

TEAM NAME: _____

EFFICIENCY (Distance)

Went so far I needed to bust out the binoculars

Pretty good.

I mean, I can reach out and touch it.

EW! This eyesore makes me queasy! Make it stop

AWESOME

GREAT

PRETTY GOOD

meh.

ARTISTIC DESIGN

Chassis and sides exhibit extremely creative design; “thinking outside the box”

Chassis and walls are pleasant to look at well designed and pleasant to look at

Chassis and walls have some design element, but lack the flair and appeal of a well thought out racer

Wait.. There is design on this racer?

FLAG

Flag is original, neatly manufactured, and clearly demonstrates the theme of the car

Attention and detail has been given to the flag, but there is room for improvement

Flag is present and secured, but is not demonstrative of the team’s theme

Flag is beyond ugly. It should be burned in the campfire tonight, and we shall never speak of it again.

PUSH TEAM

Push Team is enthusiastic and synchronized

Push Team performs well, but there is obvious room for improvement

Push Team does not push well at all, nor does it look coordinated

Push Team doesn’t push

PIT CREW

Pit Crew is fast, effective, and operate as a well-oiled machine

Pit Crew accomplishes the task, but lack synergy and polish

Pit Crew does not accomplish task completely

A few wrenches in the machine

COOPETITION

Killing it!!

Great!

Not the worst that I’ve seen...

Meh.

SUPPLIES:

- Build Kit
- 2x4 plywood, 3/4 inches thick for each team
- 2x4x4 (2 for each team)
- 2x4 plywood, 2 pieces, 1/4 inch thick for each team
