

DITCH THAT TEXTBOOK DIGITAL SUMMIT

About Swivl

- Swivl is an educational technology company that offers a range of products and services to support hybrid and online learning.

Introducing [Mirror](#)

- Mirror uses AI to automate reflection, allowing for customized prompts that can be specific to the classroom's needs, projects, assignments, or individual students.
- Designed to create more opportunities for reflection to occur more often and more deeply without creating extra work for teachers.
- Mirror also provides insights on goals, class sentiment, and evidence of thinking, which can potentially transform the way grades and assessment are approached.
- Could potentially for the tool to be used by teachers to reflect on their own practices and adapt to the ever-changing educational landscape.
