capital, Tokyo travelling to the capital Taipei, it has travelled approximately **1314 miles (2115km)** as the crow flies.

Why not compare your results with others - [Stats!](#)

This Calculation is merely an estimate and does not take into account many different factors. These include the Food Miles contained within a particular product. For Example if you entered something like fresh juice, this value does not include the distance travelled from point of harvest to packaging.

The other factors to consider are getting the product to you. The above calculation only gives a rough estimate of the distance travelled to get the item into the destination. It does not take into account getting the item into your house and onto the plate. This includes long haul transportation actually getting it from the supermarket!

Food Miles Calculator

Step 1: Where are you?

Your Location
Taiwan

Step 2: Where has your food come from...?

Have a look on the packaging to see where abouts the product has come from and then simply select it from the list below.

碳足跡宣言轉盤

2022/11/8

這是我與魏弘展還有許庭睿一起做的，
雖然中途有一些困難，但還是順利做好了。

碳足跡宣言轉盤2

這個轉盤有一個裁切的不是很好的圓圈，一個三角柱和一個方形的底盤。它的轉盤上還有8個項目。可以透過轉那個轉盤來看看自己有沒有做到上面的事情。我認為可以透過這個方式來讓我自己更謹慎一點，也可以讓自己可以減少自己的碳足跡。

以取得同意
