

In the Bin!

...

Keeping the streets clean

bit.ly/inthebinapp

Team HackU

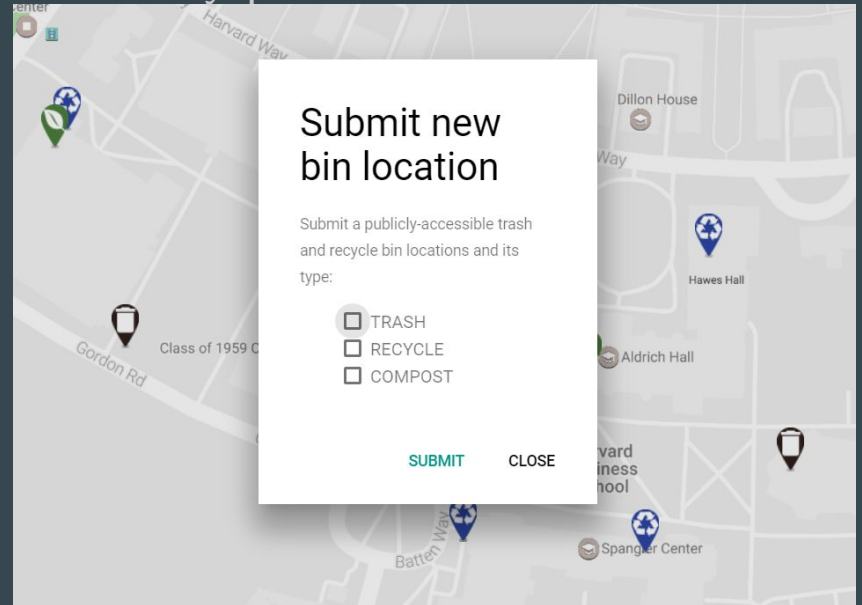

Use Cases:

- 1) Find out the nearest Trash can - Compost, Recycle Bin, Trash Can
- 2) Report Error
- 3) Benefit of Crowd Sourced Data
- 4) Reporting False Data of Trash Cans
- 5) People can put trash in garbage bin instead of keeping it in their cars or home.

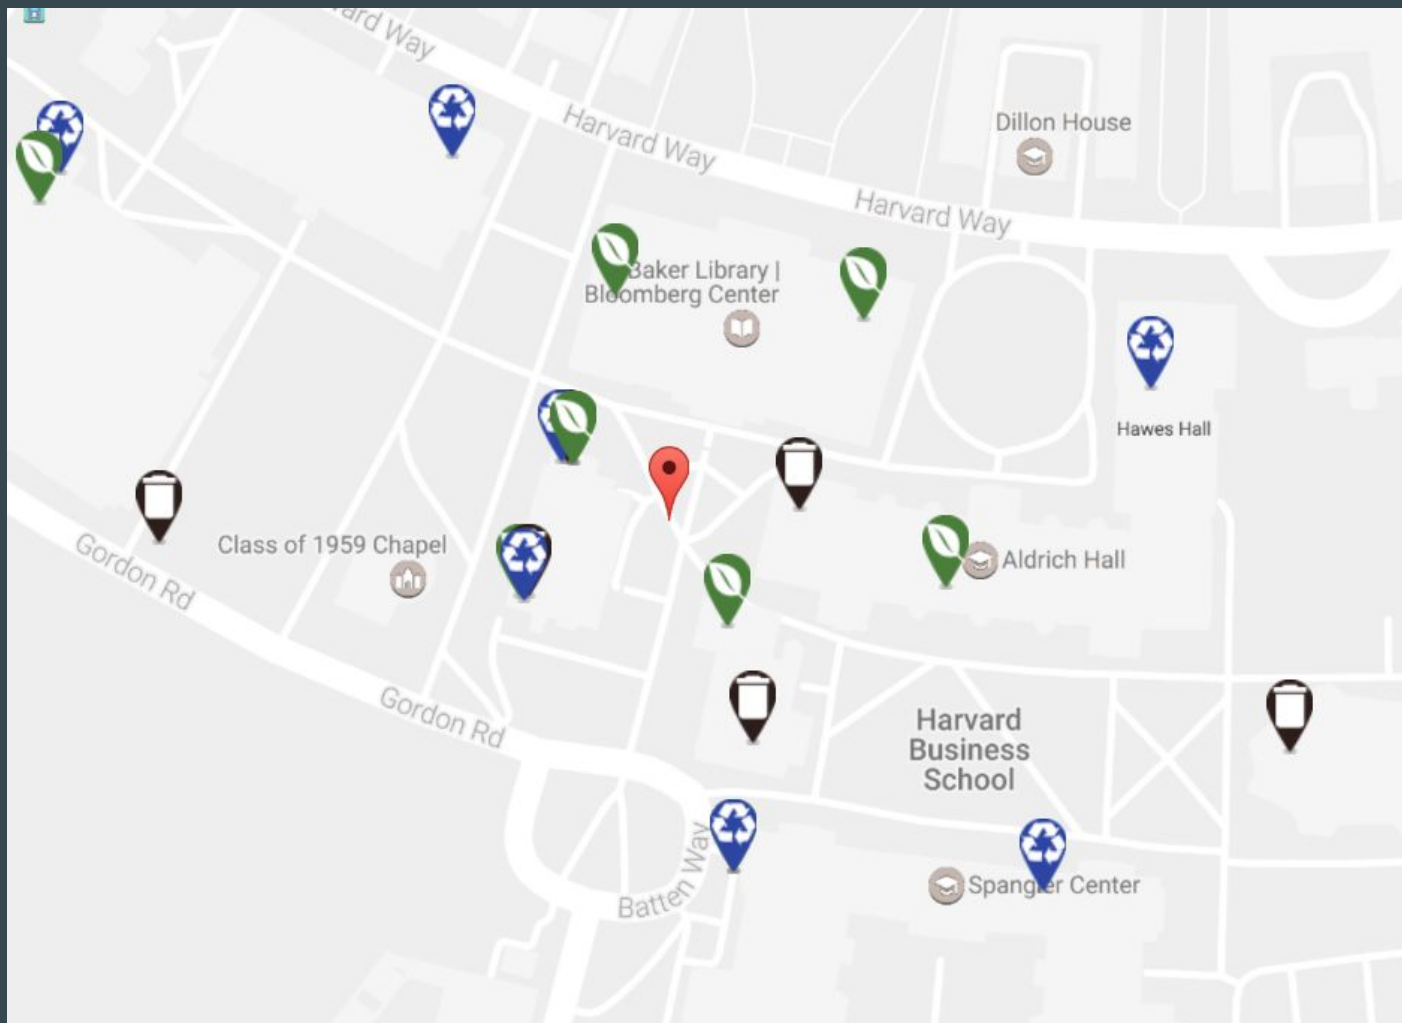

Customer base

- Governments (Staffing, Health care)
- Regular citizens
- Applies equally to Countries like India as well as Japan.

Future Enhancements:

- Request bin placement in thoroughfares
- Filter based on nearby services with the benefit of crowd sourced data.
- We can extend to domains like charitable organizations and other services
- Verification and “report error/problem” function
- Better UI/Design, App Icon for “Save to Desktop” option

You are here right now

Thank You for the bins
