# The life cycle of the Monarch Butterfly

- <https://www.youtube.com/watch?v=EIVWtXjcfhA>

Pg. 258

**They would use up all of their energy if they tried to fly in the wind.**

Pg. 259

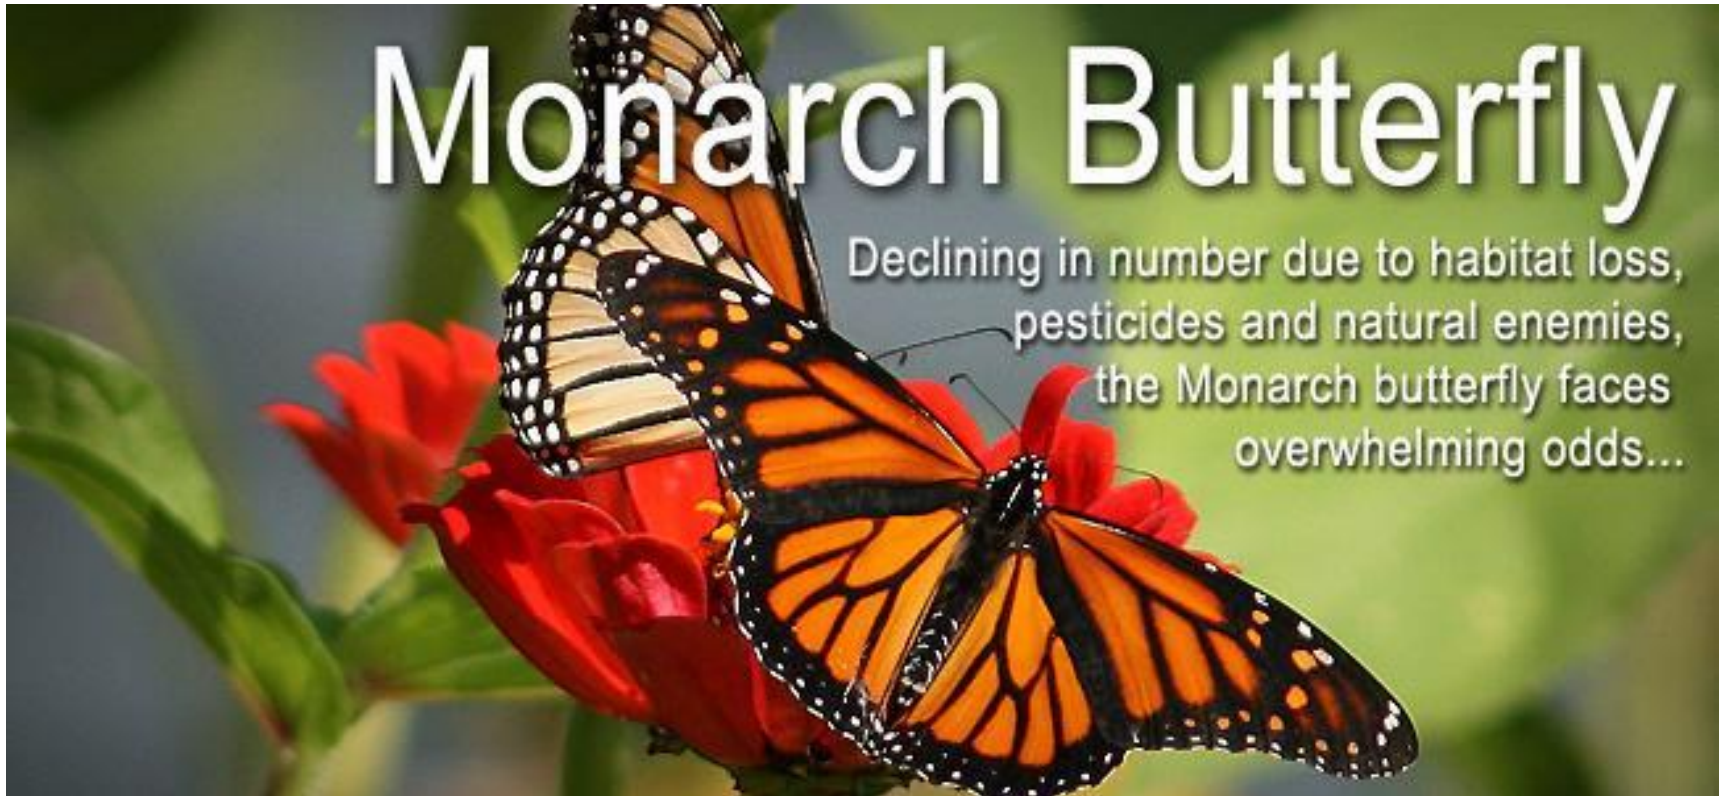

**Monarch  
butterflies  
crowding together  
on a winter day.**

©FRANS LANTING

Pg. 260

**Humans are cutting down trees.**

# Look back and respond

1. They will make an amazing journey south for the winter.

**2. It can fly almost two miles up in the sky.**

**3. They are found throughout the U.S.A. and near Canada and the Great Lakes.**

**4. The butterflies make a 3000 mile journey to a place they have never been before and they return to the same trees each year.**
