CSSG Career

Typical Career Paths

1

Software Engineering

Frontend, Backend, Fullstack, Security, and DevOps include some of the software engineering positions available.

2

Product Designers (UI/UX)

Design work and user research that go into creating a seamless product that looks and feels great.

3

Product/Project Manager

SEO of a product or a feature. Do competitive analysis and lead the vision for the product/project.

4

Machine Learning Engineer/Data Scientist

Lay a solid data foundation in order to perform robust analytics. Use methods to help company make better decisions.

Our Career Paths

1 Software Engineering

Frontend, Backend, Fullstack, and DevOps include some of the software engineering positions available.

3 Information Technology

Business User Support, Enterprise Integration Applications: CRM, Knowledge Base (Confluence), Work Management (JIRA), Cybersecurity Training

2 Cybersecurity

SOC Analyst, Network Security Engineer, Cryptographer (Math and CS majors), Compliance Analyst (less technical), Forensic Analyst, Malware Analyst (Reverse Engineer), Red Team Penetration Tester, Security Engineer

4 Mobile Development

Android/iOS development

Getting your first internship

1 Learn the fundamental

Have a good fundamental understanding of programming concepts which taught in CPSC 120, 121, 131.

3 Have a good resume

We'll show you some example of our resume for reference in the upcoming slides.

5 Networking

Make great connections with people in the field can give you great opportunities in the future, they can even refer you to the position which may help a lot.

2 Build projects

Side projects are great way to help you strengthen your knowledge as well as show recruiter your expertise.

4 Apply & Apply

In this economy, getting your first internship is harder than ever due to the competition so keep applying, sometimes it take 300 applications just to get 1 interview.

Summer 2024 Tech Internships by Pitt CSC

github.com/SimplifyJobs/Summer2024-Internships

The screenshot shows a GitHub repository page for 'SimplifyJobs / Summer2024-Internships'. The repository is public and has 2.1k forks and 22.8k stars. The current file being viewed is 'README.md' in the 'dev' branch. A recent commit by 'actions-user' is shown, titled 'added listing: Summer 2024 Software Engineering Internship at Moog'. The README content includes a title 'Summer 2024 Tech Internships by Pitt CSC & Simplify', a welcome message, a note about the repository's scope (US, Canada, Remote), a link to a 'Zero to Offer' guide, and a call to action to submit issues. A section titled 'Looking for 2024 New Grad Tech Roles?' is also visible.

EDUCATION

B.S. Computer Science
California State University, Fullerton

Graduation Date: May 2024

GPA: 3.98

SKILLS

Languages: Python, TypeScript, JavaScript/HTML/CSS

Frontend / Mobile: Next.js, React, Svelte, React Native

Backend: Express, FastAPI, Prisma, MongoDB, MySQL, DynamoDB

Other: AWS S3, Lambda, QuickSight, Glue, CDK

WORK EXPERIENCE

AMAZON WEB SERVICES | Software Development Engineer Intern | Seattle, WA **May 2023 - Aug 2023**

- Developed a monitoring dashboard, integrating it to an internal data analytics service to promptly detect several metrics, resulting in increasing the detection process by 80% and automate the data collection process entirely
- Made a significant impact on the entire Documentation team by streamlining processes and improving visibility into more than 5000 localization packages total and 300 builds daily.
- Led the data transformation process using PySpark, AWS Glue, and AWS S3 to process 300 builds daily and prepare data for analysis and created a comprehensive dashboard with AWS QuickSight sourcing data from the internal datalake.
- Key contributor to an organization-level project, a new internal service tool for doc writers. Pioneered the implementation of Kahn's Algorithm to handle 9000+ entities data for a pivotal logic feature and collaborated with frontend engineers to develop the project's UI using TypeScript.

AMAZON | Student Research Fellow | Fullerton, CA **Feb 2023 - May 2023**

- Selected as one of 10 CSUF students for the prestigious Amazon Student Fellowship program, collaborating with a team of 4 fellow students and developed a transgender resource mobile web application from inception to completion, incorporating stakeholder interviews, research, and data collection.
- Achieved 2nd place among 14 teams in the Engineering competition by CSUF, showcasing strong teamwork, communication, and coding skills.

ASSOCIATION FOR COMPUTING MACHINERY CSUF | Vice President | Fullerton, CA **June 2022 - Present**

- Empowered a community of over 1000 tech enthusiasts as Vice President of ACM CSUF, fostering an inclusive and thriving tech club on campus. Led the successful organization of FullyHacks, CSUF's inaugural and largest in-person hackathon with more than 200 participants, providing a platform for students to showcase their innovation and coding prowess.

CAL STATE UNIVERSITY, FULLERTON | Data Science Research Assistant | Fullerton, CA **May 2022 - July 2022**

- Researched about Data Science concepts such as data visualization, data analysis and Machine Learning concepts such as Linear Regression, K-Means Clustering, ... under the guidance of Dr.Doina Bein
- Developed a Spotify Songs Recommendation System with K-Means and content-based filtering with optimal number of clusters through Elbow Method, Silhouette Number enhancing result outcome by 50%

PROJECTS

GAMEBOY SIMULATOR | A desktop application to simulate gameboy image style **Sep 2022**

- Implemented PyQT, openCV to create a Computer Vision desktop application for image and webcam processing
- Led a team of 3 developers to work on the application, created CI/CD workflow using GitHub Actions, managed issues using GitHub Issues which improve productivity and consistency in the production branch by 60%

SPOTIFY RECOMMENDATION SYSTEM | Machine Learning model suggests Spotify song playlist **May 2022**

- Analyzed Spotify songs, created custom datasets using various metrics including songs trend, song features correlation from 2017 to 2022 using Pandas, Matplotlib, Seaborn
- Implemented content-based filtering and One-Hot Encoding to determine user's top genre from personal playlist to create recommendation table with 50% more optimal cluster with Elbow Method, Silhouette Score

REDDAT | A full-stack social media web app **Dec 2021**

- Launched a full-stack social media mobile web app similar to Reddit, reaching 2000+ users during beta launch
- Built API endpoints with authentication using JWT authentication, Express, Node.js, MongoDB applying MVC pattern
- Developed web app user interface with React, Redux Toolkit, and built chat room features with Socket.io increases user traffics by 60%

EDUCATION

California State University, Fullerton

August 2019 - May 2023

Bachelor of Science in Computer Science

SKILLS

Languages and Frameworks: Python, JavaScript, C++, React.js, Redux, HTML/CSS, Node.js, Swift, .Net Core

Tools/Others: Git, Figma, Linux, Visual Studios, MongoDB, Azure Devops

EXPERIENCE

Microsoft & Cyborg Mobile - New Technologist Intern

June 2021 - August 2021

- Selected for an 100 person intern cohort out of a pool of 1700+ applicants
- Developed a spec for the product during the design thinking phase
- Rapidly prototyped a Minimum Viable Product with React and Material UI

Microsoft - Software Engineering Intern

May 2022 - August 2022

- Developed an end to end full stack web service from scratch with React and .Net Core
- Wrote a design doc and created work items for 12 weeks
- Modified the API codebase to accept calls from my application
- Collaborated with team of full time software engineers to bring the project to completion

PROJECTS

Canvas Discord Bot

- Worked in a team of 6 to build a multi service bot that integrated Canvas and Discord
- Created front end React component library for my team to use
- Worked web backend login feature that allowed users to create an account on our website with MongoDB
- Set up a server to run node commands to interact with our noSQL database

Nice-Breakers

- Making ice breakers less awkward by introducing a series of online bonding minigames
- Mocked up user journey, wireframes, and higher fidelity prototype for the project
- Used Next.js and created react components to modularize the project

NoteSnap

- Won Best Overall Hack at QWER Hacks
- Scans notes and digitally index them for editing
- Implement Google's Vision API through Firebase and created UI using Swift Storyboard
- Created in the last 6 hours of the hackathon!

Resources

1

Check your emails from
the Career Center

They often have great information regarding upcoming job opportunities, career fairs, and workshops.

2

ECS Career and Internship
Expo

The Expo offers the chance to talk to many employers in the Engineering and Computer Science fields to network as well as for internships and job opportunities .

3

ECS Diversity and
Leadership Summit

The ECS Diversity and Leadership Summit is a great opportunity to develop leadership skills, talk to professionals, and engage in speed mentoring.

4

Club Workshops

Our clubs offer much more detailed workshops that can help you improve and gain some new skills that you can utilize. It's important to get involved so you can add projects to your resume.

Resources

5

External Sources

[Indeed](#), [WayUp](#), [Handshake](#), [STEM Advantage](#), [LinkedIn](#), [techintern.io](#), [greenhouse.io](#), [NSF REU](#), SURF (different links for different schools), [Glassdoor](#), etc.

6

CICE

Center for Internships and Community Engagement in CSUF “prepares our diverse student body for academic and professional success”

7

Women’s Center

Helps non-traditional students and women manage their lives and school as well as “parenting support services, leadership opportunities and programs to enhance academic and personal development”, and if you are in need of professional clothing for interviews, there is [Tuffy’s closet](#).

8

Industry Fairs / Events

Software Company User Conferences: Tech companies put on giant conferences, but students can get in for free or at a big discount. New product launches, technical workshops, walk thru booths, etc.
Diversity Focused Industry Events: SWE, Out for Undergrad, SHPE, AISES, etc.

Organizations On Campus

	Association for Computing Machinery – Women (ACM-W)	Supports, celebrates, and advocates for the full engagement, education, and opportunities for women in all aspects of the computing field. Provide a wide range of programs and services for the contributions of women in STEM.
	Women in Computer Science & Engineering (WiCSE)	Offers support for computer science students in all years of their educational journey. Events that allow you to connect with industry professionals. Hosts the Diversity and Leadership summit each year.
	Offensive Security Society (OSS)	Focus on proactive and adversarial approach to protecting computer systems, networks, and individuals from cyber attacks. Teach fundamentals required for the cyber security industry in an open and inclusive environment.
	Video Game Development Club (VGDC)	Focuses on workshops and special events targeted for the game development industry. Collaborate with other disciplines to create video games each semester. Workshops foster skills in all aspects of development. Attend speaker events of professionals in the games industry.
	ACM SIGGRAPH	Learn more about the field of computer graphics and interactive technologies. Host special events and workshops for fields such as production, graphic design, gaming, interactive arts (VR, etc.) and upcoming technologies/software.
	Data Science and Machine Learning (DSML) Club	The purpose of this club is to organize meetings to share knowledge and experience about Machine Learning, Data Science, and Business Intelligence. Also, we are planning to host industry events, workshops, and Machine Learning/Data competitions/Projects.
